ABOUT THIS DOCUMENT

This document is intended for any user of DT Max, be it a beginner or advanced user. In this guide, we will cover the multitude of features offered by DT Max and present in its three screens.

On DT Max's first screen, the **Client List**, we will view how to effectively personalize and sort your client list in order to access specific clients with ease and speed.

On DT Max's second screen, the **Data Entry**, we will discuss the concept of using keywords to enter your clients' tax information. We will look into the various tools provided by DT Max to enter as well as search for these keywords.

On DT Max's third screen, the **Tax Return**, we will discuss the different forms that are generated as well as the many review tools available such as field tags and the QuickSource feature.

Finally, we will cover the proper setup and configuration of the **Preferences** menu which will include the Identification, User's defaults, and Forms Manager sections amongst many others.

DT MAX BASICS

In the following paragraphs, we will see the basic features of DT Max.

SPLASH SCREEN

When you open DT Max, the first screen that will be presented to you is the **Splash Screen**.

The screenshot shows the DT Max splash screen. At the top left is the DT MAX logo, and at the top right is the Thomson Reuters logo. The interface includes the following elements:

- Tax year :** A dropdown menu.
- DT Max products :** A dropdown menu showing "DT Max products".
- T2 CORPORATE :** Large orange text.
- Licensing information :** "This copy of DT Max is licensed for the sole use of: DR TAX DEVELOPMENT TEAM #2".
- Help links :** "Help", "Tutorials", "What's new?", "Knowledge base", "Support".
- Username :** A text input field with a help icon and a "Français" link.
- Password :** A password input field.
- Database location :** A dropdown menu with a "browse" icon (a folder with a blue arrow).
- Recently accessed clients :** A table with columns "Name" and "Client #".
- START :** An orange button with a right-pointing arrow.

You must first select a folder that will house the files of your Client Database. You may select your **Database location** by clicking the **browse** icon.

This screenshot is identical to the previous one, but with a red box highlighting the "browse" icon (a folder with a blue arrow) next to the "Database location" dropdown menu.

You may now enter a **Username** or **Accountant ID**. A user **Password** may also be added. We will discuss user privileges and passwords in the Security System chapter.

The screenshot shows the DT Max login window. The top left features the DT MAX logo, and the top right features the THOMSON REUTERS logo. The main area contains several input fields: 'Tax year' with a dropdown menu, 'DT Max products' with a dropdown menu, 'Username' with a text box containing 'USER', 'Password' with an empty text box, and 'Database location' with a dropdown menu containing 'F:\In\Emmy\DemoClients\'. There are also icons for help and language selection (Français).

Select the **Tax year** you wish to access by choosing the appropriate year from the scroll-down menu. Once in the program, you will still have the option to rapidly change taxation years without having to restart DT Max.

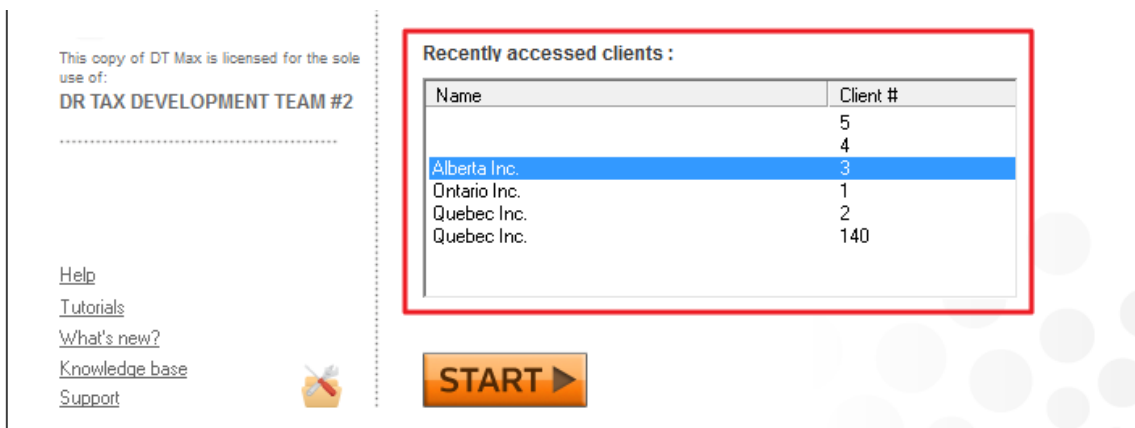

This screenshot shows the same login window as the previous one, but with the 'Tax year' dropdown menu open. The menu lists the years 2010, 2011, 2012, 2013, 2014, and 2015. The year 2014 is currently selected. The other fields remain the same.

Next, select the DT Max product you wish to load. In this case, we will select **T2**.

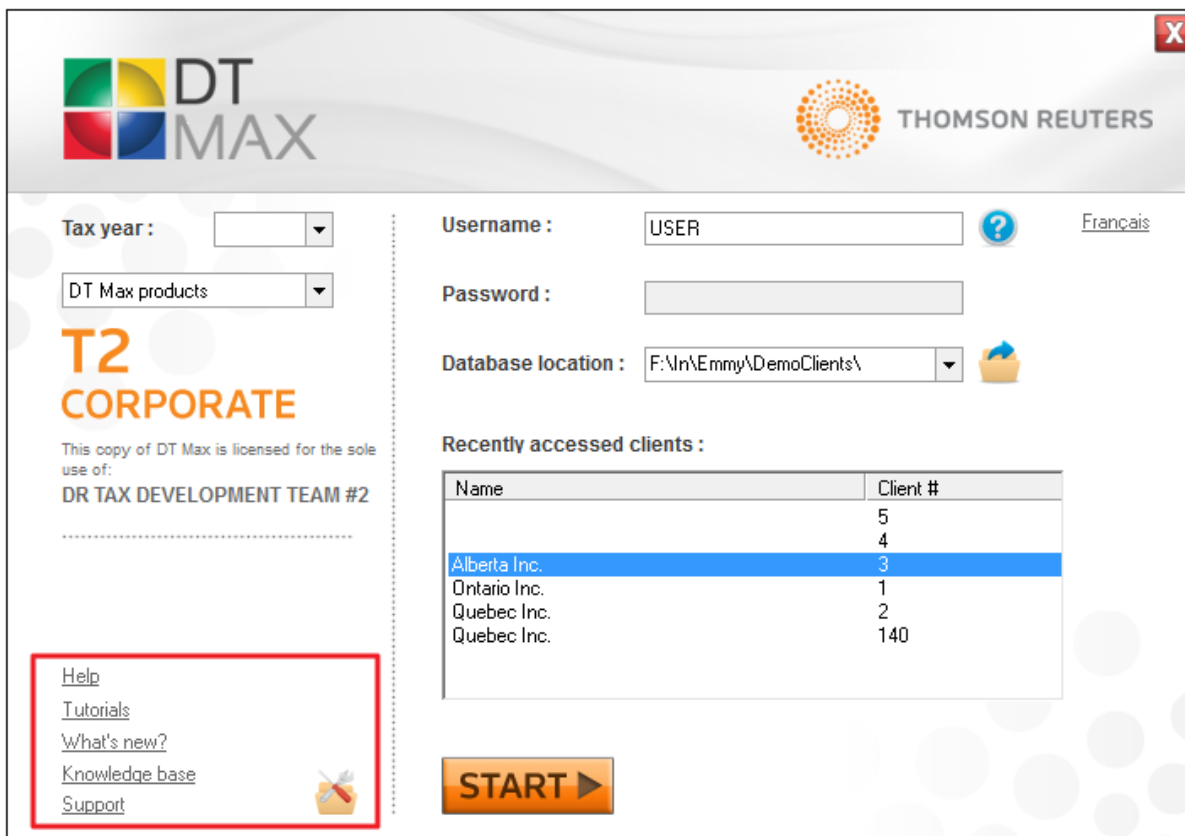

This screenshot shows the login window with the 'DT Max products' dropdown menu open. The menu lists the options 'DT Max products', 'T1', 'T2', 'T3', and 'T5013'. The option 'T2' is currently selected. The other fields remain the same.

Recently accessed clients will also be listed on this screen. You may access them directly by double-clicking the desired client. DT Max will load the Client List screen with the selected client highlighted.

The **Splash Screen** also provides many useful links such as the knowledge base, online video tutorials, and the DT Max support page.

Once you have enter all the relevant information, run DT Max by clicking on **Start**.

START

CLIENT LIST

When you start DT Max, the first screen you will enter is the Client list. The Client list displays all the client files that are currently being processed as well as the client files that have been carried forward from one year to the next.

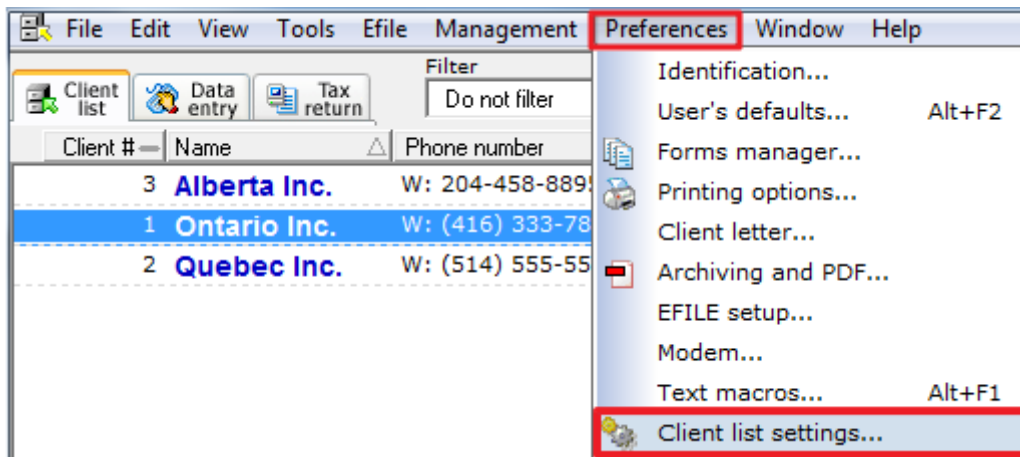

Certain basic information of every client's file is displayed directly in the Client list. For example, you can view the client's number, name of the corporation, phone number, business number, year-end, Processing Status, etc... All this information is displayed directly in the Client list.

Client #	Name	Phone number	Business number	Year-end	Processing status
3	Alberta Inc.	W: 204-458-8895	123456782RC	Dec31	Review required

Personalizing the Client List

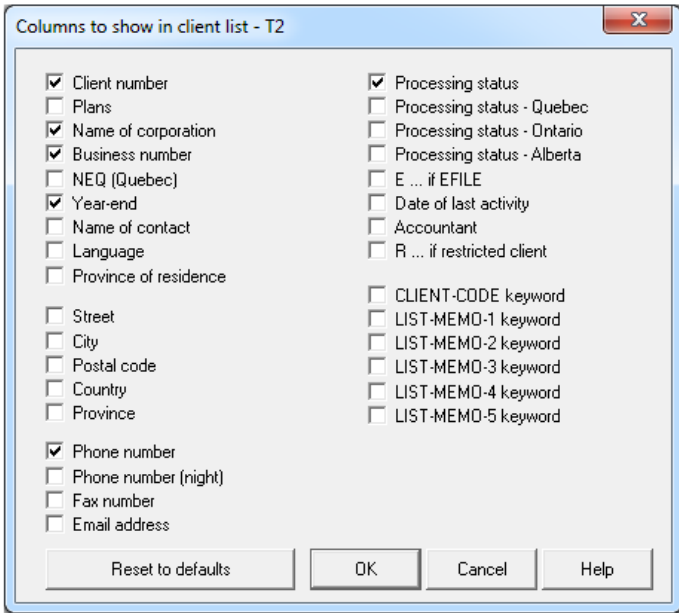

In order to personalize the Client list, go to the **Preferences** Menu, and select **Client List Settings**.

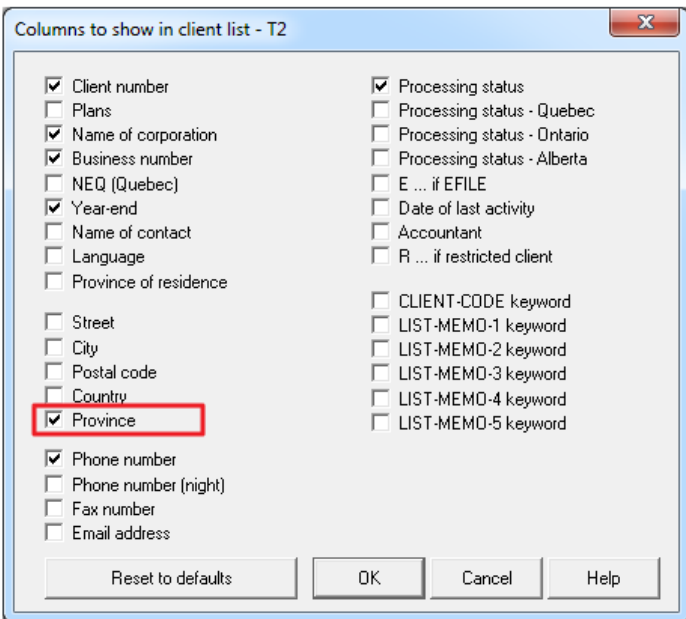

You can also personalize the Client list by clicking on the **Customize Client List** icon.

A new window will appear, allowing you to select the information you want to add or remove from the Client list.

By ticking a box next to any item in this window, DT Max will add that information as a column in your Client list.

Sorting the Client List

Certain columns of the customer list can be sorted such as the client number, corporation name and year end.

To sort your list by **name**, just click on the name column. The symbol "-" will become an arrow, indicating that the customer list was sorted by name.

The screenshot shows the Client List interface with the 'Name' column selected. The 'Client #' column has a '-' symbol, and the 'Name' column has an arrow symbol. The table below shows the data for the selected client.

Client #	Name	Province	Phone number	Business number
3	Alberta Inc.	AB	W: 204-458-8895	123456782RC

To sort your Client List in numerical order, click on the **Client #** tab. The symbol "-" will become an arrow, indicating to you that the Client list has been sorted by client number.

The screenshot shows the Client List interface with the 'Client #' column selected. The 'Client #' column has an arrow symbol, and the 'Name' column has a '-' symbol. The table below shows the data for the selected client.

Client #	Name	Year-end	Province	Phone number	Business number
2	Quebec Inc.	Oct31	QC	W: 514-733-8355	777888777RC
3	Alberta Inc.	Jan31	AB	W: 204-458-8895	123456782RC

Adding a new client to the Client List

In order to add a new client to your Client list, simply click on the **New Client** icon. You can also add a new client by pressing **F3** on your keyboard.

The screenshot shows the Client List interface with the 'Add new client' icon highlighted. The 'Client #' column has an arrow symbol, and the 'Name' column has a '-' symbol. The table below shows the data for the selected client.

Client #	Name	Province	Phone number	Business number
3	Alberta Inc.	AB	W: 204-458-8895	123456782RC
1	Ontario Inc.	ON	W: (416) 333-7894	123456782RC

A window will appear to configure the new company. You can change the client number that is automatically assigned to the new company.

The screenshot shows the 'Add new corporation' dialog box. The 'New client number' field is highlighted with a red box. The dialog box contains the following text and options:

New client number

The new corporation will be given this client number. If you wish, you may assign a different number provided it is not already used in this database.

Use the SmartStart input assistant

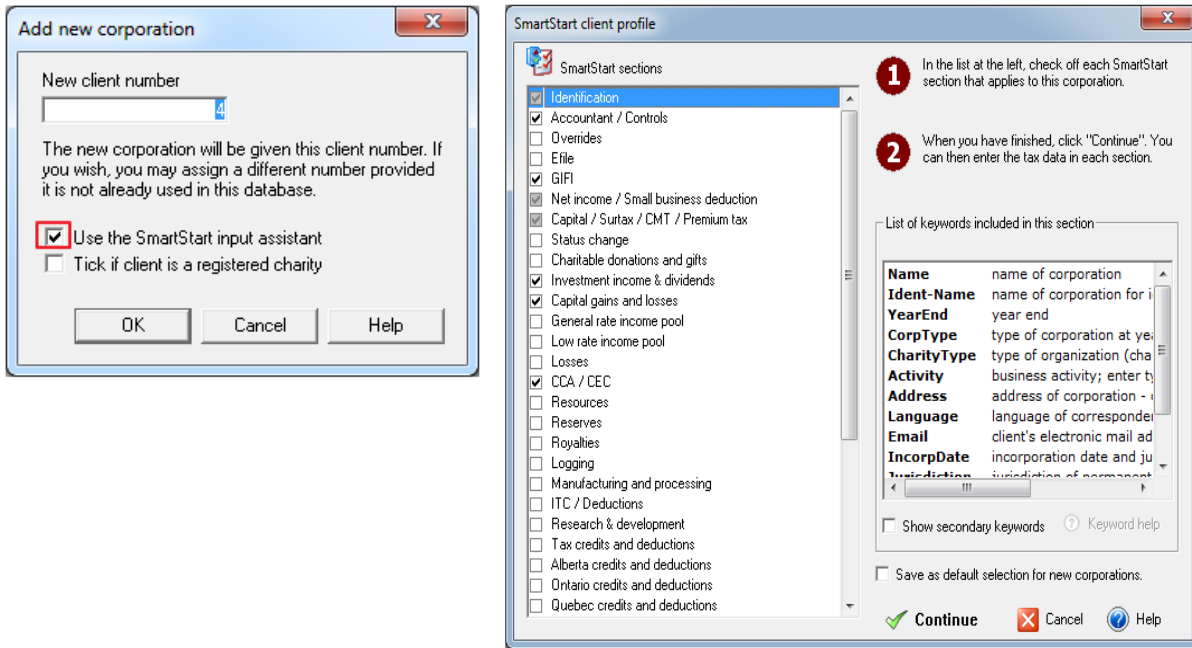

Tick if client is a registered charity

OK Cancel Help

THOMSON REUTERS™

DT Max allows you the option of using a Data Entry tool called the **Smart Start**. More details on this tool will be provided in the Data Entry portion of this document.

Finding clients within the Client list

To find clients that are already in your Client list, go to the **Find Client** box, located at the top right of your screen.

In the **Search by** drop-down menu, choose the type of search you want to perform. You can search your clients by Name, Client number, or Phone number.

Increasing/Decreasing Font in the Client List

To increase the font within your Client list, click on the **Zoom in** icon. You can also hold **CTRL** and press “+” on your keyboard.

To decrease the font within your Client list, click on the **Zoom out** icon. You can also hold **CTRL** and press “-” on your keyboard.

DATA ENTRY

Once you have created the new corporation, you will enter the Data Entry screen. The Data Entry screen is where all tax information is entered for your client's tax return. You enter this information through **Keywords**. Each keyword represents a question DT Max is asking you on your client's file. In order to complete your client's tax return, you must "answer" the questions the program is asking you through the keywords.

Adding keywords in the Data Entry

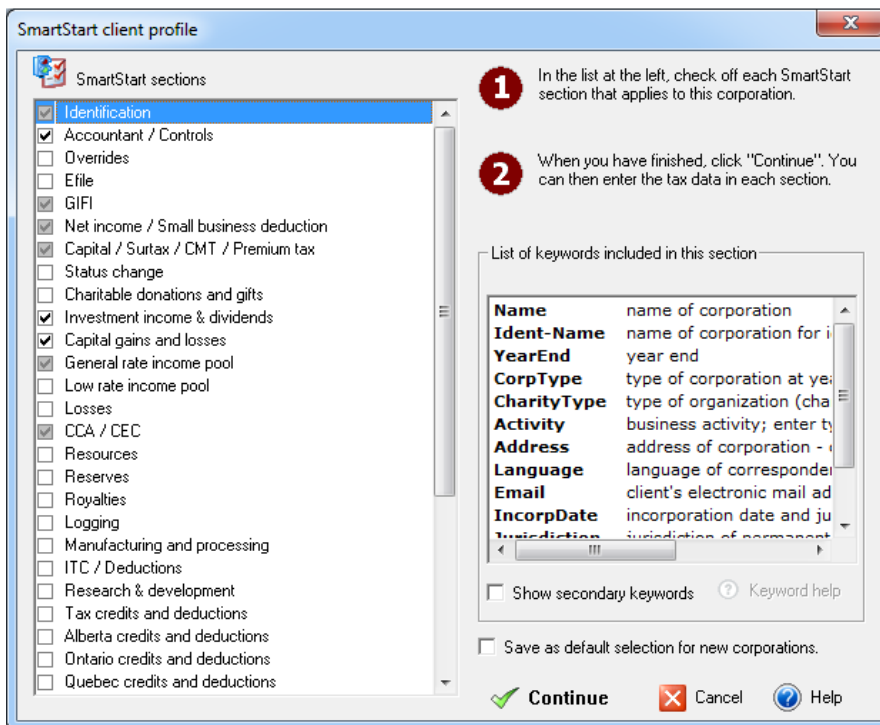

There are 3 ways of adding keywords within your client's Data Entry.

SmartStart Client Profile

To access the SmartStart Client Profile, you can click on the **SmartStart client profile** icon, or press **ALT-F3**.

A new window will appear, allowing you to pick sections that are pertinent to your client's tax return.

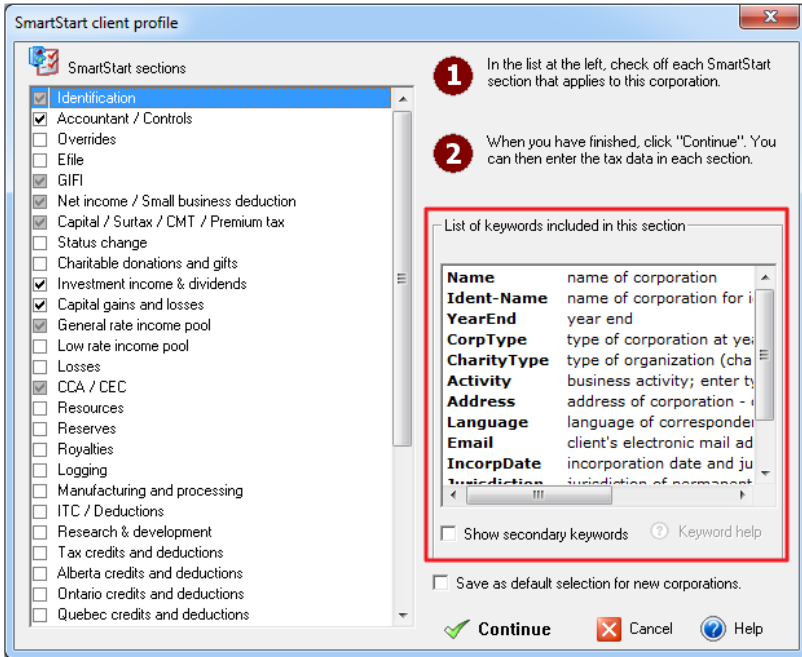

All keywords that are located within the Data Entry screen are grouped into the **SmartStart sections**. Simply select the pertinent sections to your client's tax return, and DT Max will add the appropriate keywords for you.

THOMSON REUTERS™

When selecting a section on the left, DT Max will show you the keywords that belong within that section on the right.

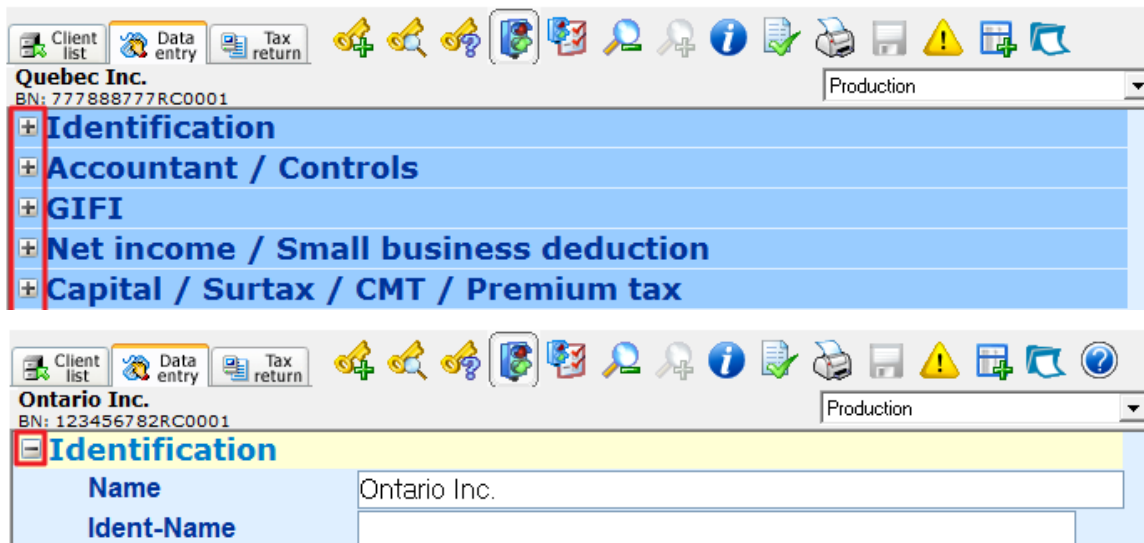

After making your selections, you can save those selections as a default for any upcoming new corporations.

Click on **Continue**, and DT Max will add the sections you have selected into your client’s Data Entry.

Expand the sections by simply clicking on the “+” symbol to the left of the section header. Complete the appropriate keyword accordingly.

Manual Entry of keywords

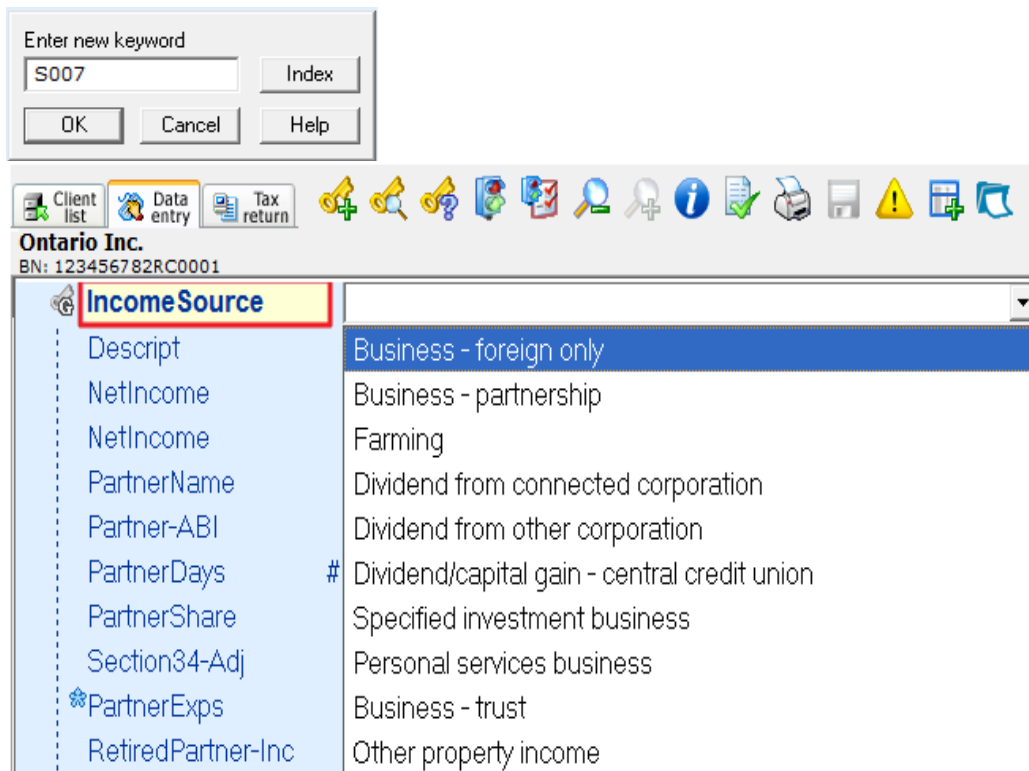

To manually enter keywords into the Data Entry, simply click on the **Add keyword** icon, or press **F11**.

A new window appears allowing you to enter a keyword directly.

A small dialog box titled 'Enter new keyword'. It features a text input field that is currently empty. To the right of the input field is an 'Index' button. Below the input field are three buttons: 'OK', 'Cancel', and 'Help'.

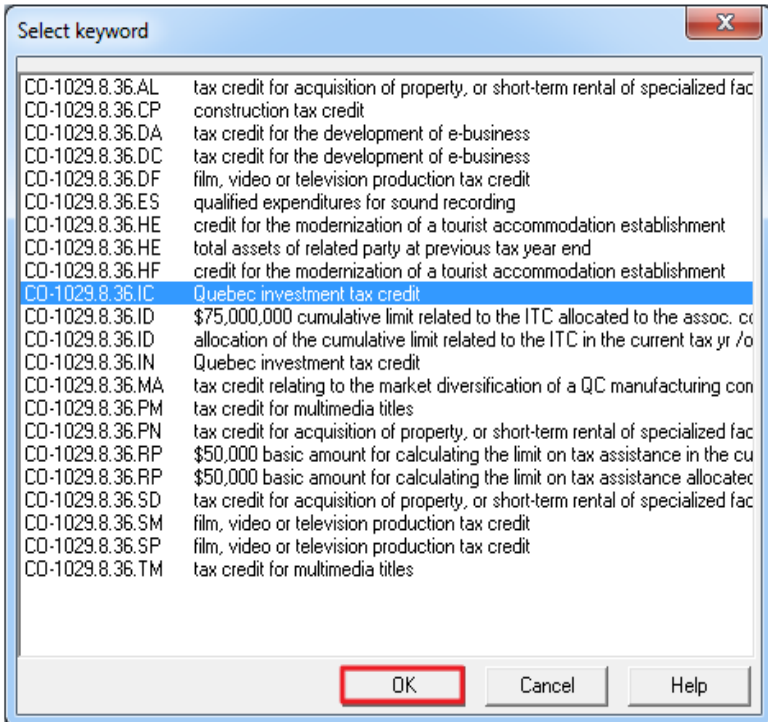

There are several types of keywords you can enter. You can enter the schedule number directly as a keyword. For example, if you enter **S007**, DT Max will take you to keyword **IncomeSource**, and select the type of income from the drop-down menu.

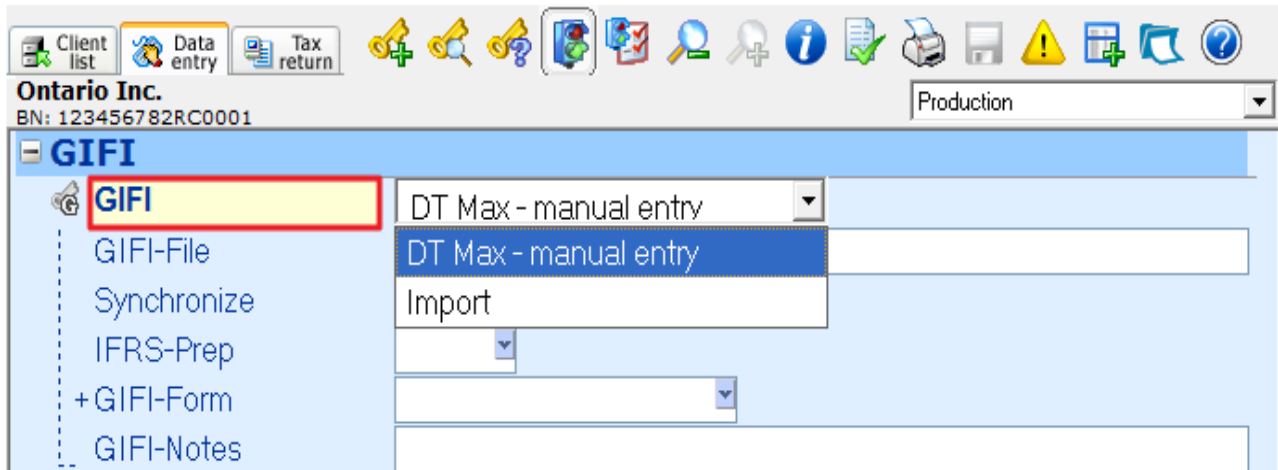

You can enter form numbers directly as a keyword. For example, you can enter **CO-1029.8.36** as your keyword.

A screenshot of the 'Enter new keyword' dialog box. The text input field now contains the form number 'CO-1029.8.36'. The 'Index', 'OK', 'Cancel', and 'Help' buttons are visible below the input field.

In the new window, choose the appropriate keyword from the list then click **OK**. DT Max will add the keyword in the data entry screen.

You can enter broad descriptions as keywords. For example, you can enter **GIFI** as your keyword.

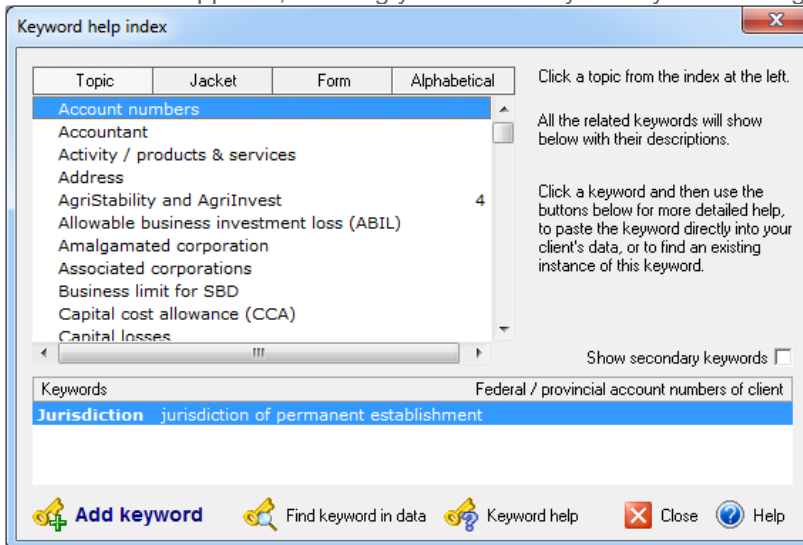

Keyword Help Index

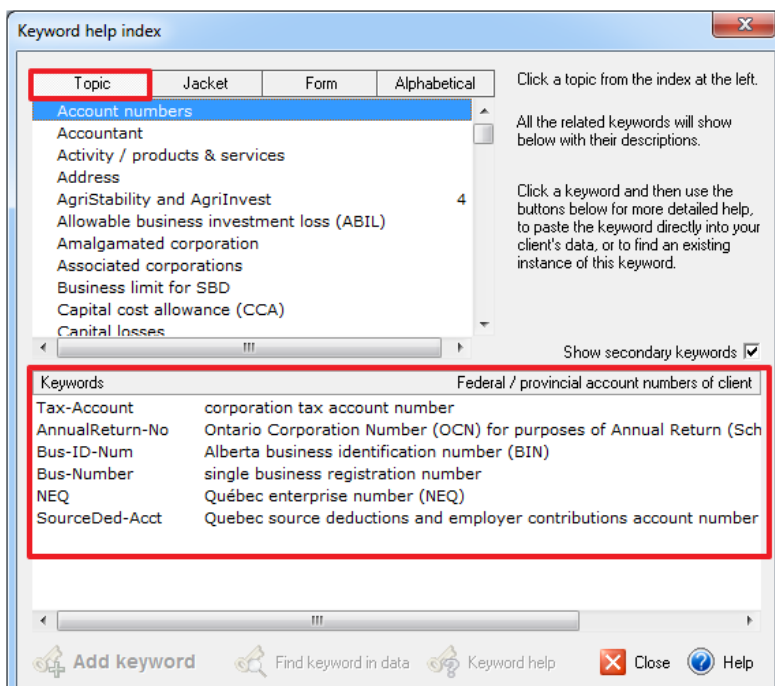

To access the Keyword Help Index, click on the **Keyword Help Index** icon, or press **F8**.

A new window appears, allowing you to search your keyword through several methods.

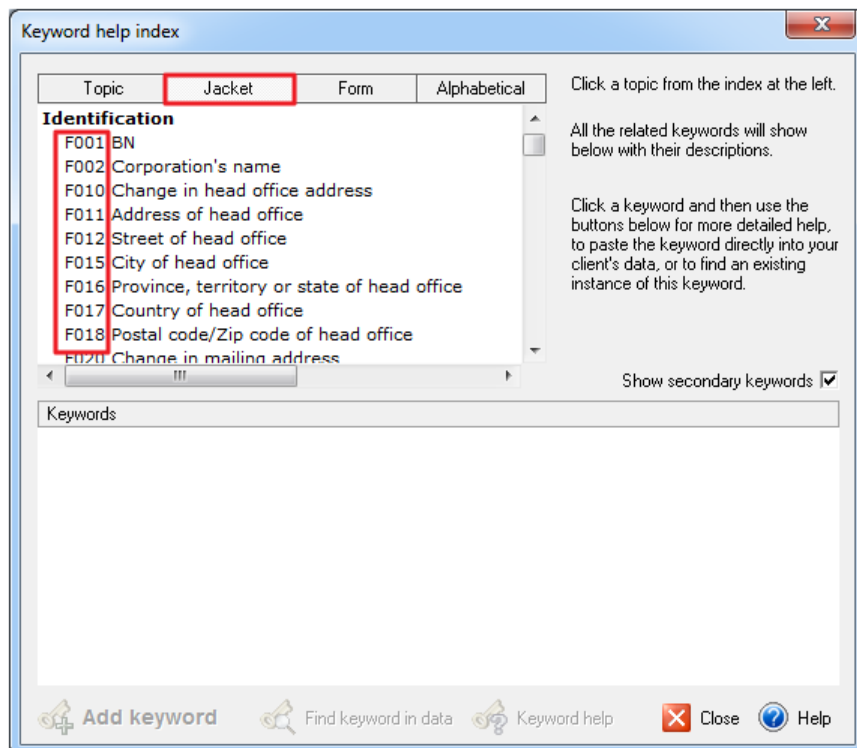

When you click on the **Topic** tab, DT Max presents you with various topics or subjects that you can choose from in order to locate the keyword you need. Once you find the topic that is suitable, select it, and DT Max will present to you a list of keywords you can use. Double-click on the keyword you need, and DT Max will add it to the client's Data Entry.

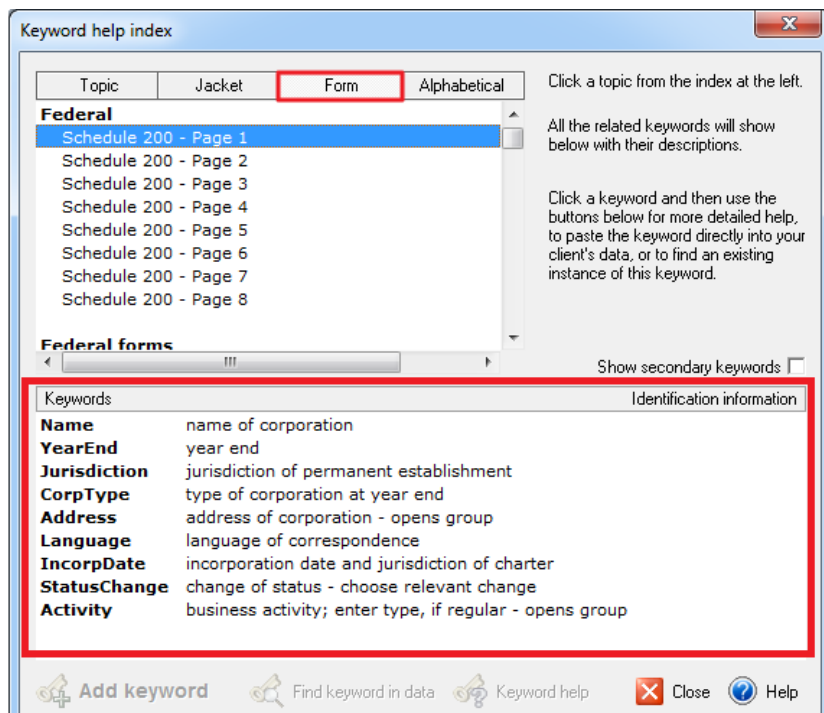

THOMSON REUTERS™

When you click on the **Jacket** tab, DT Max presents you with all the line numbers that are located on the tax return for both the Federal and Quebec returns. Click on a specific line number, and DT Max will present to you a list of keywords you can use to enter an amount on that specific line. Double-click on the keyword you need, and DT Max will add it to the client's Data Entry.

When you click on the **Form** tab, DT Max presents to you all the forms of the tax return that it calculates. Select a specific form from the list, and DT Max will present you with a list of keywords you can use to enter information on that specific form in the client's tax return. Double-click on the keyword you need, and DT Max will add it to the client's Data Entry.

Fields marked with an asterisk

Fields marked with an asterisk require mandatory or important information.

All fields marked with red asterisks (*) are mandatory fields. The field cannot be left blank because it will prevent the calculation of the tax return.

DT Max will generate an error message marked with a red circle in the **Error and warning messages window**. (See section **Errors and Warnings messages**)

Fields marked with blue asterisks (*) require important information for the production of the income tax return.

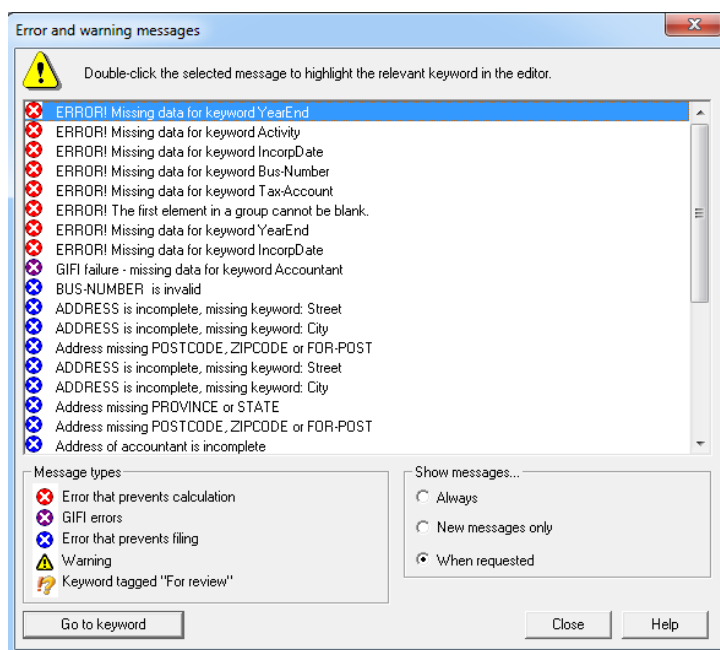

If information is missing, a blue error message will appear in the **Error and warning messages window**. (See section **Errors and Warnings messages**)

Error and Warning messages

In order to view any errors or warnings you may have in your client's file, click on the **Error and warning messages icon**.

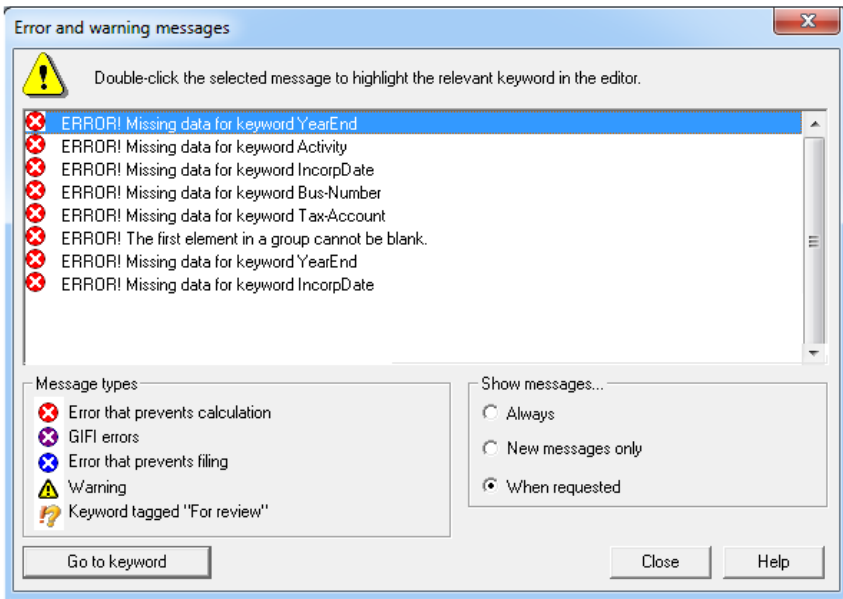

A new window appears showing you messages of required entries which are missing in the client's file or errors made in the Data Entry.

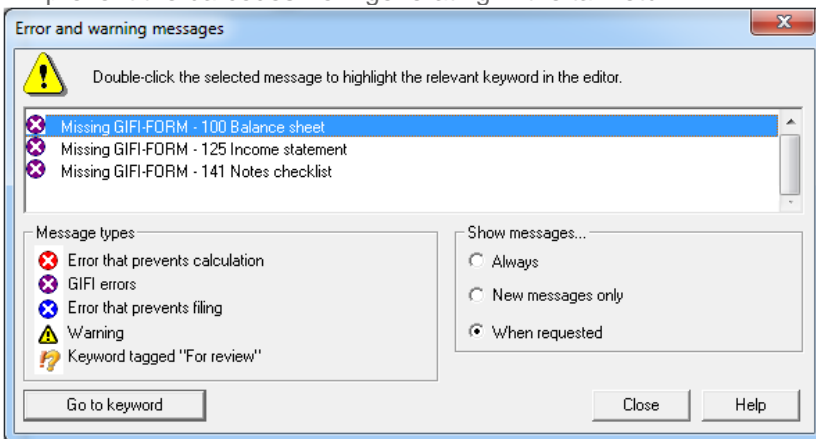

THOMSON REUTERS™

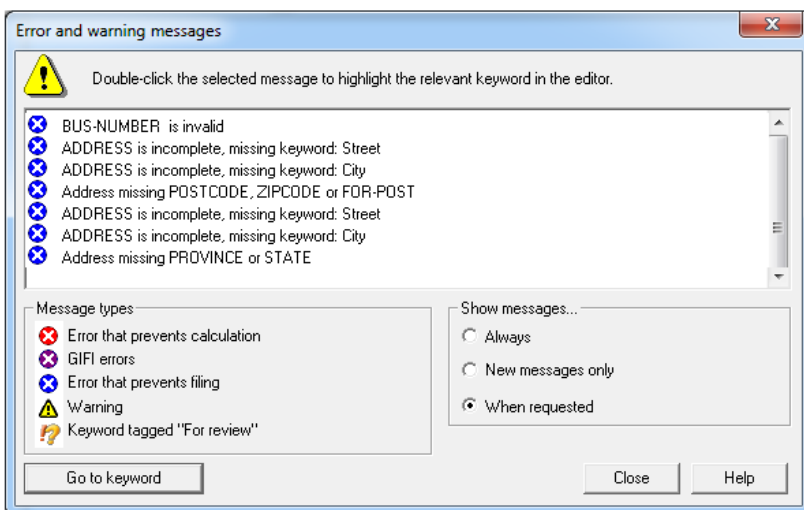

Error messages that are indicated in red prevent you from calculating and viewing the client's tax return.

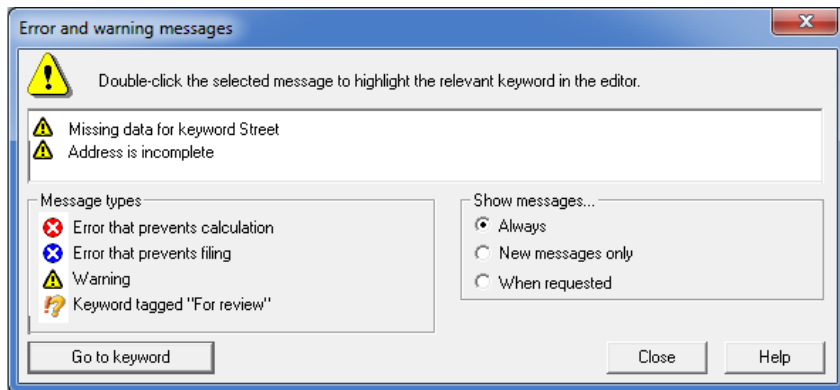

Errors messages in purple are errors from the GIFI (General Index of Financial Information). These error messages will prevent the barcodes from generating in the tax return.

The error messages in blue will prevent the production of the tax return and the barcode return from generating in the tax return screen.

Error messages that are in yellow are warnings that do not prevent you from calculating your client's tax return. However, these messages might prevent you from E-filing the client's tax return.

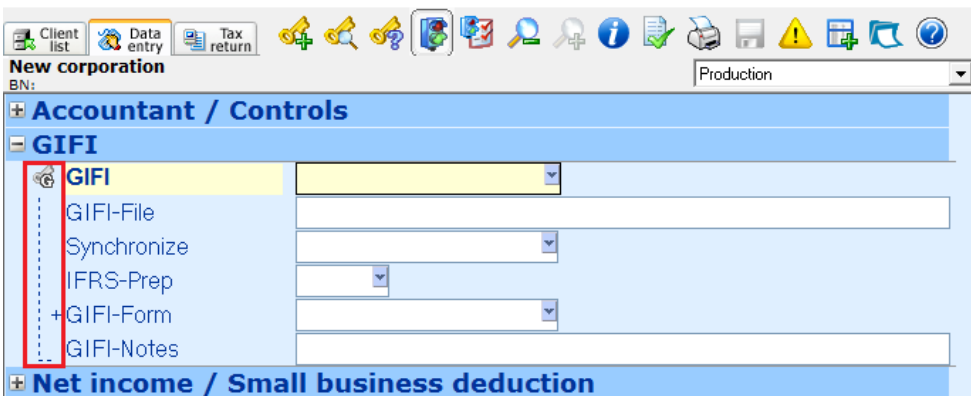

In order to correct an error message, simply double-click on the message itself, and DT Max will direct you to the keyword that you have to complete or correct.

Keyword Groups

Most keywords entered within DT Max are part of what is called a **Keyword Group**. The keyword group starts with a keyword that is in bold, which is called the **Main keyword of the group**. It is delineated by a bracket to the left of the keyword group.

To the left of the Main keyword, you have the **Expand** icon. Click on this icon to expand or close a specific keyword group.

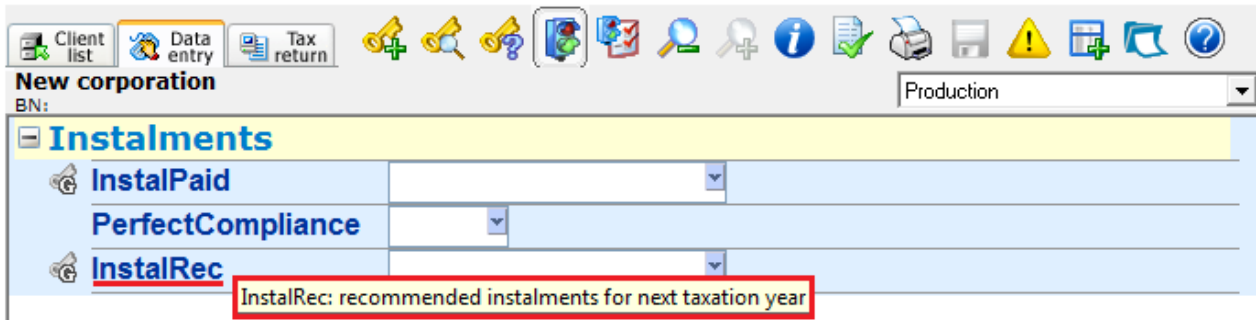

Expanding a keyword group allows you to see the **Secondary keywords** within the group. A keyword group has been expanded when the bracket delineating the group is jagged.

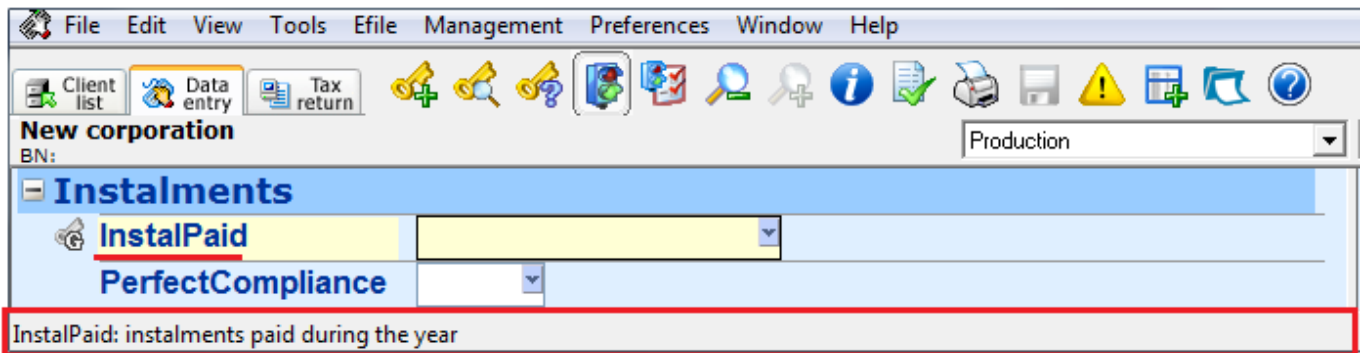

When completing a keyword group, **you must always complete the Main keyword of the group before completing the Secondary keywords**. If you do not follow this rule, DT Max will indicate an error message that will prevent you from recalculating (first element of the group cannot be blank).

Keyword explanation (functionality)

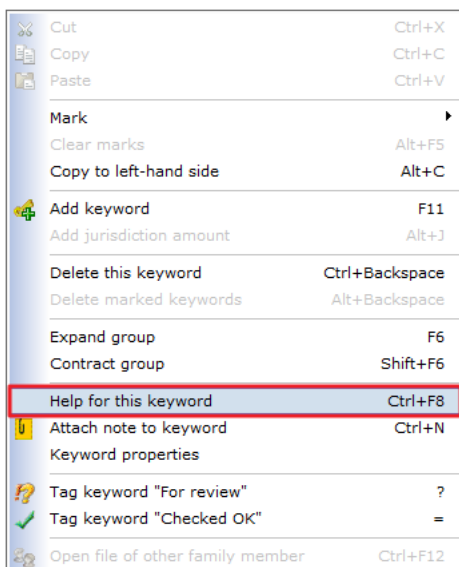

When encountering a confusing keyword, there are several ways of finding out the functionality of the keyword. Hover your cursor over a specific keyword, and DT Max will give you a brief description underneath the cursor, that describes what the keyword does.

If you are already on the keyword (highlighted in yellow), look at the bottom task bar of the program. DT Max will give you a brief description of the functionality of the keyword.

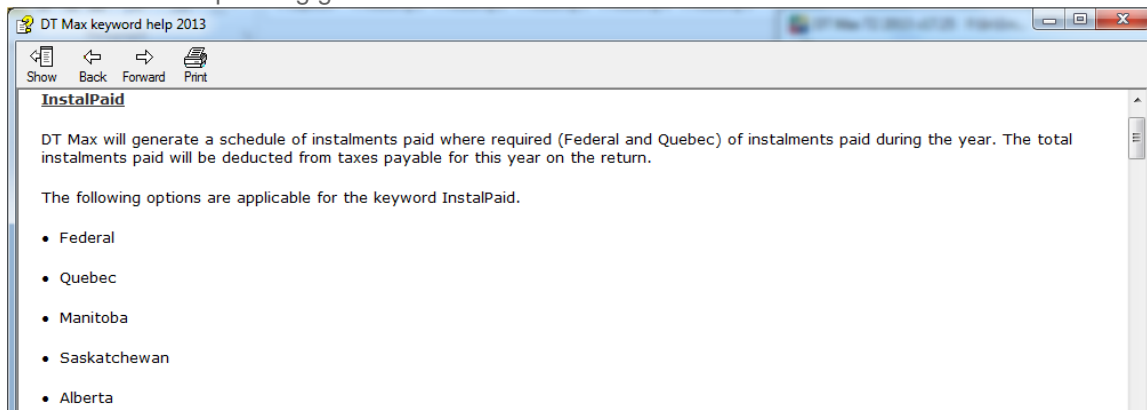

A more detailed way of finding out the functionality of a specific keyword is to right-click on the keyword, and select **Help for this keyword**. You can also press **CTRL-F8** on your keyword.

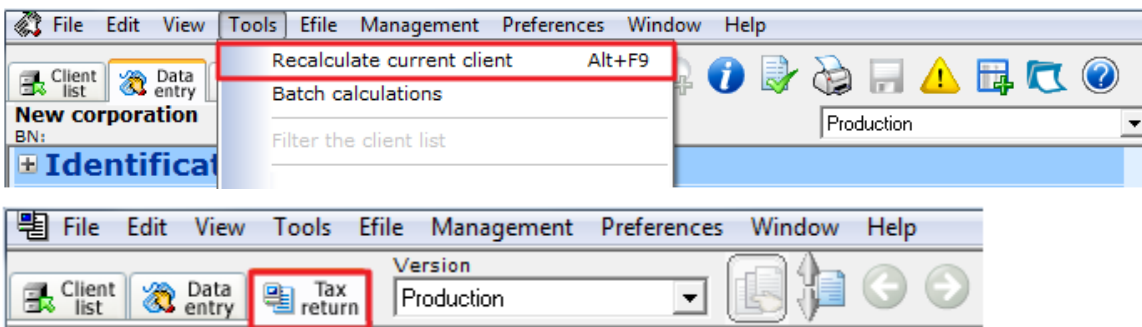

THOMSON REUTERS™

A new window will appear, giving a more detailed explanation on the functionality of the keyword and, if relevant, links to the corresponding government documentation.

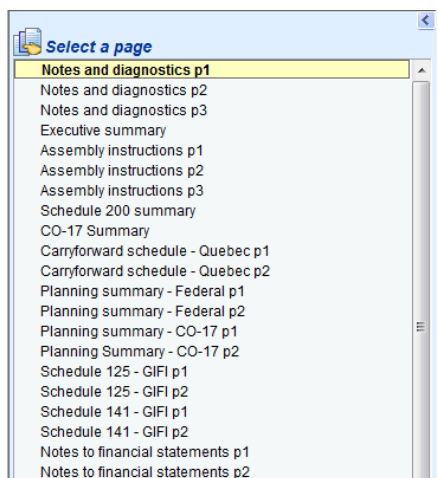

TAX RETURN SCREEN

Once you have completed the Data Entry of your client and you have cleared all the error and warning messages, you are now ready to view the tax return. DT Max will produce the entire tax return based on the entries you have made in the Data Entry. Simply click on the **Tax Return** tab to view the tax return. You can also go to the **Tools** menu, and select **Recalculate current client**, or press **ALT-F9**.

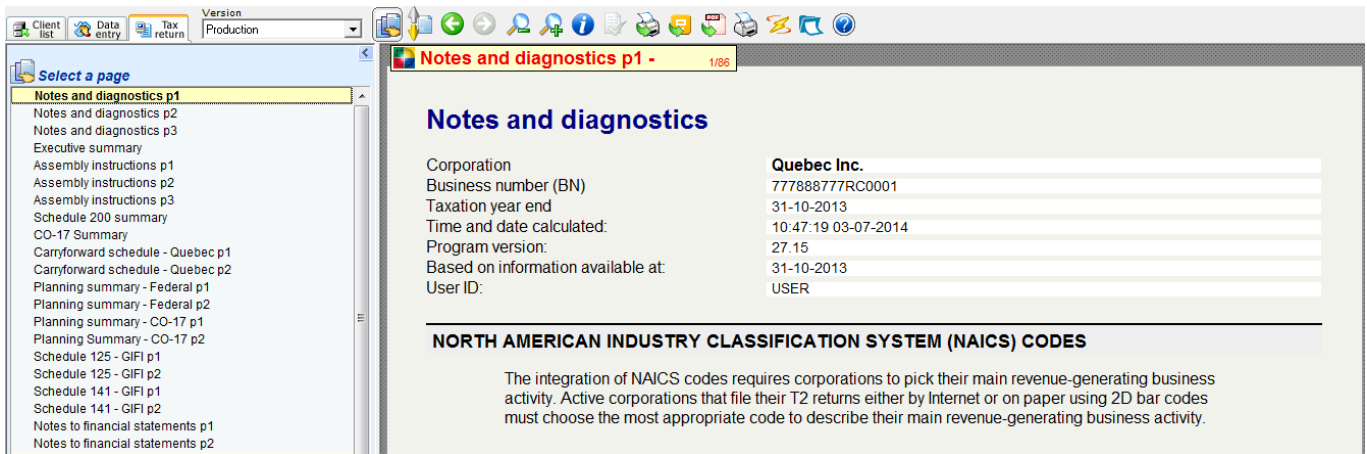

Page Index

On the left-hand side of the screen you will see the menu **Select a page**. In this section you will see all the forms required to file the client's tax return as well as the calculation sheets and in house forms used to generate the return.

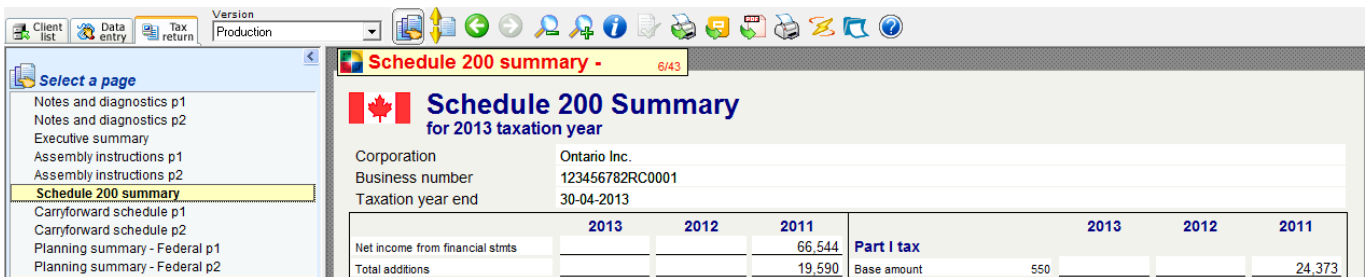

By clicking on a form, DT Max will display the completed form on the right-hand side of the screen.

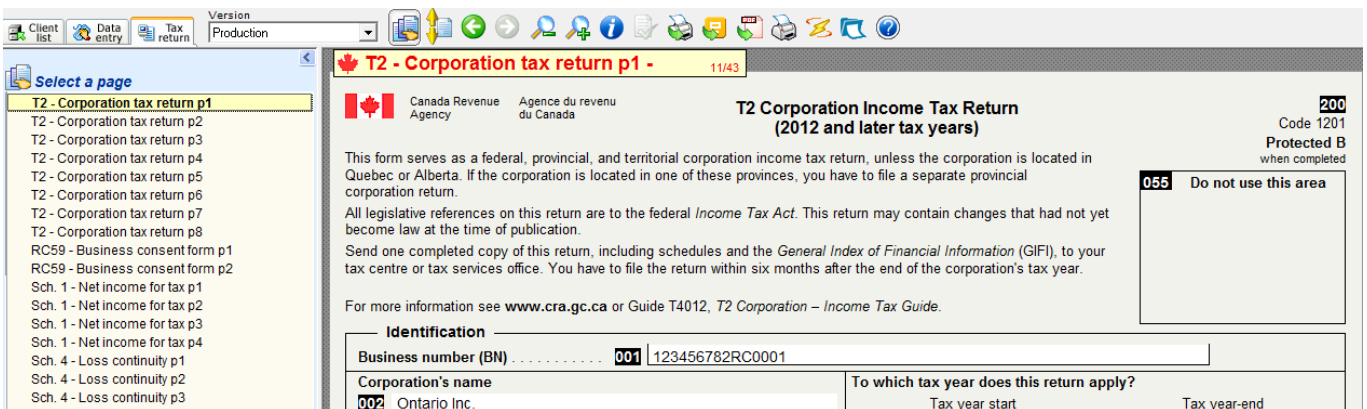

The forms listed in the Page Index are colour coded.

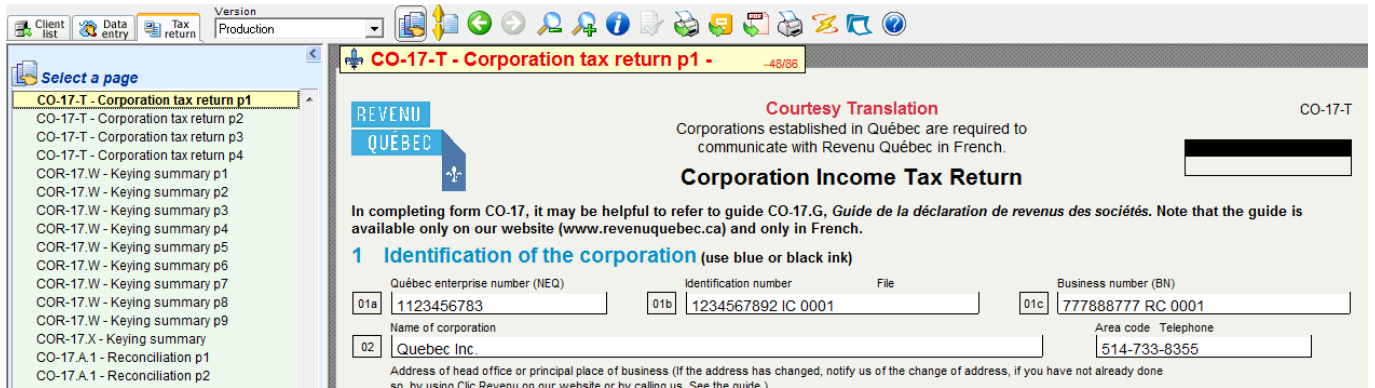

Forms that are shown in grey are **in-house forms**. These are not official government forms. These are forms created by DT Max to give you additional information on your client's return. These include summaries and other calculations that are not found on the tax return.

Forms that are shown in beige are the reproduction of the **official Federal forms**. These forms are completed by DT Max based on the entries in the client's data entry. They include the tax return, schedules, and other relevant forms.

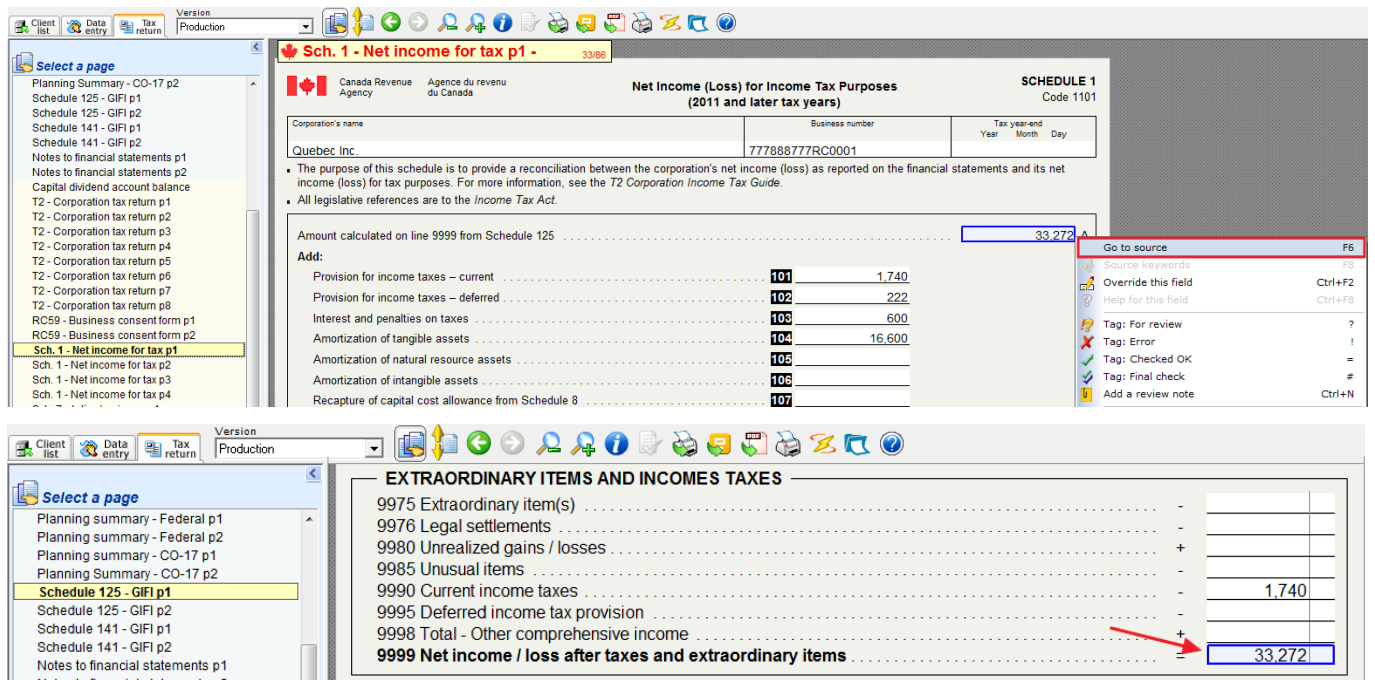

Forms that are shown in green are the reproduction of the **official Provincial forms**, including the Quebec tax return. These forms are completed by DT Max based on the entries in the client's data entry.

QuickTrack feature

DT Max offers a sourcing feature called **QuickTrack**, which allows you to "source" an amount appearing on the tax return by clicking through to the applicable schedules and forms and ultimately the original keyword entry.

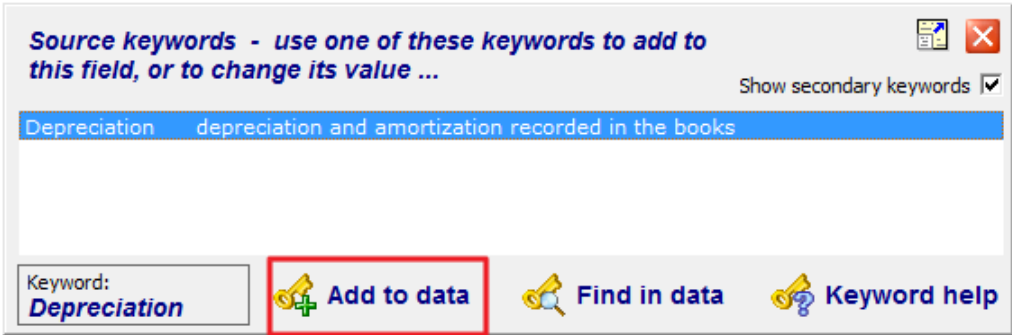

In order to "source" a specific amount on a form to its origin, simply double-click on the amount or right-click it and select **Go to source**. DT Max will take you to the source form where the amount was calculated.

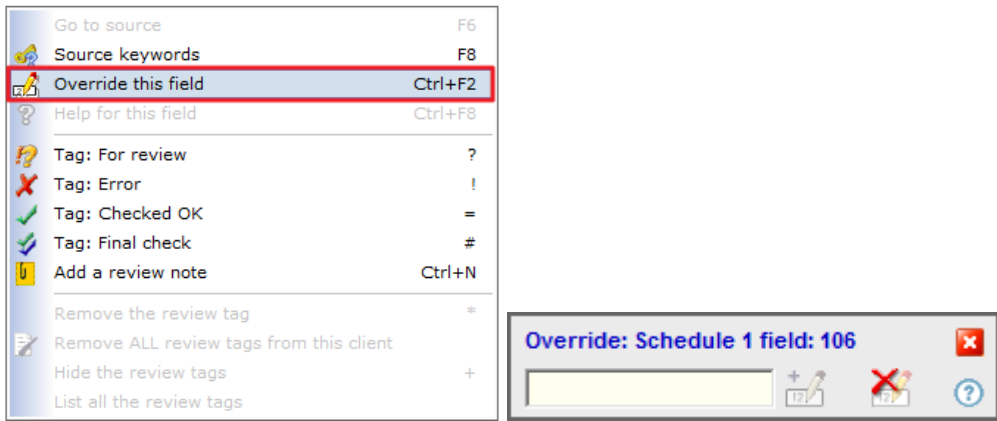

In order to see the source keywords to use for a specific field that is currently blank, simply double-click on the empty field or right-click the field and select **Source keywords**.

A new window will appear with a list of keywords you can use in order to enter an amount within this particular field. Choose the appropriate keyword and select **Add to data**. DT Max will take you back into the Data Entry to the specific keyword that you have selected.

You can also perform field overrides directly on the specific fields using **QuickTrack**. Simply right-click on the field, and select **Override this field**. A new window will appear, allowing you to enter an amount within that field without using the Data Entry.

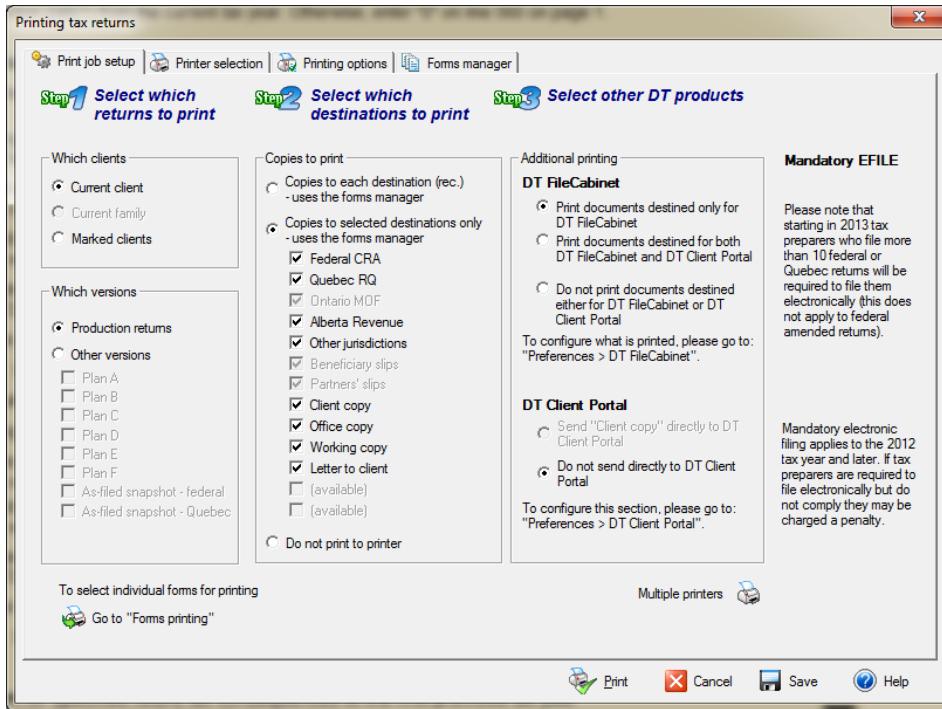

Disclaimer: We strongly discourage the use of field overrides. They can cause calculation errors, and render your client’s tax return ineligible for EFile. Please contact our support department before using any field overrides.

Printing the tax return

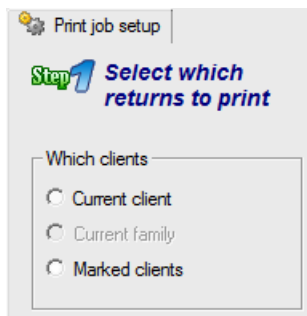

Once you have verified the tax return, you are now ready to print. In order to print the entire return or perform what is called **Production printing**, click on the **Production printing** icon.

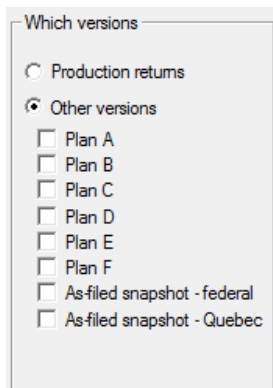

A new window appears, with several options to choose from.

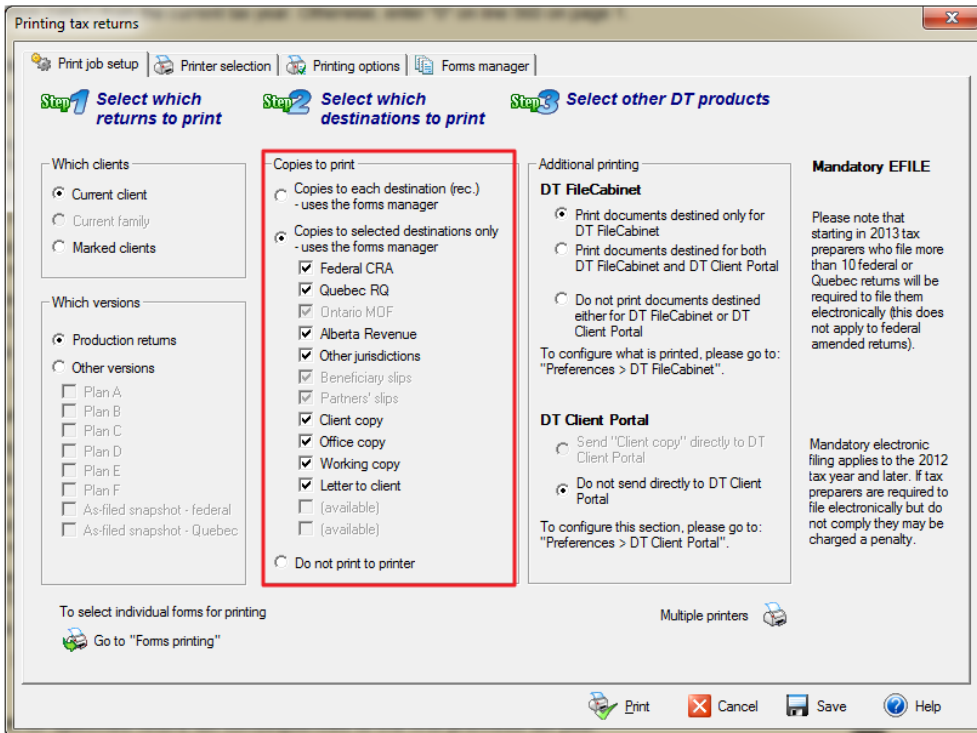

By default, you will be on the **Print job setup** tab. On the left-hand side, under **Step 1**, choose the clients you want to print. Your choices are current client or marked clients.

Below, choose which versions of the tax return you want to print: the Production or the Plans (Plans will be discussed in a later chapter)

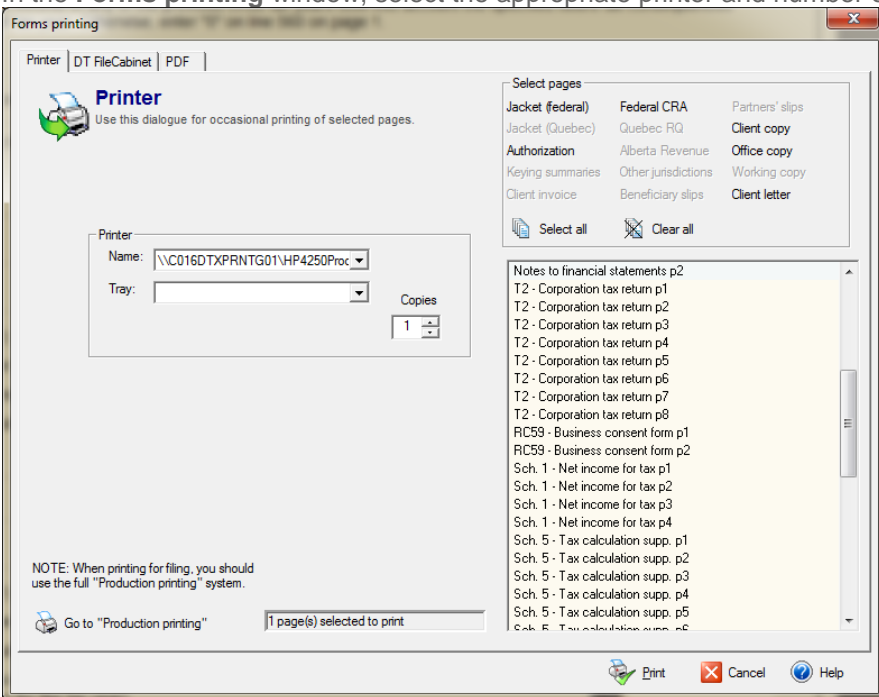

On the right, under **Step 2**, choose which copies to print. You can print all destinations from the **Forms Manager** or select the specific ones you want to print (Forms Manager will be discussed in a later chapter).

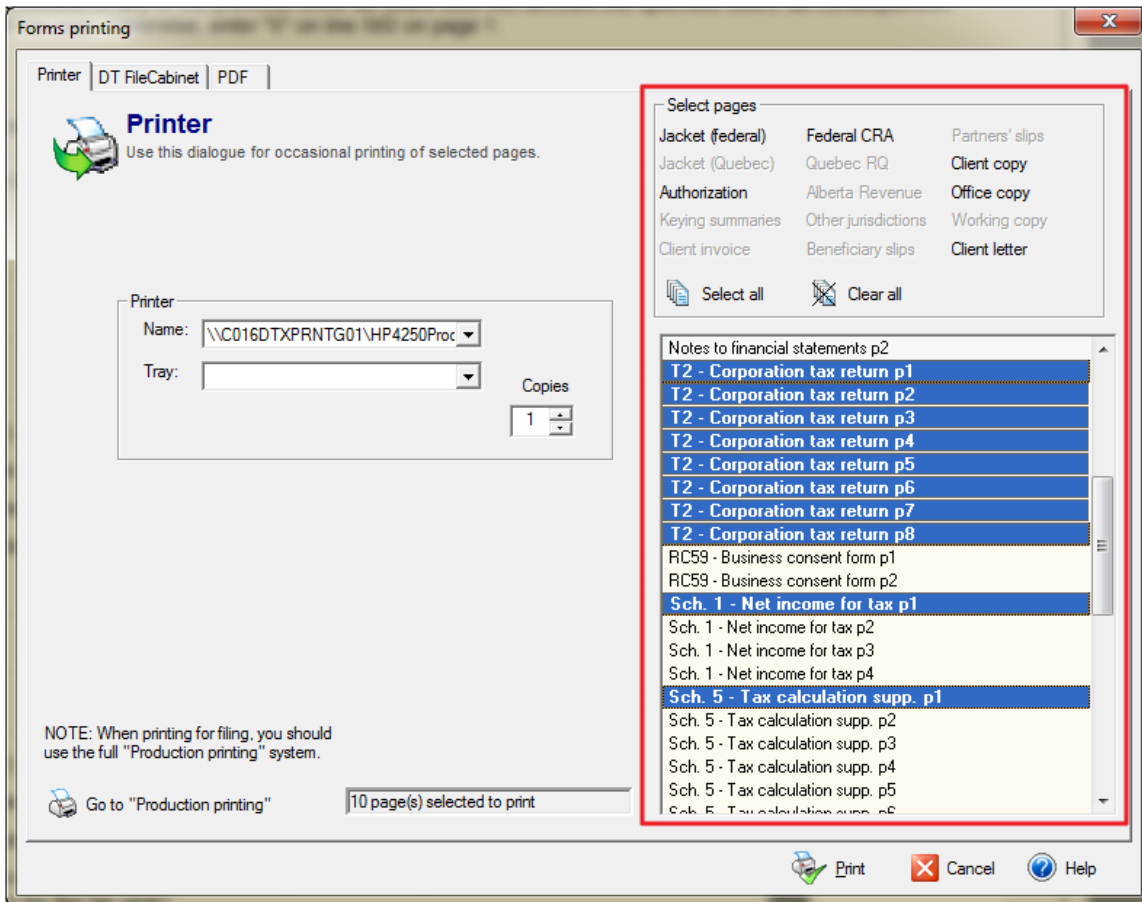

You may also choose to print a selection of pages rather than doing a full production printing. To print selected pages only, click the **Select pages to print** icon.

In the **Forms printing** window, select the appropriate printer and number of copies to print in the **Printer** section.

In the **Select pages** section, all relevant forms for your client will be listed. Select the page(s) you wish to print and click **Print**.

Tip: You may choose to select the pages one at a time by holding down **CRTL** on your keyboard and clicking the corresponding pages from the list.

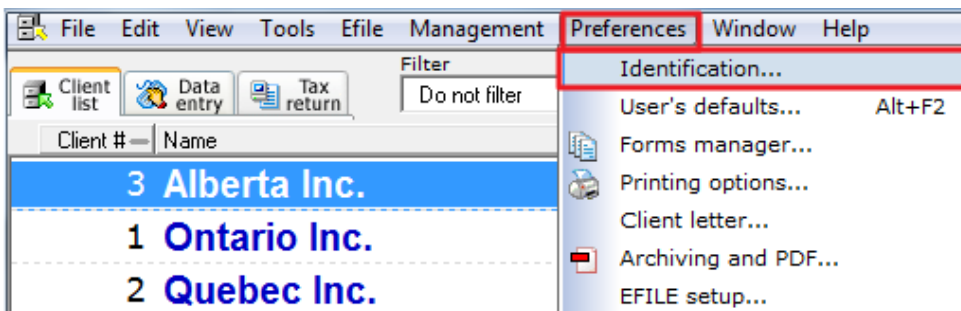

PREFERENCES MENU

The Preferences menu is the place where you can setup DT Max to perform automatic tasks for you. In the DT Max Basics section, we will see the items you should setup at the beginning of every year before starting any files.

Identification

The Identification section is the place where you will enter your identification information as a tax preparer. DT Max will automatically complete the relevant authorization forms for all your clients in the Client List.

In order to set this up, go to the **Preferences** menu and select **Identification**.

THOMSON REUTERS™

In the first tab, **Main name and address** enter the identification information of your firm.

The screenshot shows a dialog box titled "Tax preparer identification" with three tabs: "Main name and address", "Alternate name and address", and "Identification numbers". The "Main name and address" tab is selected and highlighted with a red box. The form contains the following fields:

- Company name (text input)
- Street (text input)
- City (text input)
- Province (dropdown menu, currently showing "Quebec")
- Postal code (text input)
- Country (text input, currently showing "Canada")
- Contact person: Mr. Mrs./Miss
- First name (text input)
- Last name (text input)
- Title or position (text input)
- Phone number (text input)
- Extension (text input)
- Fax number (text input)
- Email address (text input)

At the bottom of the dialog box are three buttons: "Save" (with a floppy disk icon), "Cancel" (with a red X icon), and "Help" (with a blue question mark icon).

In the second tab, **Alternate Address**, enter an alternate address you can use for certain tax returns. To activate this address in a particular tax return, use the keyword **FIRM-ADDRESS**, and select **Alternative address** in the client's Data Entry.

The screenshot shows the same "Tax preparer identification" dialog box, but with the "Alternate name and address" tab selected and highlighted with a red box. The form contains the same fields as the first tab, plus an additional field:

- When to use alternate name and address (Use keyword FIRM-ADDRESS to override this choice.) (dropdown menu, currently showing "Never - always use 'Main name and address'")

The "Save", "Cancel", and "Help" buttons are also present at the bottom.

In the third tab, **Identification numbers**, enter all of your pertinent identification numbers that identifies your tax preparation practice. At the bottom left of the window, enter the relevant ID numbers needed for the RC59. Click **Save** once you are done.

The screenshot shows the 'Tax preparer identification' dialog box with the 'Identification numbers' tab selected. The dialog is divided into several sections for entering tax-related information:

- Main name and address / Alternate name and address / Identification numbers** (selected tab)
- Business number**: Text input field.
- Trustee in bankruptcy number**: Text input field.
- Goods and services tax information**:
 - GST/HST registration number**: Text input field.
 - GST/HST rate**: Text input field with '13' and a '%' sign, and a checkbox for 'Use HST'.
- Provincial sales tax information**:
 - PST registration number**: Text input field.
 - PST rate**: Text input field with '0' and a '%' sign, and a checked checkbox for 'Apply GST before applying PST'.
- Quebec enterprise number (NEQ)**: Text input field.
- Quebec identification number**: Text input field with 'IC 0001'.
- RC59**:
 - RepID**: Text input field.
 - GroupID**: Text input field with 'G'.
 - Name of group**: Text input field.
- MR-69**:
 - RepID**: Text input field.
 - Social insurance number**: Text input field.

At the bottom, there are three buttons: **Save** (highlighted with a red box), **Cancel**, and **Help**.

User's Defaults

The **User's Defaults** section is the place where you can choose defaults for all your clients. Through this section, you can have DT Max automatically complete certain areas of your clients' tax returns. Moreover, you can setup technical defaults as well, such as your range of client numbers and a verification system.

In order to access this section, go to the **Preferences** menu, and select **User's Defaults**.

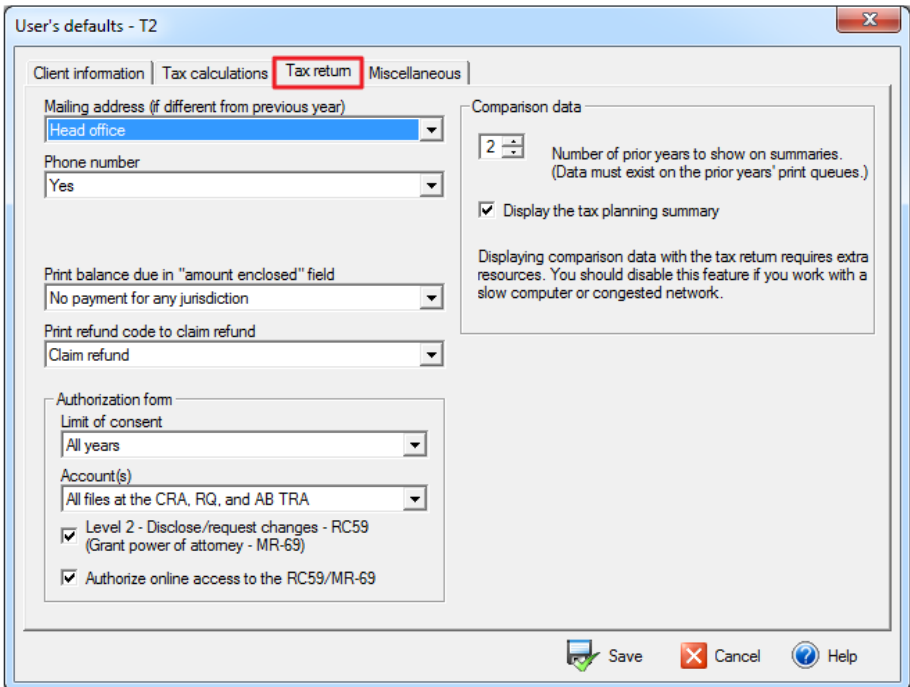

The first tab is the **Client information** tab. Within this tab, you can select the default province of residence, city, and language of correspondence for all new clients added to your Client List.

The screenshot shows a window titled "User's defaults - T2" with a close button in the top right corner. The "Client information" tab is selected and highlighted with a red box. Below the tab are four instructions: "These defaults are used when adding a new client to your database." and "Select the values that are appropriate to your location and clients." To the right are three dropdown menus: "Province or territory" (set to "Quebec"), "Language (of client)" (set to "English"), and "Type of corporation" (set to "Cdn controlled private corp."). At the bottom are "Save", "Cancel", and "Help" buttons.

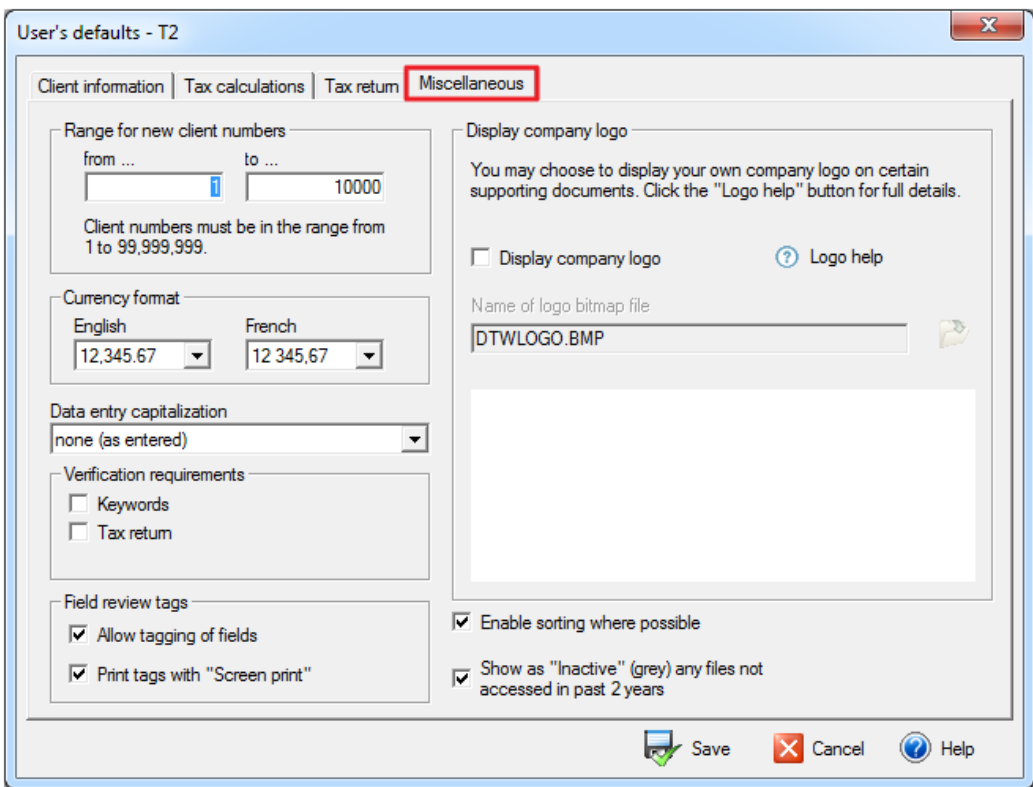

In the **Tax calculations** tab, indicate how you want DT Max to handle the instalment payment calculation.

The screenshot shows the same "User's defaults - T2" window, but the "Tax calculations" tab is selected and highlighted with a red box. The "Calculation of instalments / overpayments" dropdown menu is set to "Previous tax year". Below this are three checkboxes: "Claim ITC refund if possible" (checked), "Optimize provision for taxes" (unchecked), and "Corporation has a perfect compliance history" (checked). At the bottom are "Save", "Cancel", and "Help" buttons.

In the **Tax Return** tab, you can set up fields that DT Max will automatically complete in the client's tax return. You can also set up your defaults for the authorization forms generated within your client's tax return. You can set the limit of consent and the level of authorization you want for all your clients.

In the **Miscellaneous** tab, you can setup other preferences such as the range of client numbers, verification requirements (discussed later on), company logo on the client letter, and enabling sorting.

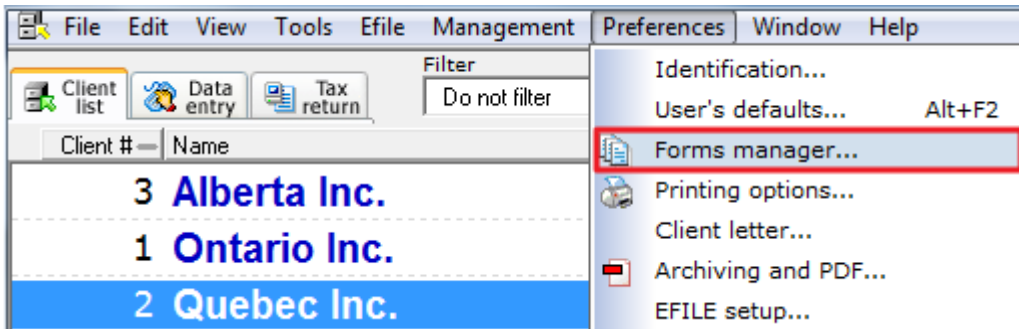

Once you have gone through all the tabs, click **Save** at the bottom of the window, and DT Max will apply this setup to all your clients.

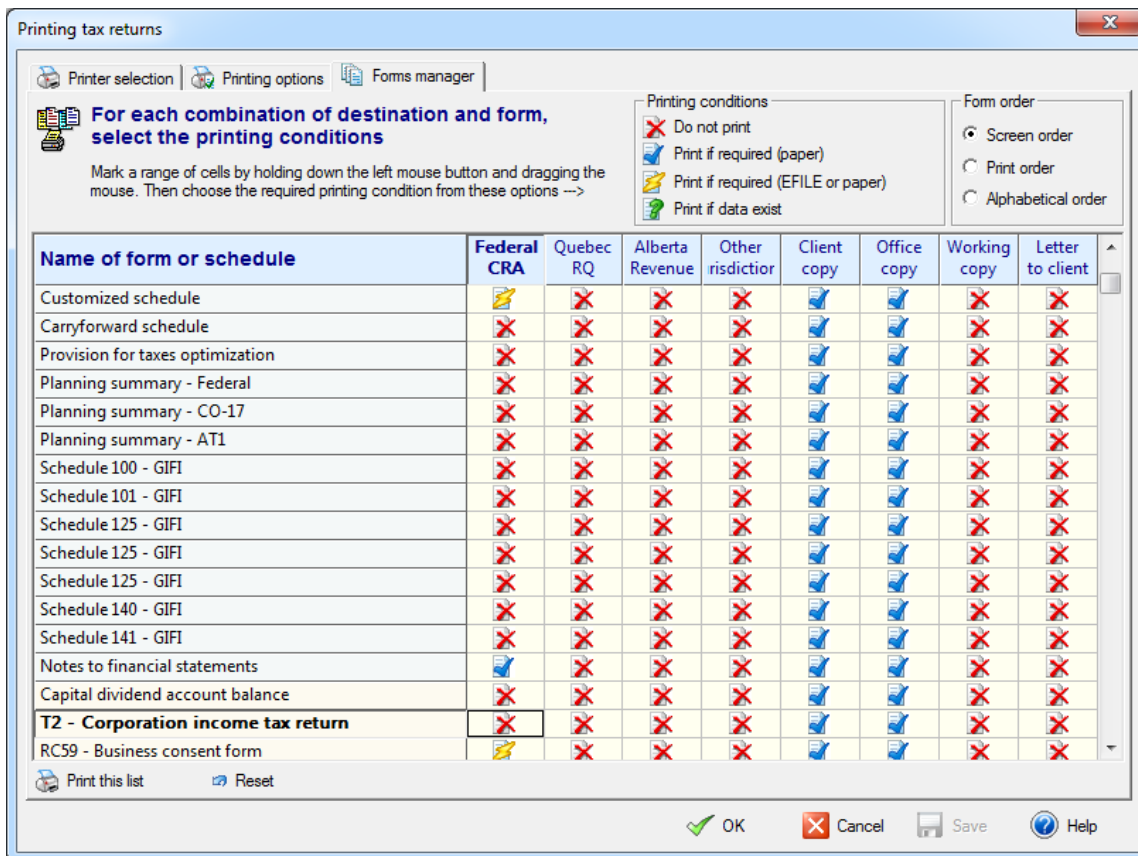

Forms Manager

The **Forms Manager** is the place where you determine what forms will print when you print your client's tax return through **Production Printing**.

To access the **Forms Manager**, go to the **Preferences** menu and select **Forms Manager**.

You will now see a list of forms on the left-hand side of the window as well as columns. Each column represents a **Destination**. In other words, the forms that are printed under a particular column are “destined” for the place indicated in the column header, for example, the client copy.

There are 4 different options to choose from when editing the **Forms Manager**. The options are: **Do not Print**, **Print if required (paper)**, **Print if required (paper or EFile)**, and **Print if data exists**.

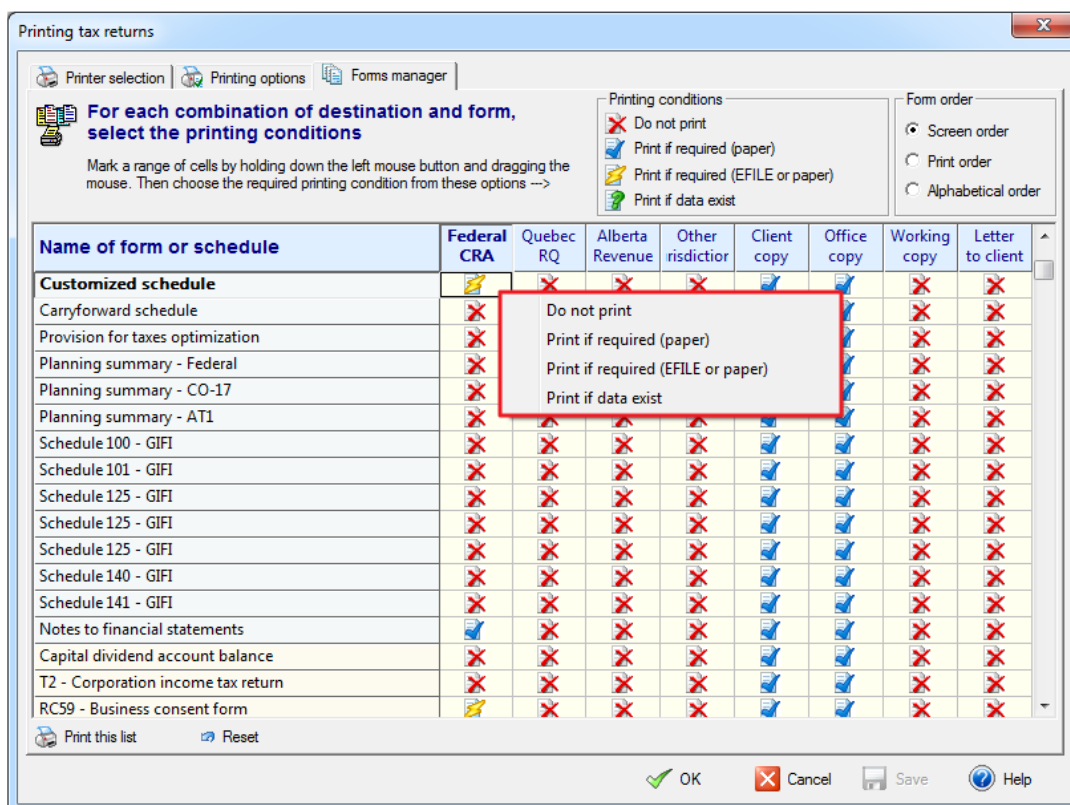

Under the **Federal CRA** and **Quebec RQ Destinations**, choosing **Print if required (paper)** for a specific form means that the form will print IF it is required AND you are paper-filing the client's tax return.

Choosing **Print if required (paper or EFile)** for a specific form means that the form will print IF it is required regardless if you are E-filing or paper-filing your client's tax return.

Under every other **Destination**, choosing **Print if required (paper)** or **Print if required (paper or EFile)** will perform the same task whether you are E-filing or paper filing.

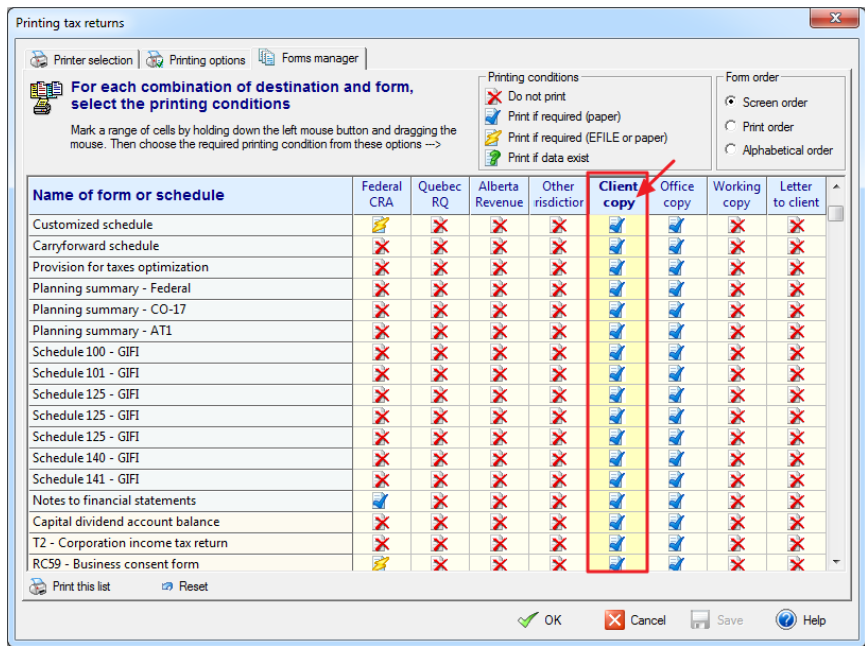

If you choose **Print if data exists** for a specific form, DT Max will print the form not only if it is required to make a complete tax return, but also if it contains any information that may be useful in understanding or verifying the return. This applies to all **Destinations**.

Tip: A quick way of editing the **Forms Manager** is to cancel the printing of all the forms within a **Destination** and then select the forms you wish to print.

In order to do this, click on the **Destination** header. Once clicked, the entire column will be highlighted in yellow.

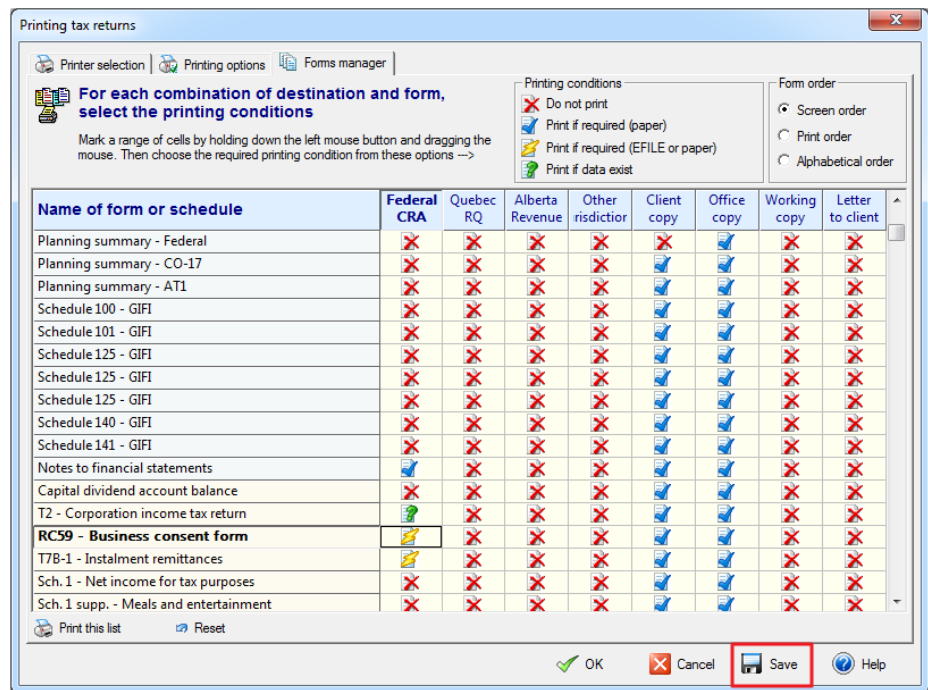

Right click in the highlighted area, and select **Do not print**.

Now pick the forms you would like to print by right-clicking at the intersection of the form and the **Destination**, and choose amongst the 4 different options.

Once you have completed the editing of the **Forms Manager**, click on **Save**. DT Max will now apply your setup to all your clients' returns within the Client List.

It is strongly recommended that you print your **Forms Manager** setup after you have completed the editing. This allows you to have a backup copy of the setup you have performed.

In order to print your **Forms Manager** setup, click on **Print this list**.

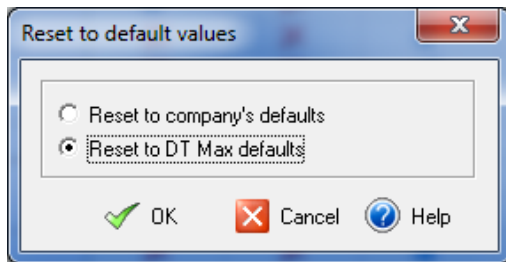

If you make mistakes editing your **Forms Manager**, you can always return to DT Max's default setup.

In order to reset your **Forms Manager**, click on **Reset**.

A new window appears. Select **Reset to DT Max defaults**. Then click **OK**.

DT MAX ADVANCED FEATURES

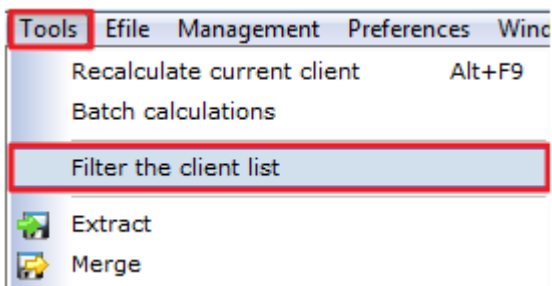

Now that we have seen some basic features of DT Max, we will visit some more advanced features of the program. We will breakup these features amongst DT Max's three screens and the Preferences menu.

CLIENT LIST

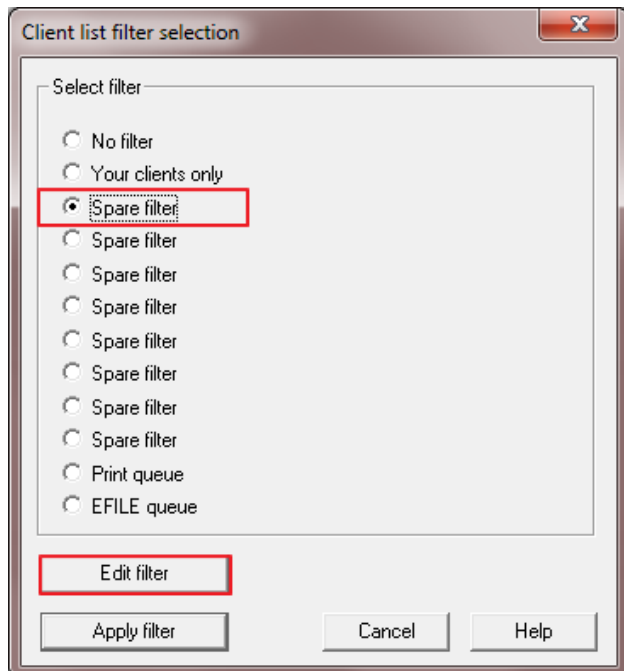

Filtering the Client List

DT Max allows you to filter your Client List in order to find specific clients that meet certain criteria. For example, you can find your clients that have an EFile error in their file, clients for which you used a specific keyword in their Data Entries, etc... These filters are customizable to suit your needs.

In order to set up filters in DT Max, within the Client List screen, go to the **Tools** menu and select **Filter the Client List**.

A new window appears, allowing you to choose amongst available or spare filters. Choose one of the spare filters to customize and click **Edit filter**.

A new window appears, with several customization options to choose from. As a first step, you should always change the name of the filter to what you are trying to find.

The screenshot shows the 'Client list filter' dialog box. The 'Name of filter' field is highlighted with a red box and contains the text 'Spare filter'. The 'Accountant code' field contains an asterisk '*'. Other fields include 'Processing status of client', 'Days since last activity', 'Client birthdays', 'Keywords', and 'Language'. The 'Language' section has radio buttons for 'All clients', 'English only', and 'French only'. The 'OK', 'Cancel', and 'Help' buttons are at the bottom.

You can use one or several filters in combination when filtering your Client List.

Accountant Code

You can filter your Client List by the **Accountant code**, or **User ID**, that is assigned to a specific client. Remove the asterisk and enter the **Accountant code** or **User ID**.

The screenshot shows the 'Client list filter' dialog box. The 'Accountant code' field is highlighted with a red box and contains an asterisk '*'. The 'Name of filter' field contains 'Spare filter'. The 'OK', 'Cancel', and 'Help' buttons are at the bottom.

Processing Status of Client

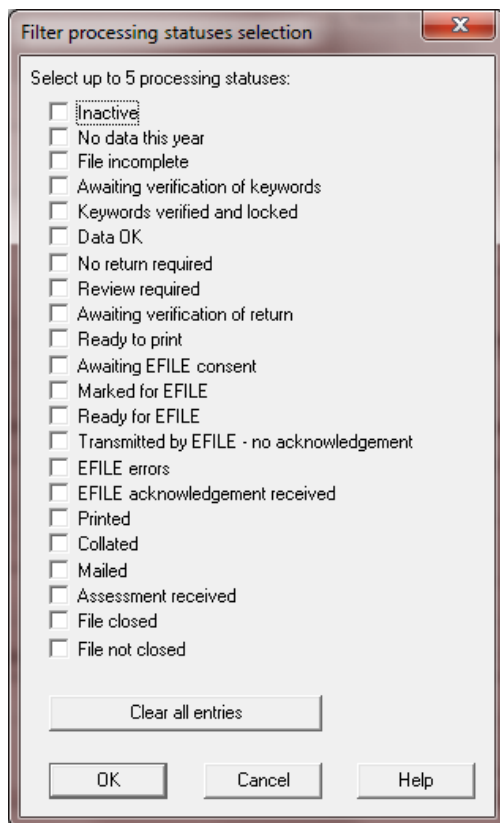

You can filter your Client List based on the **Processing Status** currently assigned to your client's file. The **Processing Status** indicates to you at which point you have reached in the completion of your client's tax return. For example, it will indicate if you have errors in the data entry, if your client's file is eligible for EFile, etc...

In order to activate the processing status filters, click on **Change processing status filters**.

A new window appears, allowing you to select several processing statuses for filtering. You can select up to 5 processing statuses at the same time.

The processing statuses you have chosen will appear in the **Processing Status of Client** section.

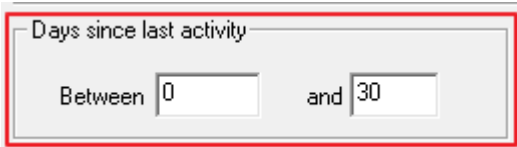

Tip: Your best option when filtering through processing statuses is to only choose one processing status at a time. This will render more precise results when filtering.

THOMSON REUTERS™

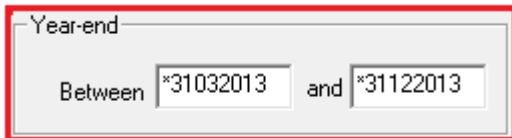

Days since last activity

You can filter your Client List based on the days since you have edited your clients' files. Simply enter a range of number of days, for example from 0 to 30 days, to see which clients you have worked on during the last month.

Year end

You can filter your Client List using the clients' year end date. Enter the date in the following format: *ddmmyyyy*. Enter the range of client year end you want to filter.

Keywords

You can filter your Client List based on the keywords you have entered in the Data Entry. For example, you can enter CCA-Class, and DT Max will find the clients that have capital cost allowance keyword in their Data Entry. You can search up to 4 keywords in one filter

Tip: Your best option when filtering through keywords is to only enter one keyword at a time. This will render more precise results when filtering.

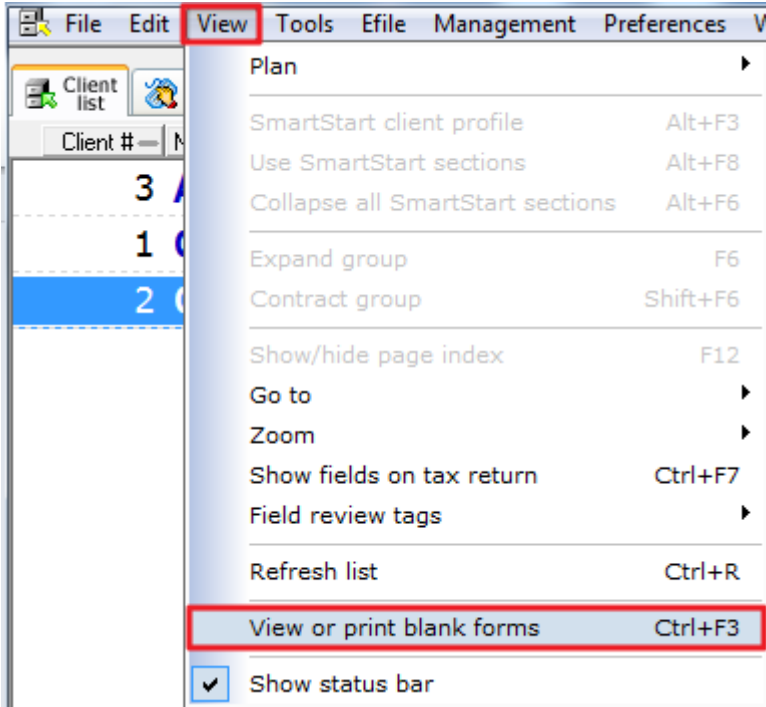

You can also perform reverse filters with the **Keywords** section. Simply add an exclamation mark "!" at the front of the keyword you enter within this section, and DT Max will exclude the clients that have this keyword in their Data Entry.

Calculated Tax Data

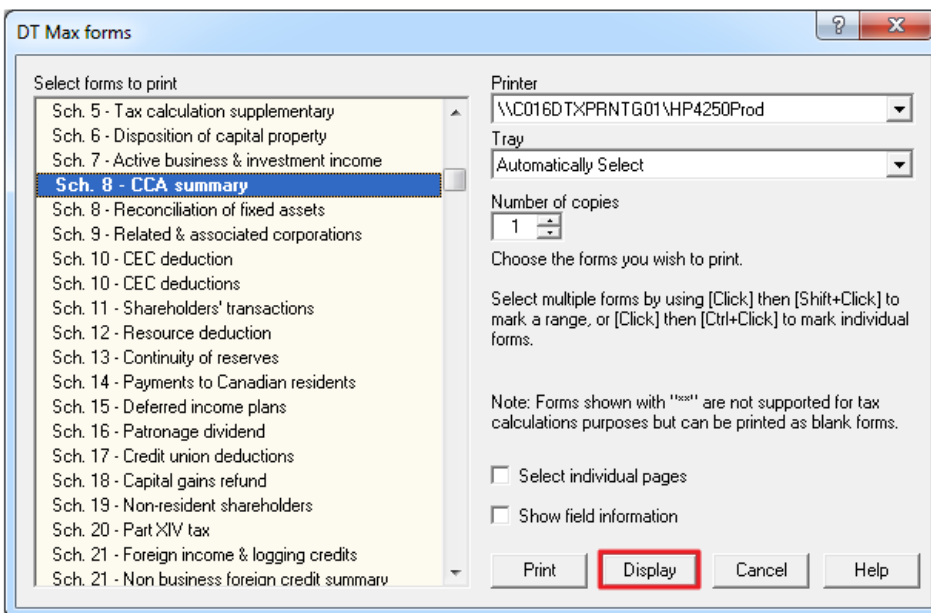

You can filter your Client List based on amounts calculated in the client's tax return. For example, you can find clients that have an amount on a specific line of the tax return.

In order to do so, you must first get the **Field Codes** on the tax return. To view the **Field Codes**, go to the **View** menu and select **View or print blank forms**.

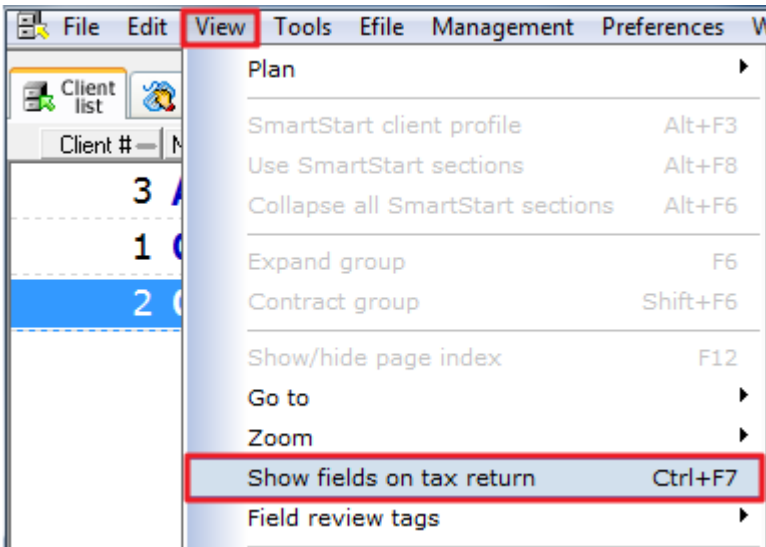

A new window will appear, allowing you to pick any form that DT Max produces and view it on the screen in blank format.

Select the form on which you want to filter a specific field, and click **Display**.

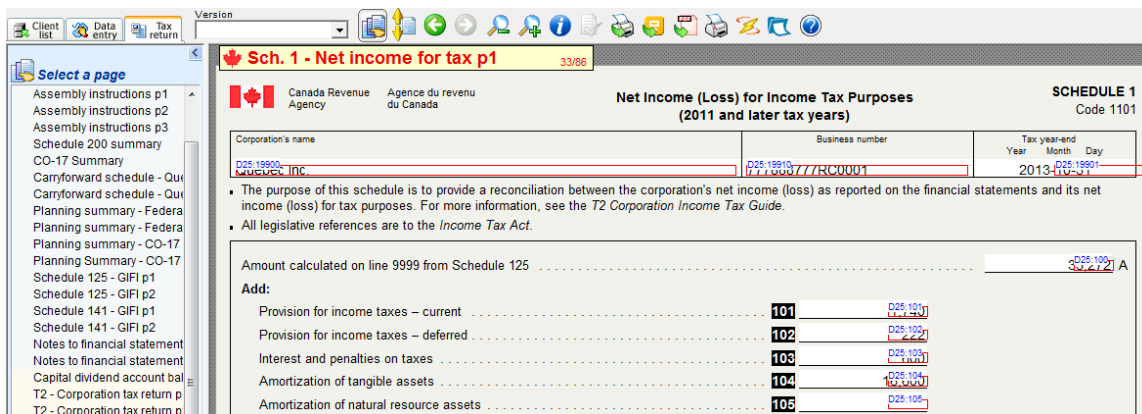

THOMSON REUTERS™

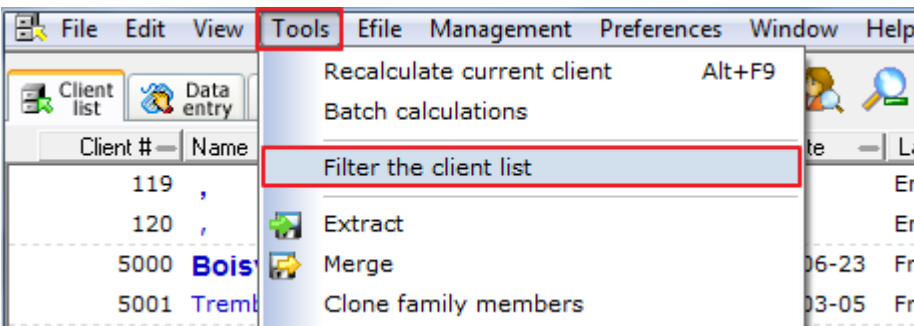

Find the field or line you wish to apply a filter to, then go back to the **View** menu and select **Show fields on tax return**.

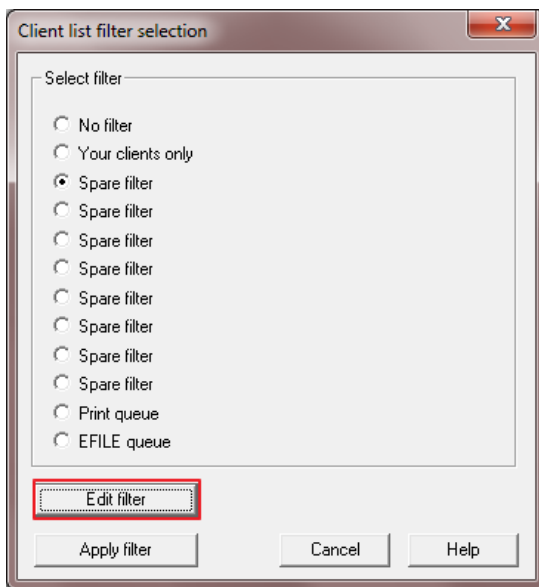

You will notice that field codes will appear within every line of the form you are viewing. You can now either mark down the particular field code you need for use within a filter or you can print the form with the field codes showing and archive these pages for future reference when filtering.

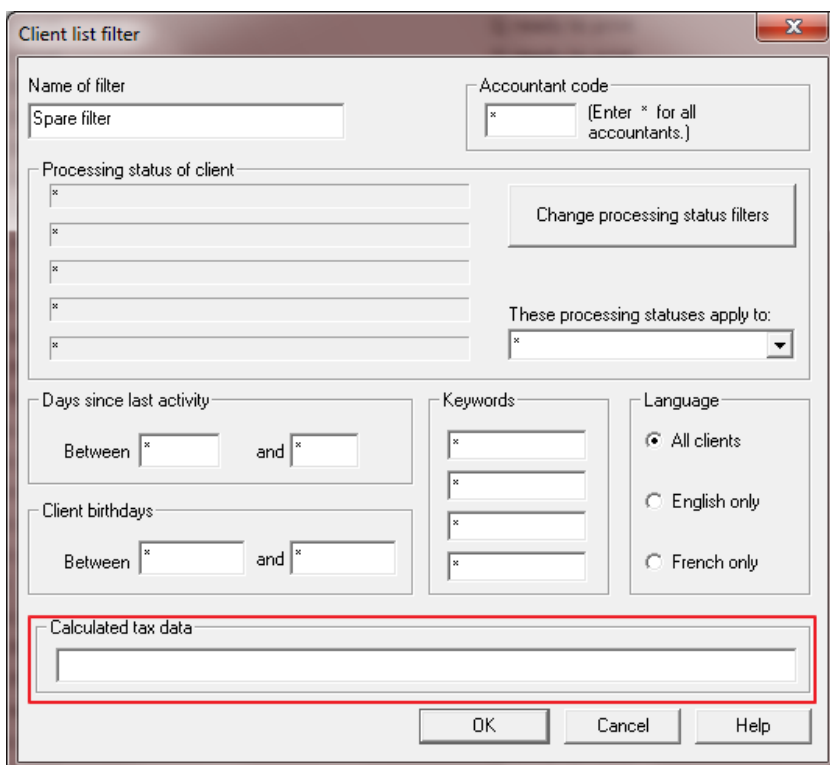

Once you have the field code you need, go back to the **Client List**, then go to the **Tools** menu, and select **Filter the Client List**.

Choose one of the spare filters to customize and click **Edit filter**.

Go to the **Calculated Tax Data** section, and enter the field code you are searching for in the proper format. The field code you will enter is the same as the one you noted when you viewed the fields on the blank forms.

The field codes have to be entered in a specific format. You must also specify what precisely you are looking for within a particular field. For example, for a specific field, you have to specify whether the condition you want is that the field is equal to zero, or a field is within a specific range.

When entering the field code, you must start with the percentage symbol “%”. For example, if the field you marked down and you want to filter on was D25:101, it must be entered as such:

%D25:101

Having specified the field code, you must now specify the condition, i.e., what are you looking for within this field. To specify the condition, you must use mathematical symbols such as:

> Greater than

< Smaller than

= Equal to

>= Greater than or equal to

<= Smaller than or equal to

Using the previous field as an example, if you are looking for a client that has an amount within this particular field, your filter would be entered as follows:

%D25:101>0

You can specify any amount within the condition. You can also use any of the mathematical symbols mentioned above.

You can also search two field codes at the same time. In order to filter you client list based on one field code **or** another, your filter would be entered as follows:

(%D25:101>0) %OR (%D25:101<0)

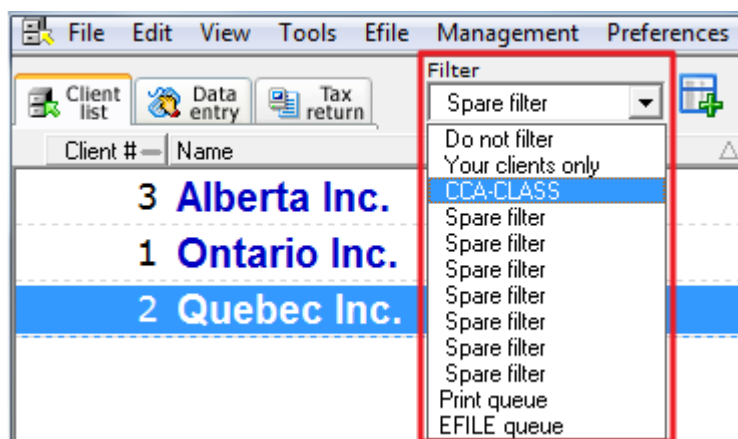

You must enter each field code within brackets.

If you are searching for one field code **and** another, your filter would be entered as follows:

(%D25:101>0) %AND (%D25:101<0)

Filters menu

Once you have setup your filters, they will be placed in the **Filters** menu for future use. In order to re-select one, in the Client List, simply click on the drop-down menu and select the one you need.

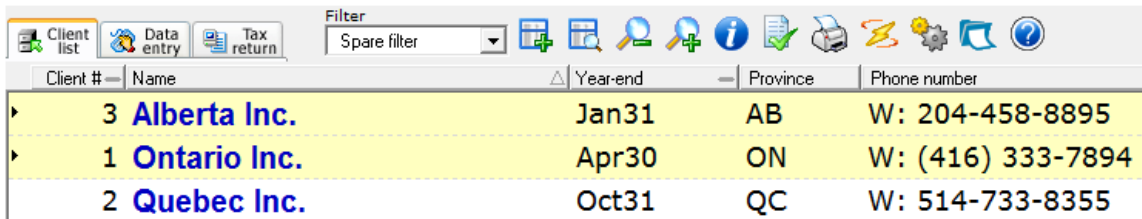

Extracting and merging clients

Extracting and merging clients is the process of exporting or importing existing client files in your Client List.

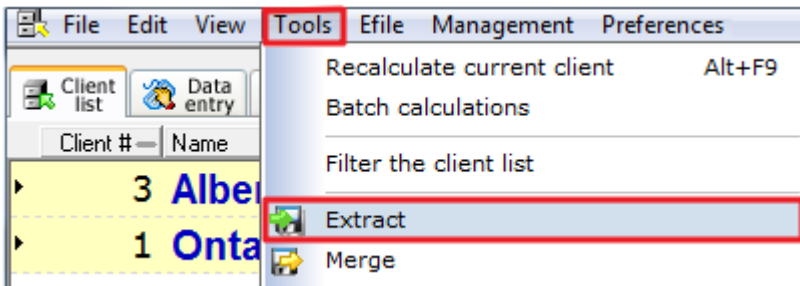

Extracting Clients

As a first step, you must select which clients you want to extract. To choose a client to extract, simply click on their name in the Client List. If you want to select several clients, press the **Space** bar on the names of the clients you wish to extract. A yellow highlight will cover their names in the Client List.

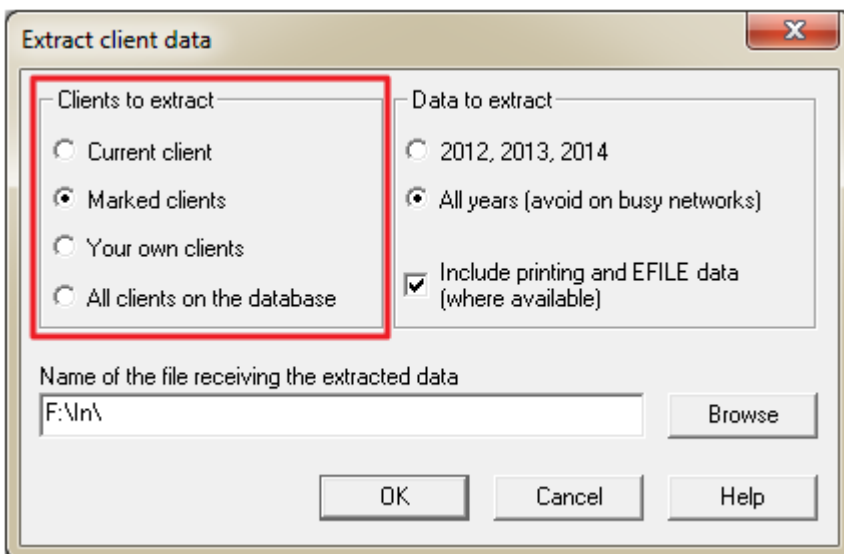

Client #	Name	Year-end	Province	Phone number
3	Alberta Inc.	Jan31	AB	W: 204-458-8895
1	Ontario Inc.	Apr30	ON	W: (416) 333-7894
2	Quebec Inc.	Oct31	QC	W: 514-733-8355

Once you have selected the clients to extract, go to the **Tools** menu and select **Extract**.

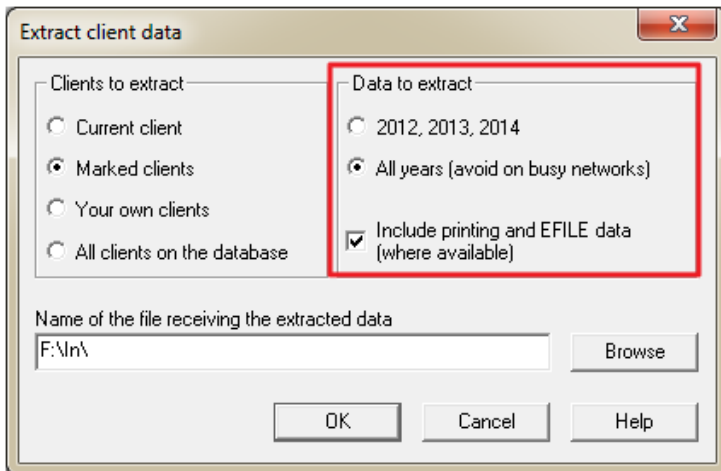

A new window will appear, allowing you to choose from several options.

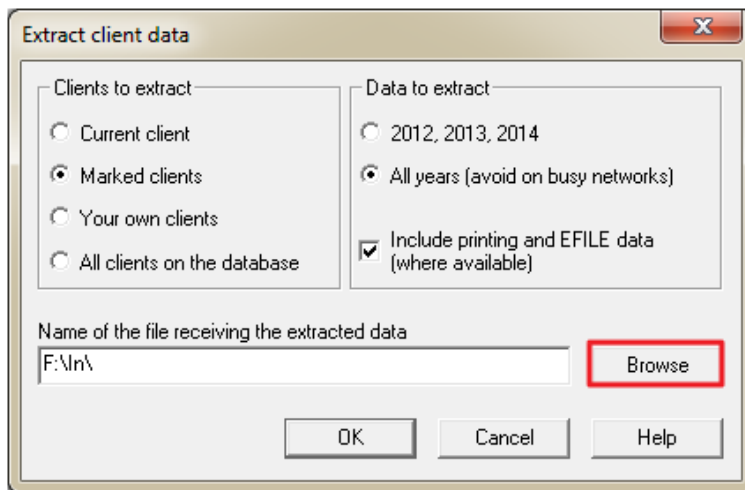

In the **Clients to extract** section, choose which clients you want to extract from the Client List.

In the **Data to extract** section, select which years you want to extract.

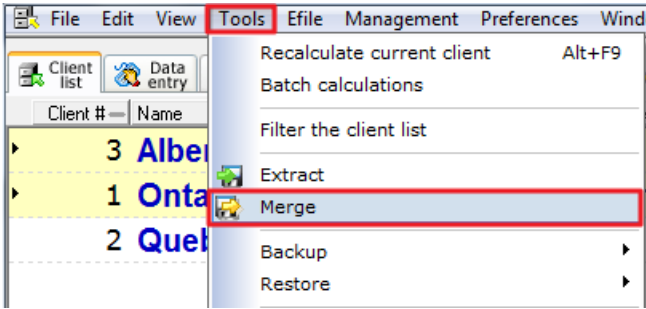

In the bottom portion of the window, you can name and choose the path for which you want to save your extract. Click on the **Browse** button, and choose the path you want to save the extract through **Windows Explorer**.

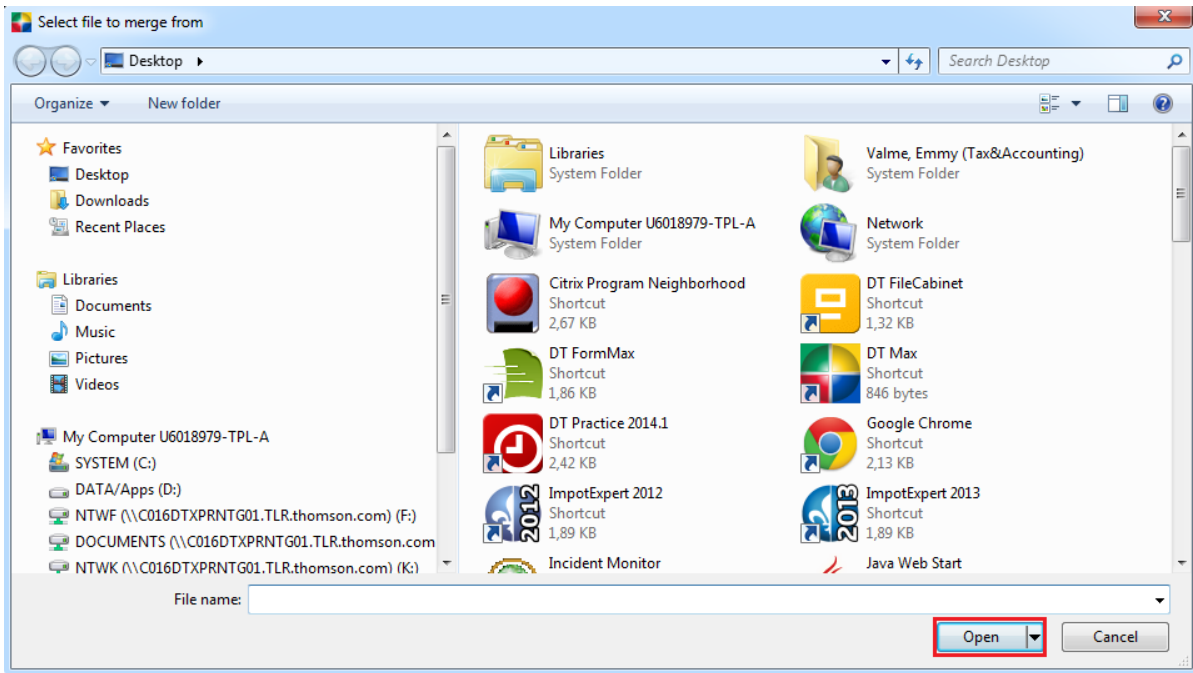

Merging Clients

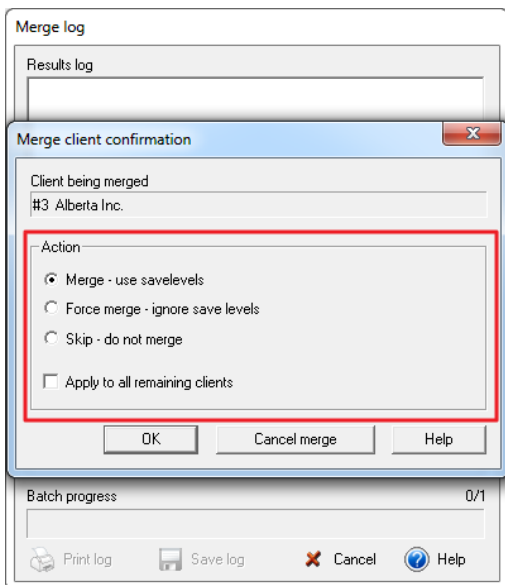

In order to merge a client in your Client List, go to the **Tools** menu and select **Merge**.

Windows Explorer will appear, allowing you to locate the client you wish to merge. Select the file and click **Open**.

A new window will appear. In the **Action** section, select whether you want to “use the save levels” of the files or force the merge.

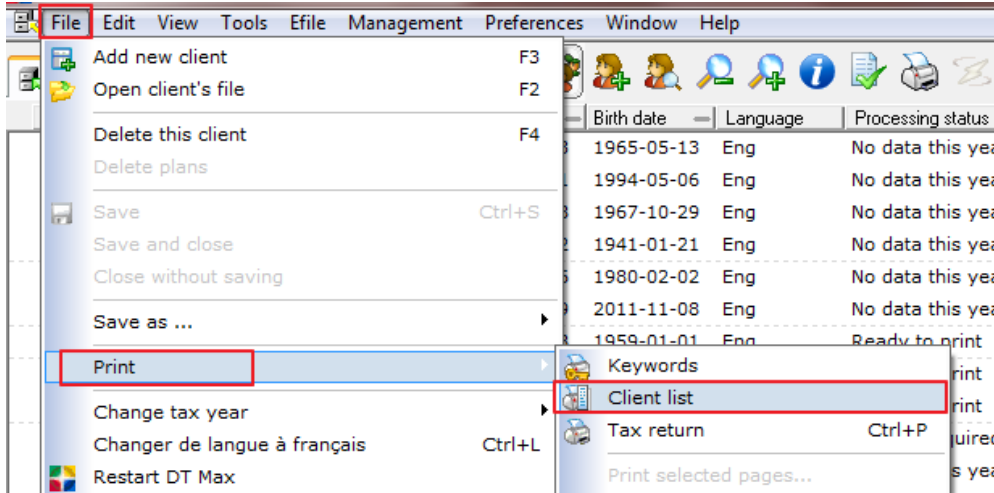

Note: If the Client Number of the file you are trying to merge is already used in the Client List, DT Max will not allow you to merge the file. You will have to renumber the client file that is currently in your Client List. See the pertinent section below for instructions on how to renumber a client file.

THOMSON REUTERS™

Printing/Exporting the Client List

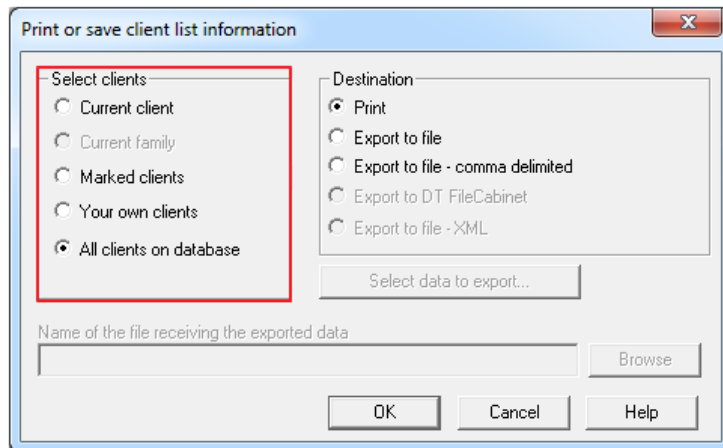

DT Max allows you to print your Client List with the basic information of each of your client's files. DT Max also allows you to export your Client List to other programs such as Excel, Word, or Outlook. In order to print or export your Client List, go to the **File** menu, select **Print**, then select **Client List**.

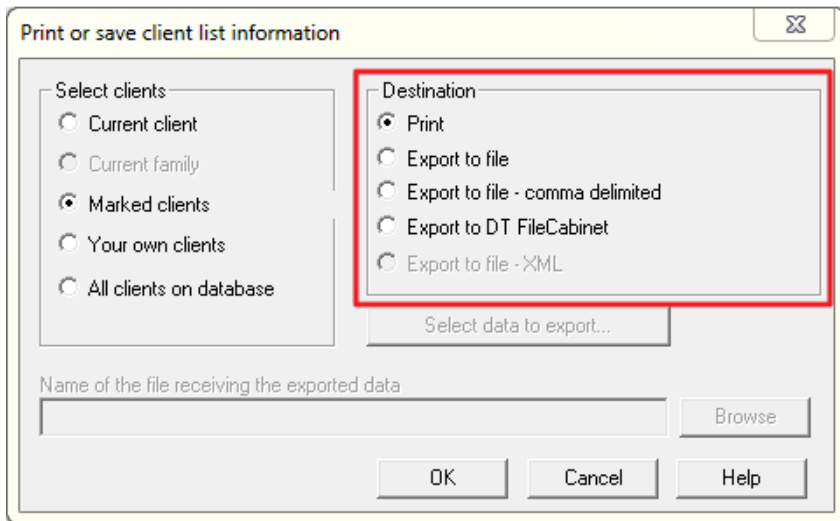

You can also click on the printer icon located at the top task bar of the Client List.

In the **Select Clients** section, choose which clients you want to print or export.

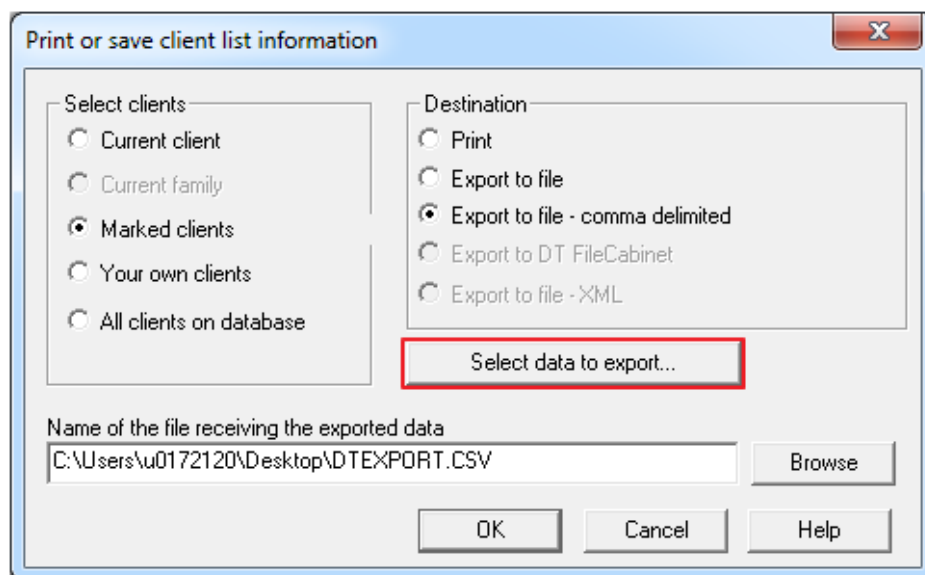

In the **Destination** section, select whether you want to print or export your Client List.

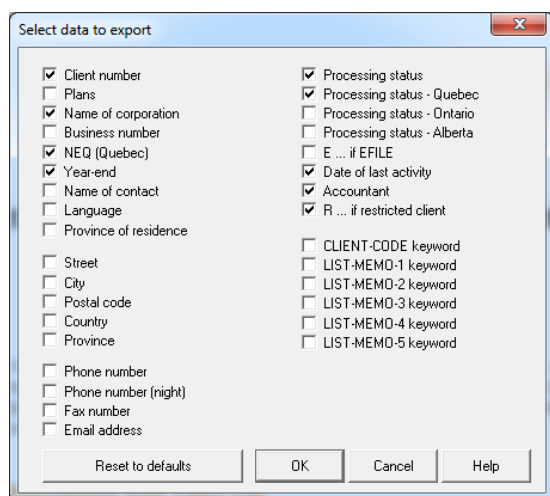

If you choose to print, DT Max will print the Client List with the information you have chosen to display when you personalized your Client List (see the section **Personalizing the Client List** above).

If you choose to **Export to file**, you can now select which information you want to export to Excel, Word, or Outlook. To choose the information you want to export, click on **Select Data to Export**.

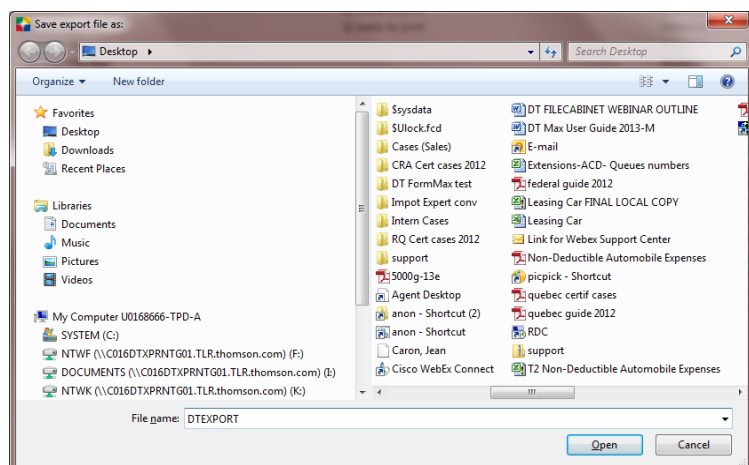

Tip: Your best option when exporting the Client List is to choose **Export to file – comma delimited**.

A new window appears, allowing you to choose what information you want to export. Tick the appropriate boxes and click **OK**.

In the **Name of file receiving the exported data**, click on **Browse**. **Windows Explorer** will appear, allowing you to choose the path of the export file and to name the file.

The format DT Max use for the export file is “.CSV”, which is compatible with most Microsoft Office applications such as Word, Excel, and Outlook.

You can load this file directly using Microsoft Excel. The export file will have all the information you have selected to export.

	A	B	C	D	E
1	Client #	Name	NEQ	Year-end	Processing status
2	3	Alberta Inc.		Jan31	Ready to print
3	1	Ontario Inc.		Apr30	Ready to print
4	2	Quebec Inc.	1123456783	31-oct	Ready to print
5					

You can also use the export file as an address book for Microsoft Outlook. As a first step, make sure to choose the appropriate information for an address book such as e-mail, address, and phone number when selecting the data to export (see above). Once this is done, create the export file and then import the export file directly into Microsoft Outlook.

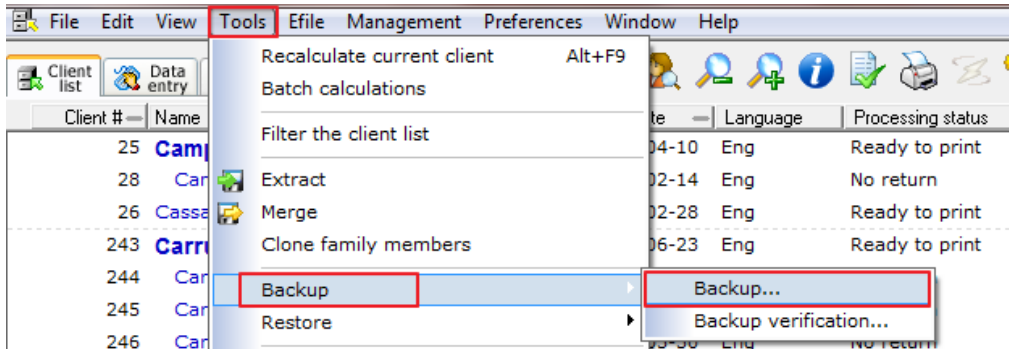

Backup/Restore your Client List

DT Max offers a quick and efficient way to backup and restore your client files from the Client List. Not only does DT Max backup your client files, but it will also backup your **Preferences** menu settings.

Tip: It is strongly recommended that you backup your client files at regular intervals. During tax season, we recommend that you backup the Client List at the end of every day.

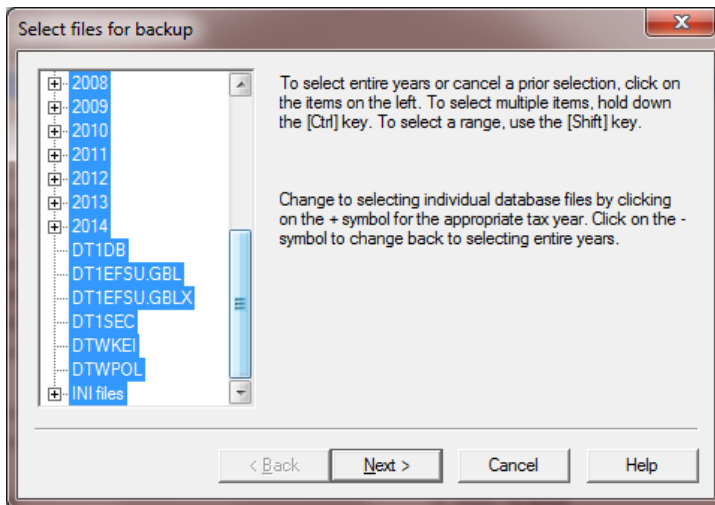

Backup

To backup your client files from the Client List, go to the **Tools** menu, select **Backup**, then **Backup**.

In the window that appears, choose the years and setup files you wish to backup. You can use CTRL + click to select which years and setup files you wish to backup.

Click **Next** once you have made the appropriate selections.

Tip: It is strongly recommended that you backup all years and settings.

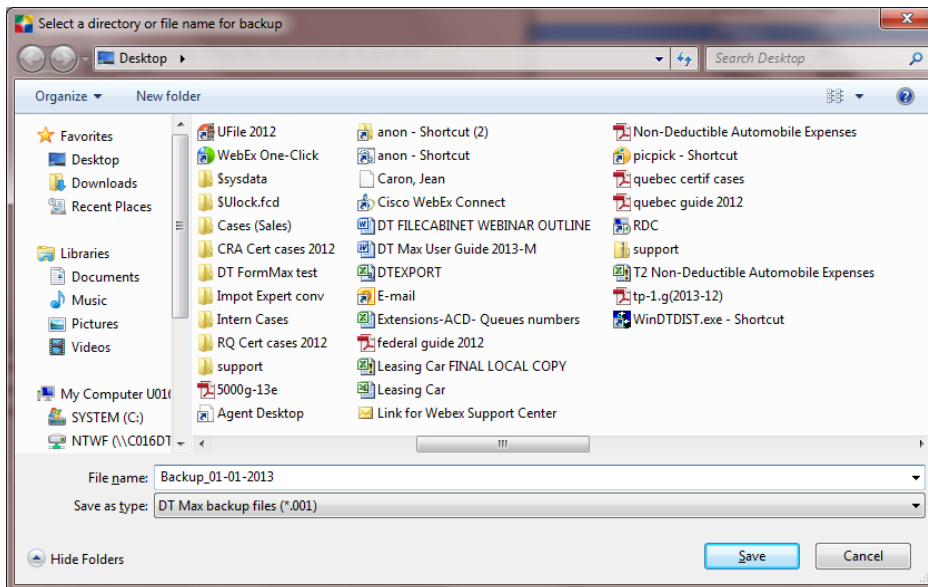

DT Max will now prompt you to save your backup file in a particular location. Click **Browse**.

Window Explorer will appear, allowing you to choose the location you want to save the backup file.

You can rename the backup file to the name you wish. We recommend that you put the date you are backing up in the name of the file.

Note: **DO NOT** change the name of the extension given to the backup file.

THOMSON REUTERS™

Restore

To restore a backup file, go to the **Tools** menu, select **Restore**, then **Restore**.

Tip: Make sure no other user is currently in the program when performing this task in a network database.

DT Max will restart and a new window will appear prompting you to choose the backup file you have already saved.

Click on **Browse**, and locate the specific backup file you wish to restore using Windows Explorer.

Disclaimer: When restoring a Client List, DT Max will override and replace the existing Client List, including all your Preferences. Make sure that the backup file is up to date.

THOMSON REUTERS™

Renumbering Clients

DT Max automatically assigns numbers to every client file you create in the Client List. This number is usually shown to the left of the client's name. The Client Number is important in order to avoid duplicate files within your Client List (see **Extracting and Merging Clients** section above).

To change the Client Number of an existing client in your Client List, you must select the client for which you wish to change the Client Number. They should appear highlighted in blue in your Client List. If you wish to change the client numbers of several clients, press the **Space** bar on the names of the clients you wish to renumber. A yellow highlight will cover their names in the Client List.

Once you have selected your clients, go to the **Tools** menu, select **Advanced Utilities**, then select **Renumber Client**.

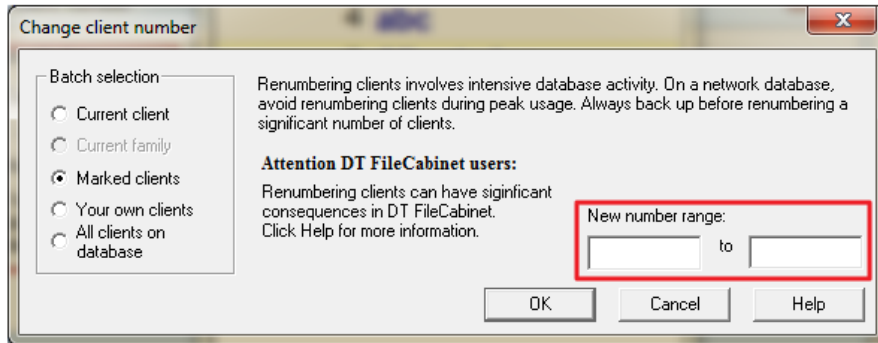

A new window appears, allowing you to renumber your clients.

In the **Batch Selection** section, choose the clients for which you wish to change the Client Number.

In the **New number for this client** section, enter the client number you want for your client. If you have chosen any other option except **Current Client** in the **Batch Selection** section, DT Max will ask for a **range** of Client Numbers.

Click **OK**.

DATA ENTRY

Plans (Tax Planning)

The **Plans** within DT Max represent a unique tool of the Data Entry that allows you to try out different tax scenarios without altering the client's original file. DT Max will create up to six full tax returns within your client's file that are distinct from your client's original file. No need to create dummy files.

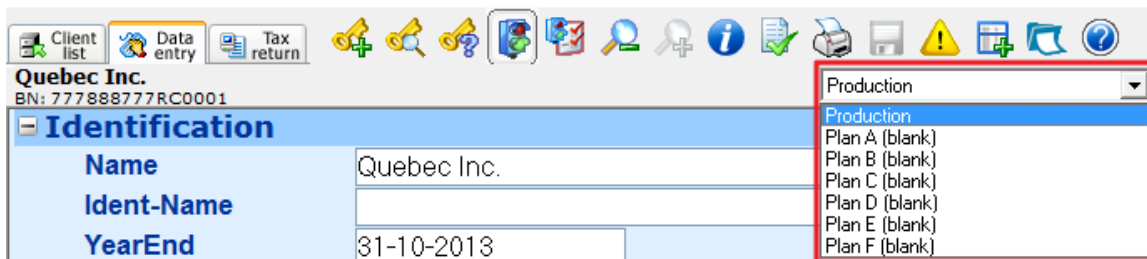

You can try several different tax planning scenarios. Once you have created the scenario, DT Max will produce a comparative summary between these plans.

Creating a Plan

To create a Plan within the client's Data Entry, click on the **Production** drop-down menu.

DT Max now offers you six plans, indicated with the letters A to F. Choose the first plan offered, **Plan A (blank)**.

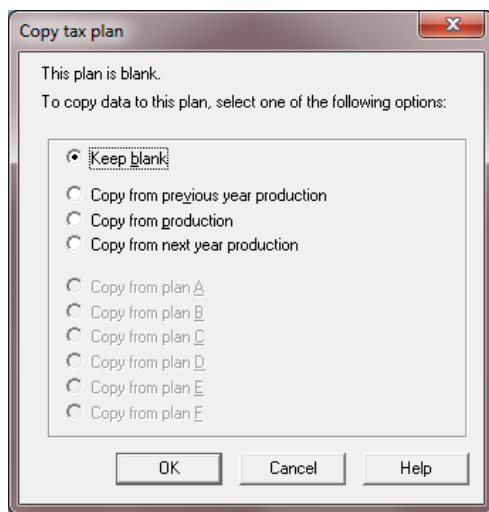

A new window appears, allowing you to choose from several options:

Keep Blank: Choose this option if you want to produce a new return. This is the option to choose when you are producing alternative tax returns.

Copy from previous year's production: Choose this option if you are trying a tax planning scenario for which the income levels are almost identical from one year to the next. In this case, DT Max will bring over the Data Entry you made for this client from the prior year into the Plan.

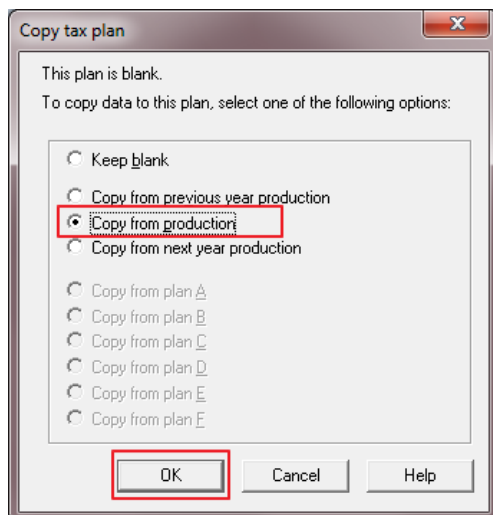

Copy from Production: Choose this option if you want to try a tax planning scenario for the current year. In this case, DT Max will bring over the Data Entry you have already entered from the client's current year original file (Production) into the Plan.

Copy from next year's production: Choose this option if you are in a prior year and want to bring over the Data Entry of the following year for comparative purposes. In this case, DT Max will bring over the Data Entry you made for this client from the following year into the Plan of the prior year.

The most common scenario for which you will use plans is the current year tax scenario (**Copy from Production** option). The rest of the **Plans** chapter will show you how to use the Plans with this scenario.

Once you have chosen **Copy from Production**, click **OK**.

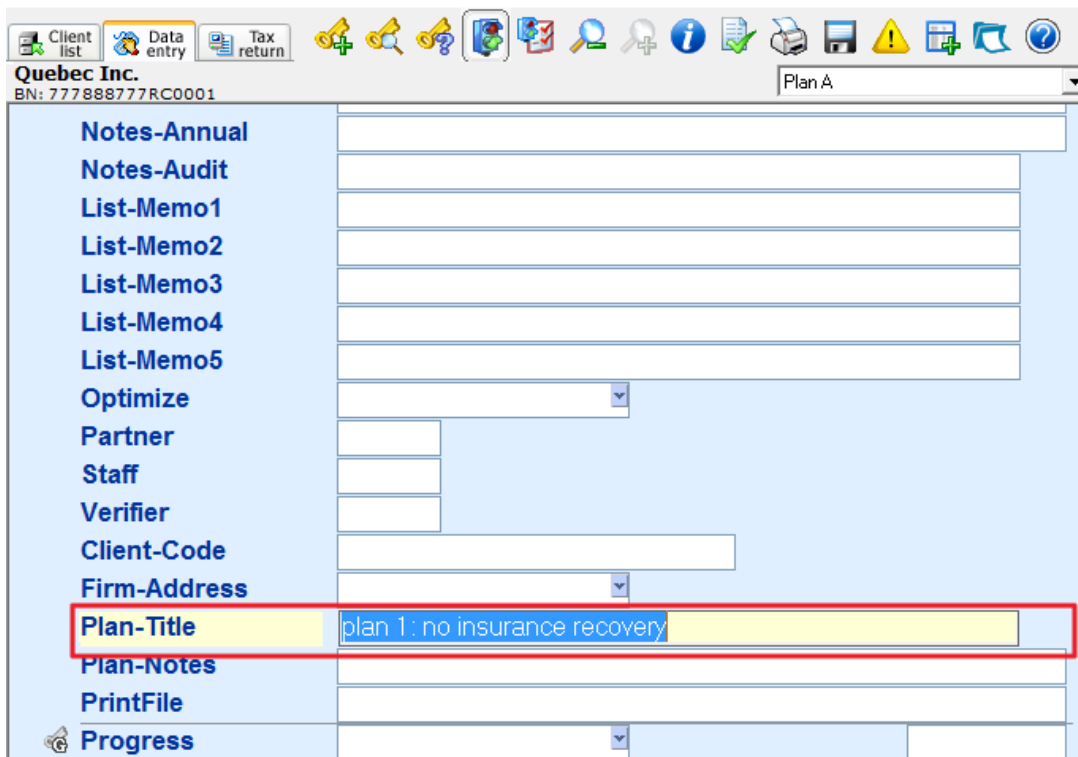

Now you are in the Data Entry, which looks identical to your **Production**. However, the **Production** drop-down menu is now called **Plan A**. You can start making changes to your client's tax return with the Plan.

Naming your Plan

The next step after creating your Plan is to name it.

In order to name a Plan, add the keyword **PLANTITLE**. Enter the name of the Plan in the appropriate box.

Once you calculate the Plan, DT Max will rename the plan as per your entry within the keyword PLANTITLE.

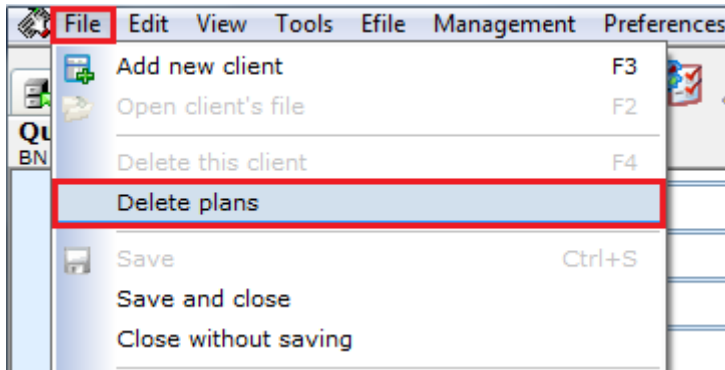

Editing the Plan

You can edit the Data Entry of a Plan in the same way as you edit the production or original file. All the Data Entry features are available in a Plan.

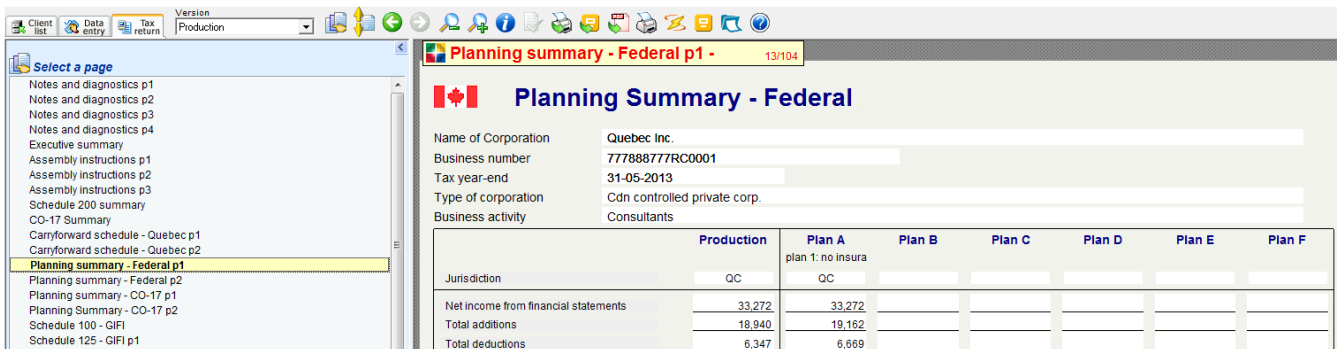

Delete Plans

Plans created in the data entry screen can be remove from the DT Max menu. Simply click on **File** then **Delete plans**.

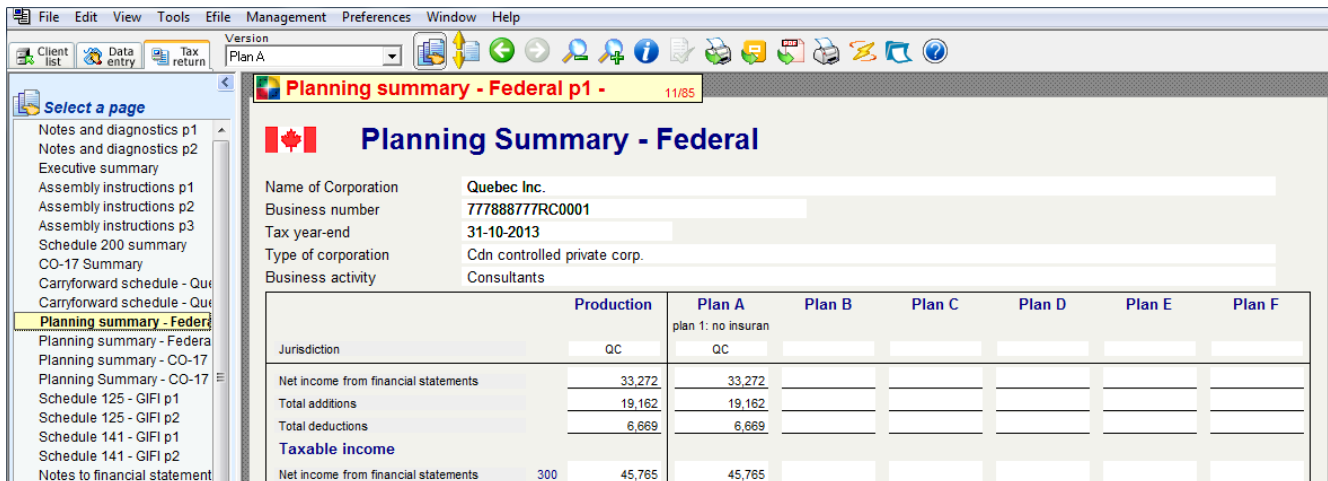

Planning Summary

Once you have completed editing the Data Entry of the Plan and calculate the Plan, DT Max will produce a **Planning Summary** in the Page Index of the Tax Return Screen.

The **Planning Summary** gives you a line-by-line comparative between all the plans you create. At the top of the Planning Summary, you will see the result of each plan side by side.

The Planning Summary will only show the comparative between the Plans; the Production return is not included.

Tip: When creating Plans for current year tax planning purposes, you should not make any changes to your Plan A. Simply copy the Production to Plan A, name it, and go on to Plan B to make your changes.

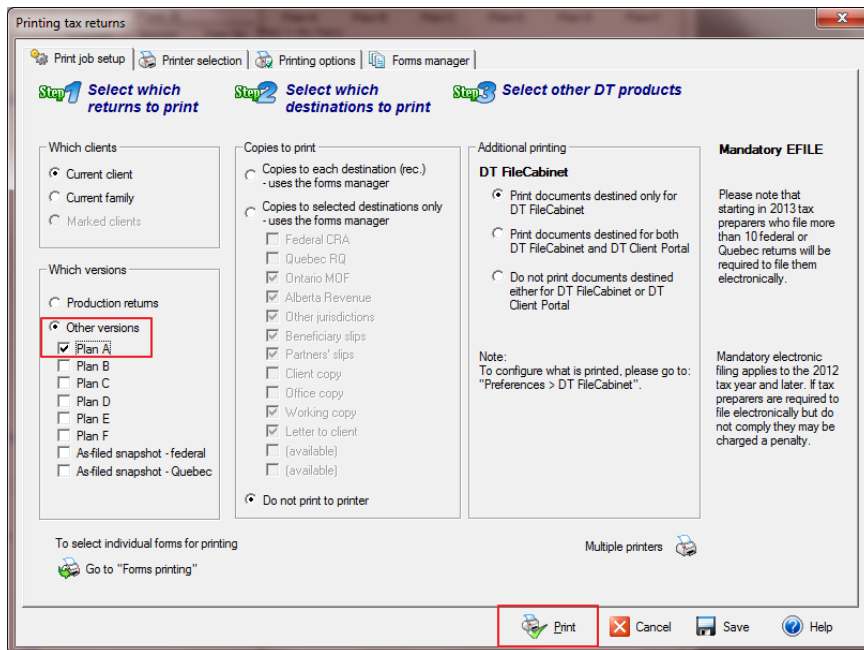

Printing Plans

You can use **Production printing** when printing a Plan.

To print the entire tax return in a Plan, while in the Tax Return Screen, click on the **Production Printing** icon.

In the **Print Job Setup** window, under the **Which versions** section, select **Other versions**. Now select the appropriate Plan. Click **Print**.

Disclaimer: Although you can print a Plan using Production Printing, no bar code will print from a Plan. Moreover, you cannot EFile a Plan.

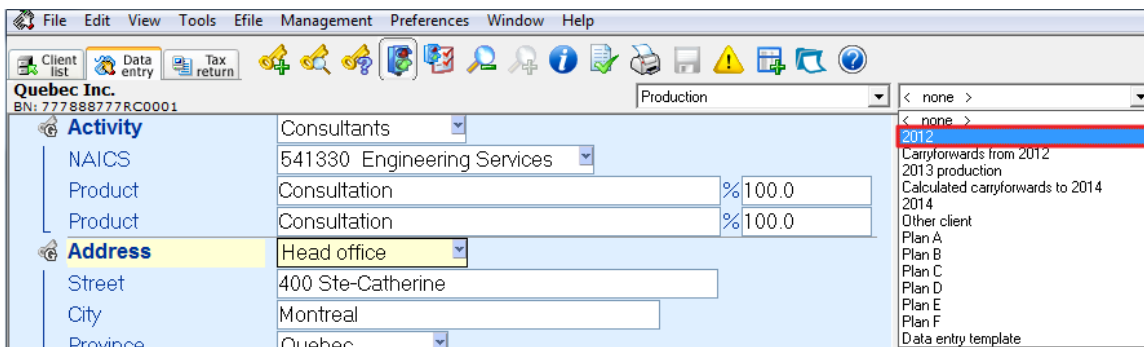

Right-hand side display

The **Right-hand side display** is a unique feature to DT Max which allows you to have real-time comparatives while you are completing your client's Data Entry. For example, you can view the entries you made in the previous year on the right-hand side of the Data Entry.

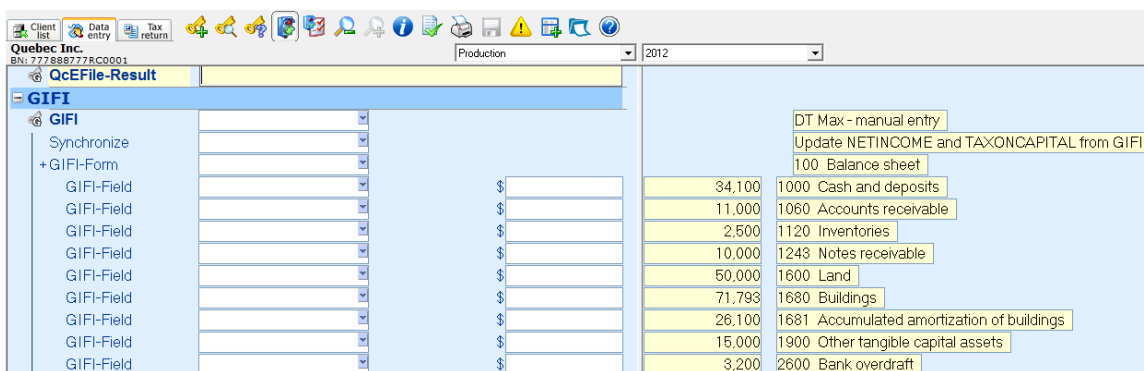

Not only can you view comparative information, you can also bring over information from the right-hand side to your client's Data Entry (see pertinent section below).

Previous year

The first option you can choose from the Right-hand side display is the previous year. Click on the drop-down menu, and select the previous year.

Now all the client's prior year Data Entry is displayed in the right-hand side of the screen.

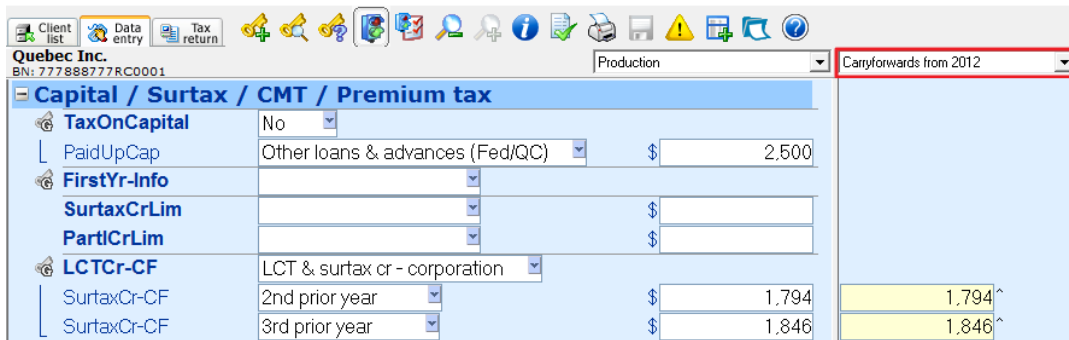

All prior year amounts will match up side by side with the current year amounts as long as the description entered for the slip or business statement is the same from one year to the next.

Carryforwards from the previous year

You can display the carryforward amounts from the previous year on the right-hand side. Simply select **Carryforwards from XXXX** on the right-hand side display drop-down menu.

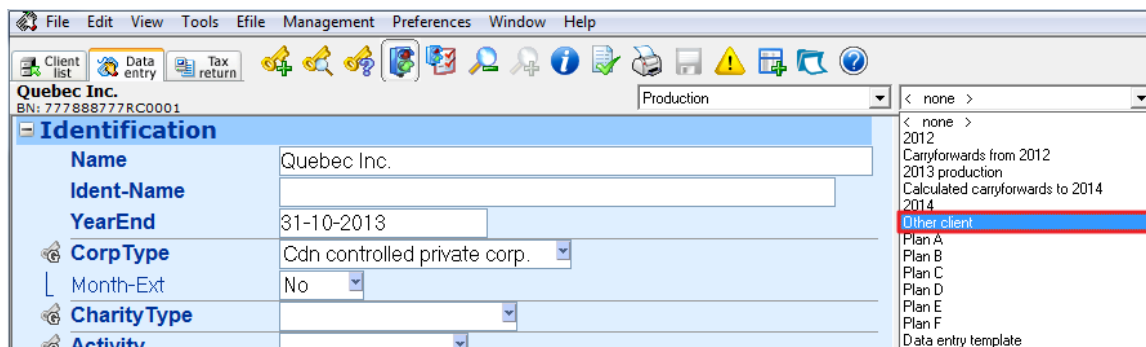

Tip: This option is particularly useful if you accidentally lose the carryforwards within your client's Data Entry. You can always recover them using this option.

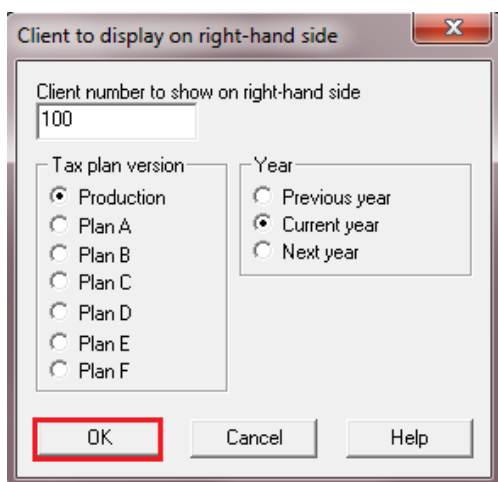

Other Client

You can also choose to display any other client located in the Client List on the right-hand side. The only information you need is the Client Number of the client you wish to display on the right.

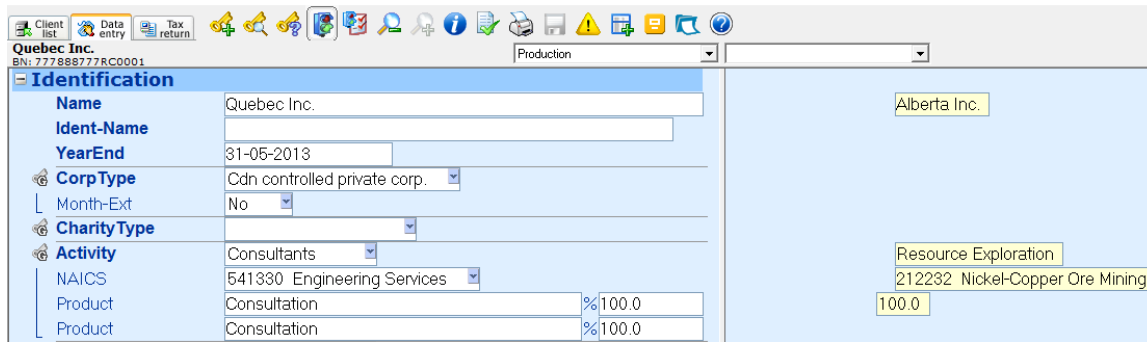

Go to the right-hand side drop-down menu, and select **Other Client**.

A new window appears. Enter the client number of the client you wish to display on the right. Then choose which version of the file you want to see and which year. Click **OK**.

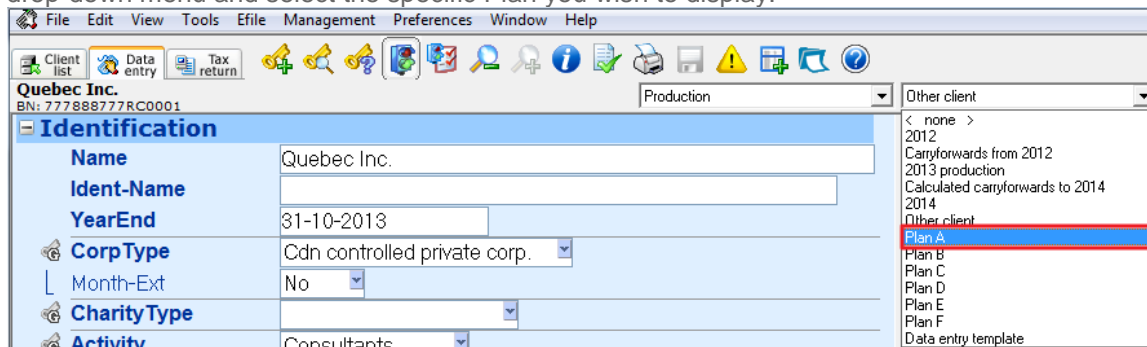

Now you can see side-by-side the Data Entry of your client with the “other client” displayed on the right.

Tip: This option can be particularly handy when you have 2 business partners. Once you have completed the business statement of the first partner, you can choose this partner as the “other client” on the right-hand side of the second partner, and copy over the statement (see pertinent section below).

Plans

You can display the Data Entry you performed in a specific Plan on the right-hand side. Click on the right-hand side drop-down menu and select the specific Plan you wish to display.

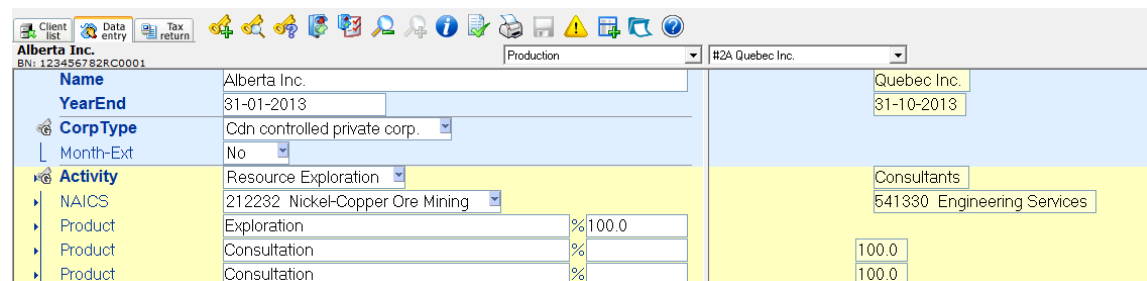

Copy data from right to left

For any option you choose on the Right-hand side display feature, you can copy selected data from the right-hand side to the left.

To copy data for entire keyword groups, click on the **Main keyword of the group** for which you want to copy data that is located to the left.

Then, press **F5** to highlight the group.

Once the keyword group has been highlighted, right-click in the highlighted area and select **Copy to left-hand side**.

You can also use the shortcut keys **ALT+C**.

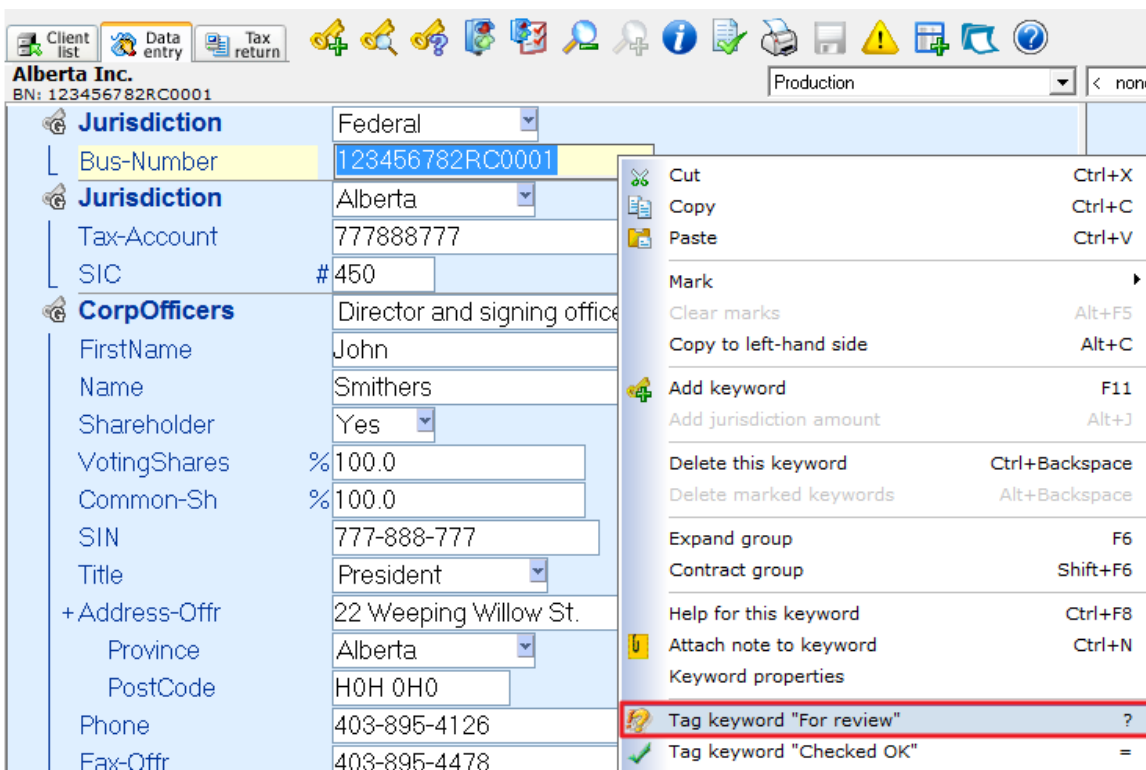

You can also copy individual keywords from the right-hand side to the left.

To highlight a specific keyword for which you want to copy the data from the right-hand side, simply **CTRL + Click** on the keyword itself. Then copy over the data from right to left using the process mentioned above.

Review Tags

The Review Tags feature allows you to tag a specific keyword entry when you are working in the Data Entry screen. To place a review tag simply right-click the relevant keyword entry. A new window will appear. Select **Tag Keyword "For review"**.

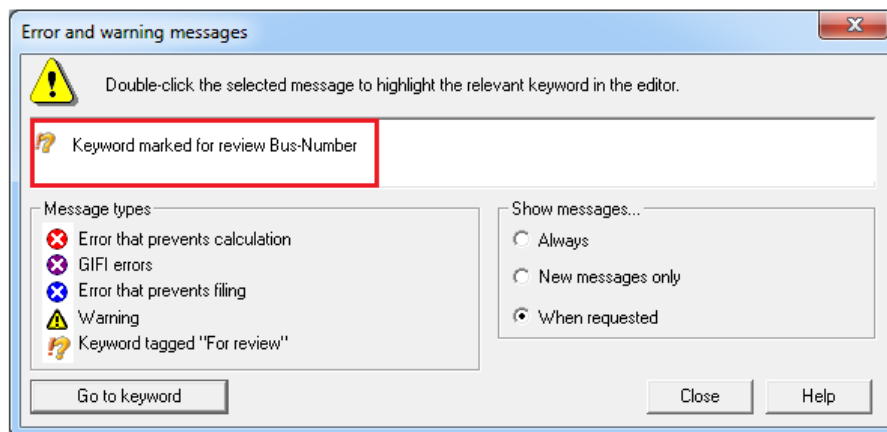

An exclamation and interrogation mark symbol will appear beside the entry.

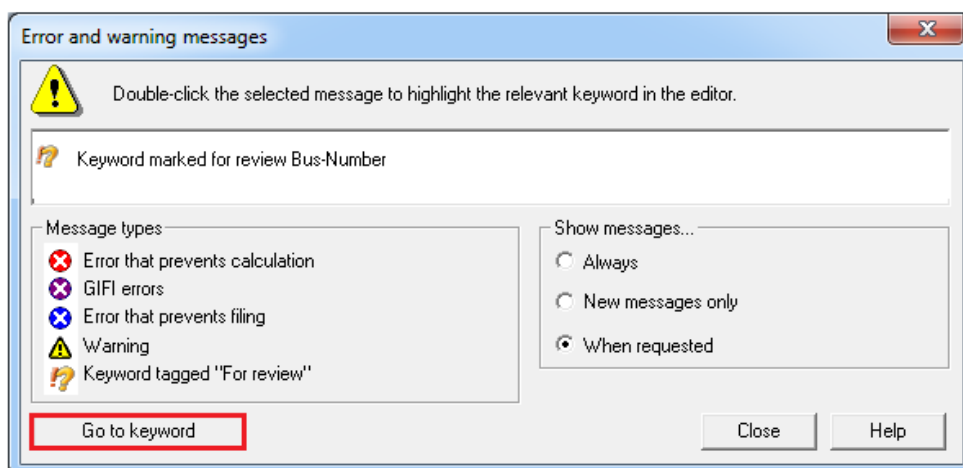

Once a Review Tag is inputted, DT Max will add a review note in the **Error and warning messages** section. To view these review notes, click on the **Error and warning messages** icon.

In this new window, you will be able to view the list of error and warning messages as well as the review tags.

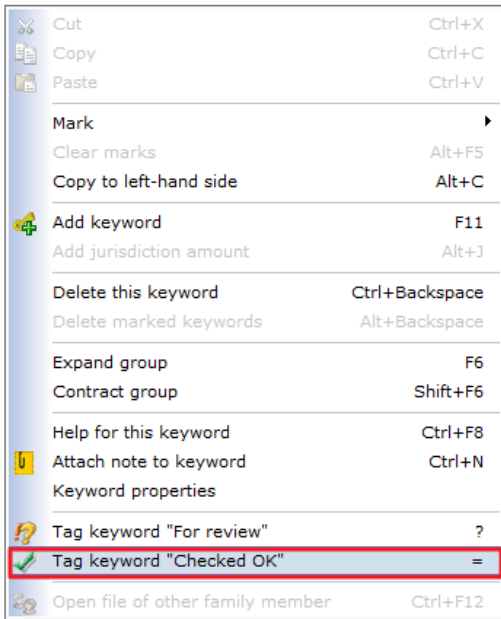

To jump to the review tag in the Data Entry, select the message and click **Go to keyword**.

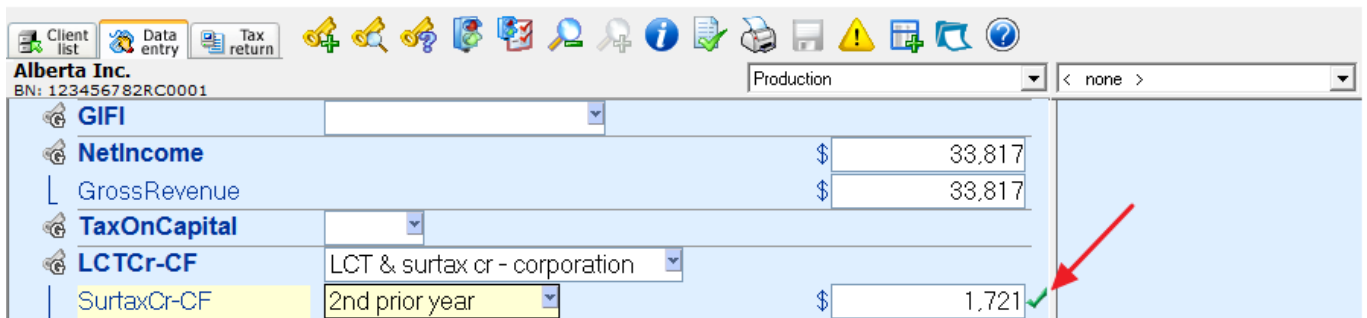

The keyword will be highlighted in your client's Data Entry.

“Checked OK” Keyword Tag

The “**Checked OK**” keyword tag allows you to remove a “**For review**” tag or dismiss a warning message indicated in the **Error and warning messages** section. To input the “**Checked OK**” keyword tag, in your client’s data entry, right-click the relevant keyword entry. A new window appears. Select **Tag Keyword “Checked OK”**.

A checkmark symbol will now appear beside the entry.

The entry was tagged “For review”: By tagging the entry “**Checked OK**”, DT Max removes the corresponding warning message that appeared in the **Error and warning messages** section as well as marking the entry with a checkmark.

The entry is “inconsistent”: In the **Error and warning messages** section, DT Max generates a warning when an amount seems inconsistent in respect to other relevant entries. DT Max will then suggest the expected amount for that entry. By tagging the entry “**Checked OK**”, you can confirm the original amount entered and effectively dismiss the warning message. This warning message will no longer appear in the **Error and warning messages** section.

Keywords

Address

Enter the head office address of the company using the drop down of the keyword **Address**.

The screenshot shows the 'New corporation' data entry screen. The 'Address' keyword is selected, and its dropdown menu is open, showing options: 'Head office', 'Mailing address', and 'Location of books & records'. The 'Head office' option is currently selected. The interface includes a top toolbar with icons for Client list, Data entry, Tax return, and various utility functions. A 'Production' dropdown is visible in the top right corner.

Specify the mailing address and location of books and records in the keywords **MailAddress** and **BooksAddress**.

The screenshot shows the 'Ontario Inc' data entry screen. The 'Address' keyword is filled with 'Head office'. Below it, the 'MailAddress' and 'BooksAddress' keywords are also filled with 'Head office'. The 'Address' dropdown menu is open, showing the same options as in the previous screenshot. The interface includes a top toolbar with icons for Client list, Data entry, Tax return, and various utility functions. A 'Production' dropdown is visible in the top right corner.

Note: If the mailing address differs from the head office address, add a second keyword **Address** in the data entry to complete the mailing address.

If the mailing address is the address of the accountant, in the drop down menu of the second keyword **Address**, choose **Mailing Address** and complete the keyword with the accountant's information.

Address	Head office		1
Street	3333 Graham blvd		
City	Montreal		
Province	Quebec		
MailAddress	Address of accountant		
BooksAddress	Head office		
Address	Mailing address		2
Care-Of	Head office		
Street	Mailing address		
Address-Ln-2	Location of books & records		

The same option applies if the address of the books and records differ from the head office.

Jurisdiction

The **Jurisdiction** keyword must be used at least twice in the data entry. The first keyword should be the federal jurisdiction and the second for the province of establishment of the company.

Jurisdiction	Federal		1
Bus-Number	777888777RC0001		
Jurisdiction	Quebec		2
NEQ	1123456783		
Tax-Account	1234567892 IC 0001		

Corporate officers

Enter information regarding the directors of the company using the dropdown menu of the keyword **CorpOfficers**.

The screenshot shows the software interface for 'QuebecInc' with BN: 777888777RC0001. The 'Production' dropdown is visible. The 'CorpOfficers' keyword is selected, and its dropdown menu is open, showing options: Director, Director, Signing officer, Director and signing officer, Shareholder - individual, and Shareholder - corporation or other. The first 'Director' option is highlighted.

Note: If the director of the company is also the signing officer, in the drop down menu use the option **Director and signing officer**.

The screenshot shows the software interface for 'QuebecInc' with BN: 777888777RC0001. The 'Production' dropdown is visible. The 'CorpOfficers' keyword is selected, and its dropdown menu is open, showing options: Director and signing officer, Director, Signing officer, Director and signing officer, Shareholder - individual, and Shareholder - corporation or other. The second 'Director and signing officer' option is highlighted.

The General Index of Financial Information (GIFI)

In the Keyword **GIFI** you will be able to import or manually enter you financial statement.

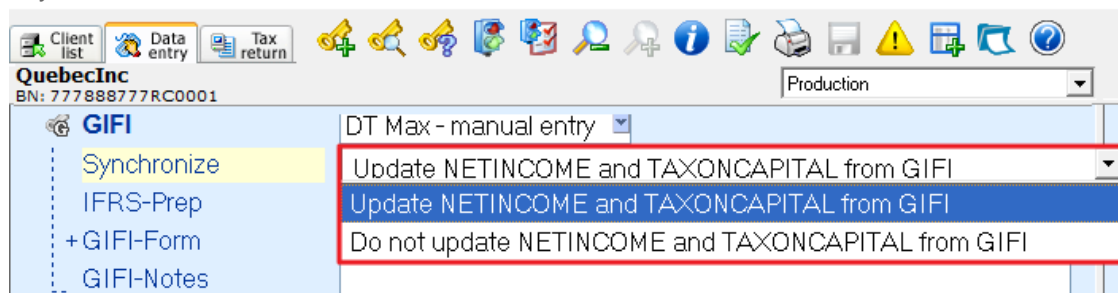

For the manual entry, use the drop down menu from the main keyword grouping and select the option **DT Max - manual entry**.

The screenshot shows the software interface for 'QuebecInc' with BN: 777888777RC0001. The 'Production' dropdown is visible. The 'GIFI' keyword is selected, and its dropdown menu is open, showing options: DT Max - manual entry, DT Max - manual entry, and Import. The first 'DT Max - manual entry' option is highlighted.

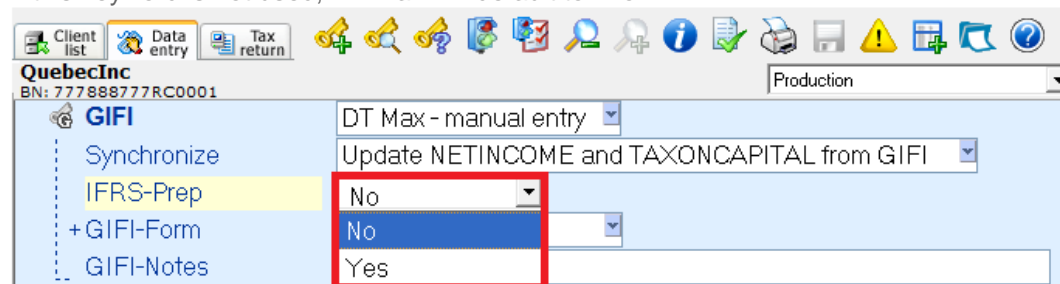

THOMSON REUTERS™

The **Synchronize** keyword gives you the option to update or to not update the net income and the tax on capital keywords in DT Max.

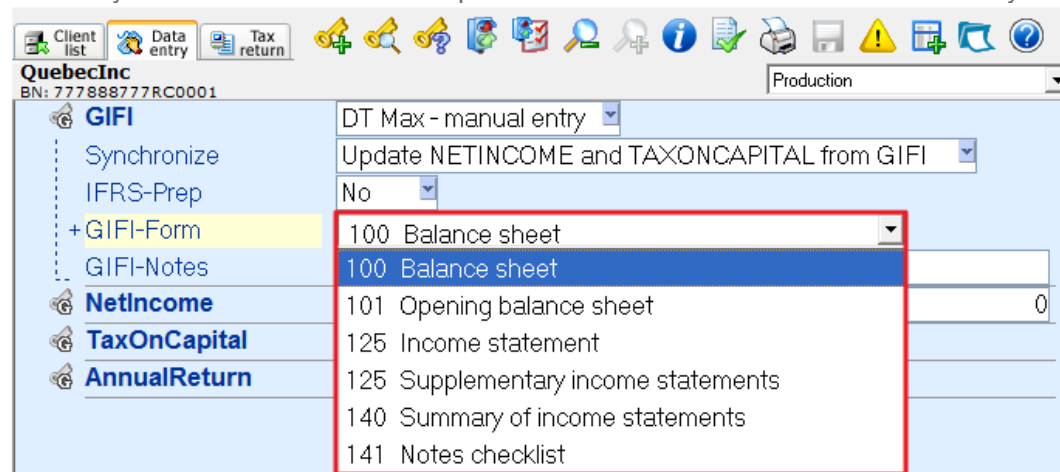

Use the keyword **IFRS-Prep** to indicate whether or not the corporation used the International Financial Reporting Standards (IFRS) when it prepared its financial statements.

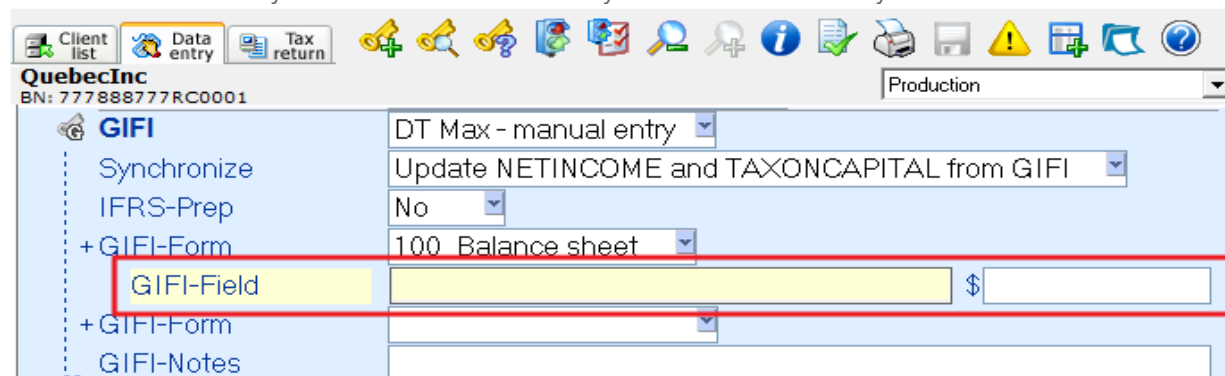

If this keyword is not used, DT Max will default to "No".

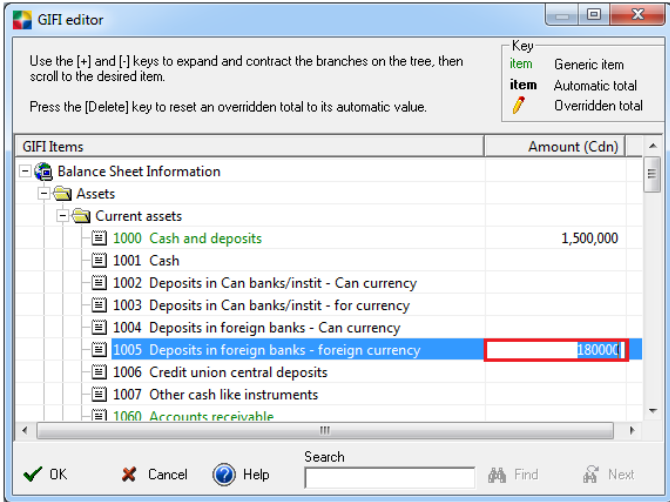

In the keyword **GIFI-Form** use the drop down menu to select the financial statement you wish to complete.

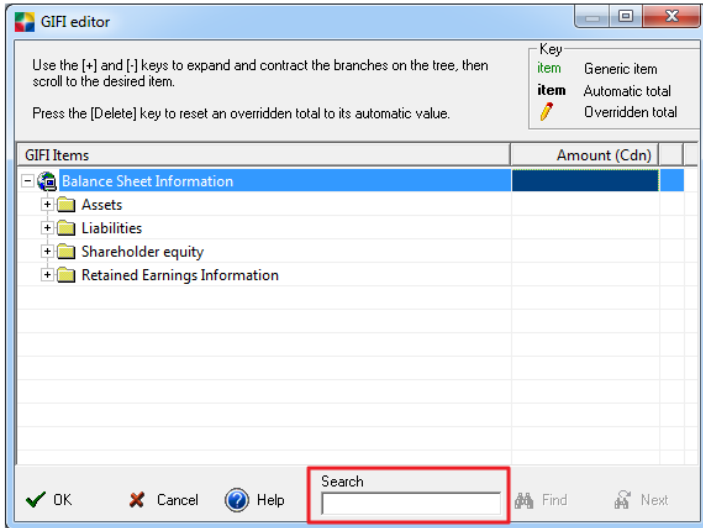

Double click on the keyword **GIFI-Field** to manually enter the amounts of your financial statement.

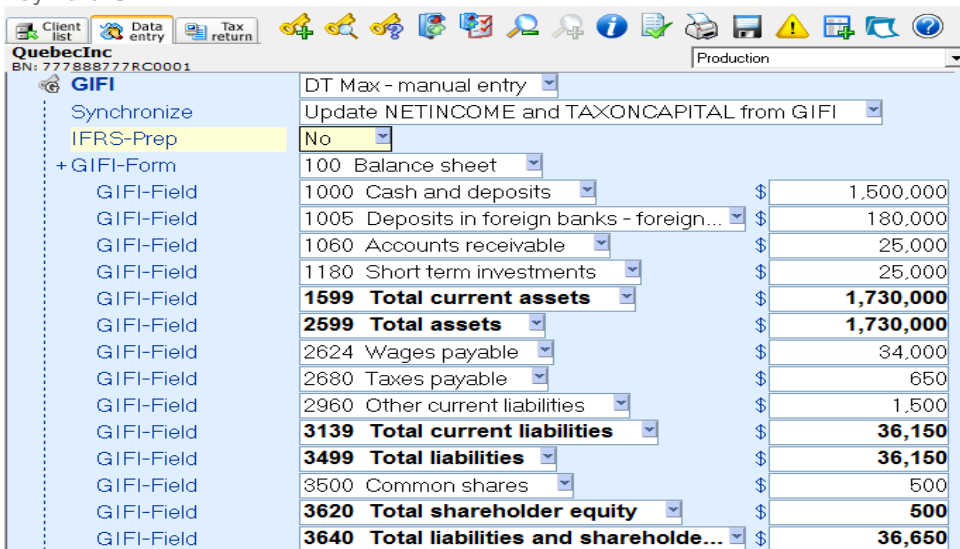

In the new window, **GIFI Editor**, choose the appropriate items to report the amounts of your financial statements.

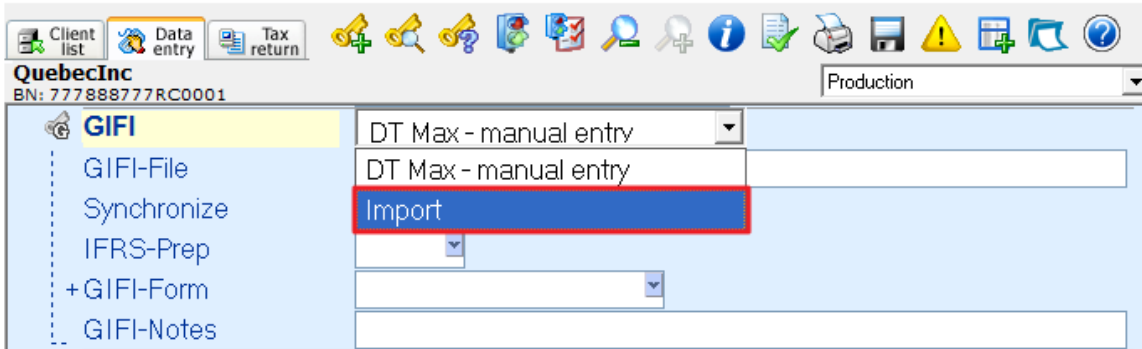

Use the **search bar** to research a specific item in the GIFI editor.

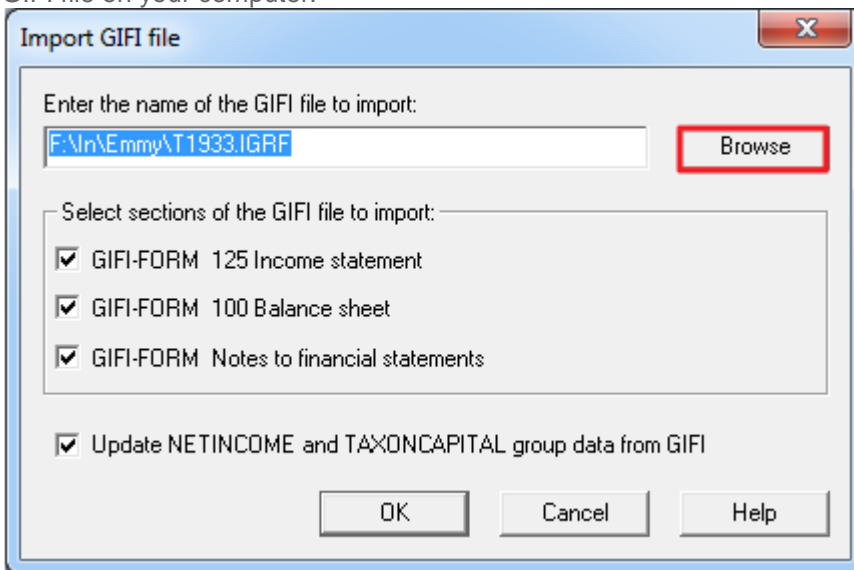

Click **OK** to save the amounts entered in the GIFI editor. The amounts will be reported in the data entry in the keyword **GIFI**.

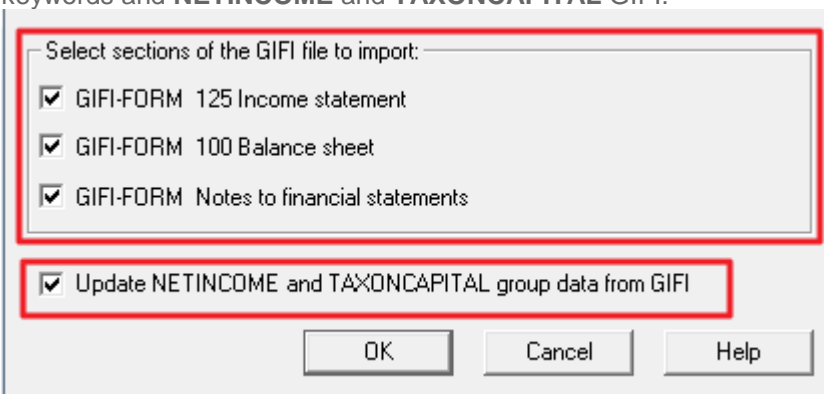

To import your financial statement in DT Max, use the drop down menu of the main keyword grouping GIFI.

In the new window, **Import GIFI**, select the GIFI file you wish to import in DT Max. Click on **Browse** to locate the GIFI file on your computer.

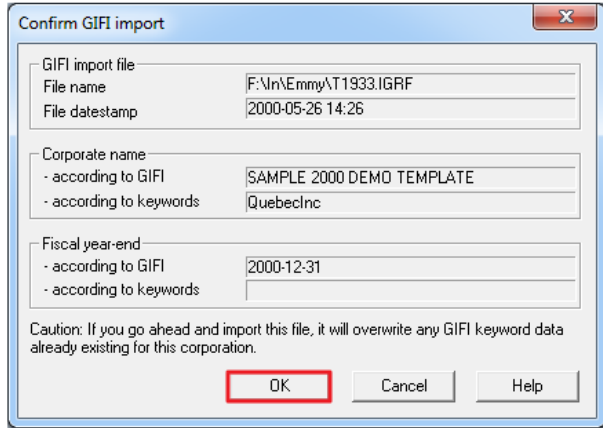

Choose the sections of the GIFI file you wish to import in DT Max and specify whether you want to update the keywords and **NETINCOME** and **TAXONCAPITAL** GIFI.

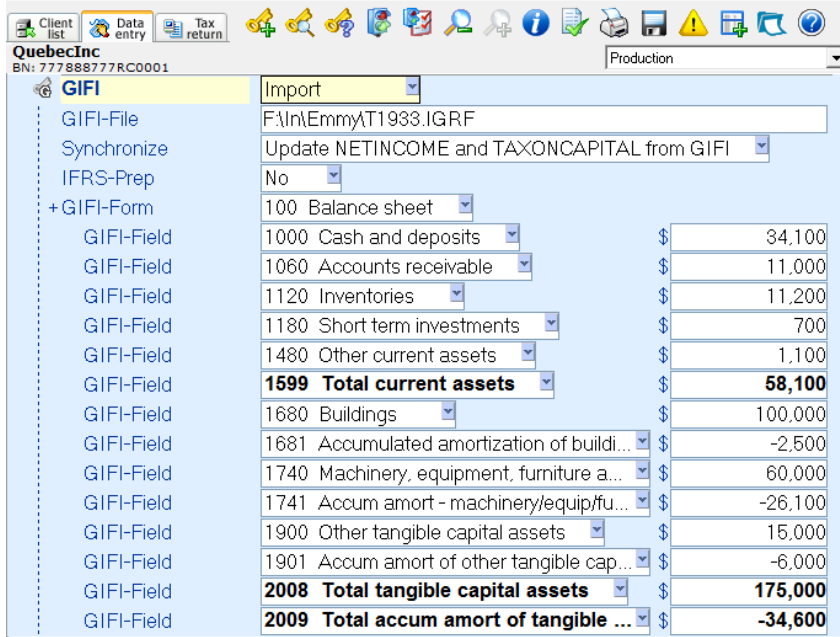

Click on **Ok** to save your selection.

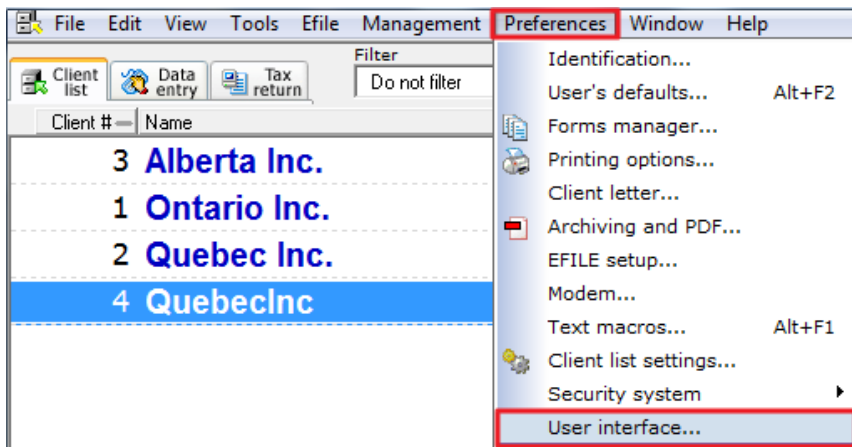

In the **Confirm GIFI import** window, click **OK** to import the file.

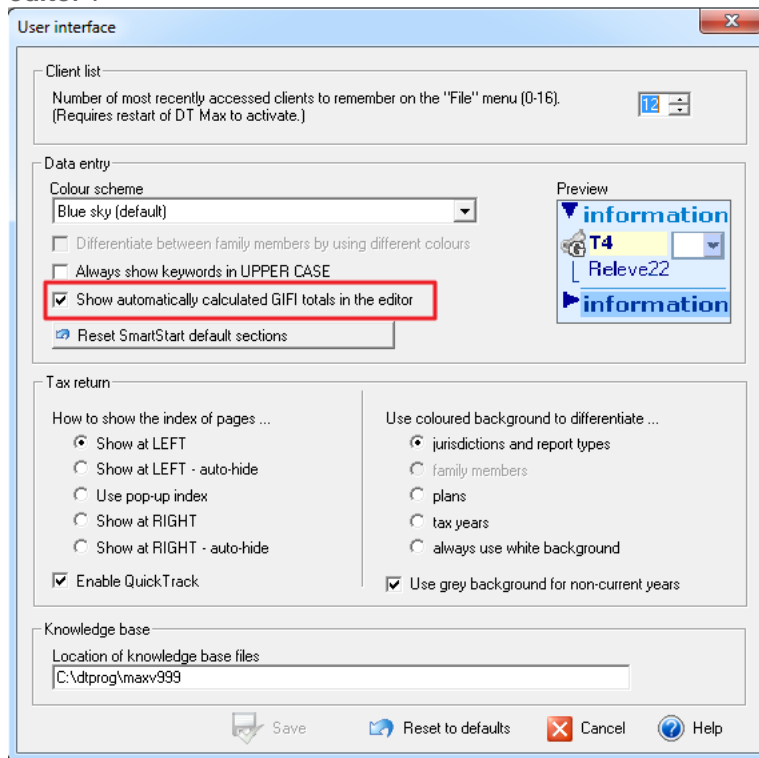

Your financial statement will be automatically imported in the data entry screen of DT Max.

To view the totals in the GIFI keyword, go to the **Preferences** menu and select **User interface**.

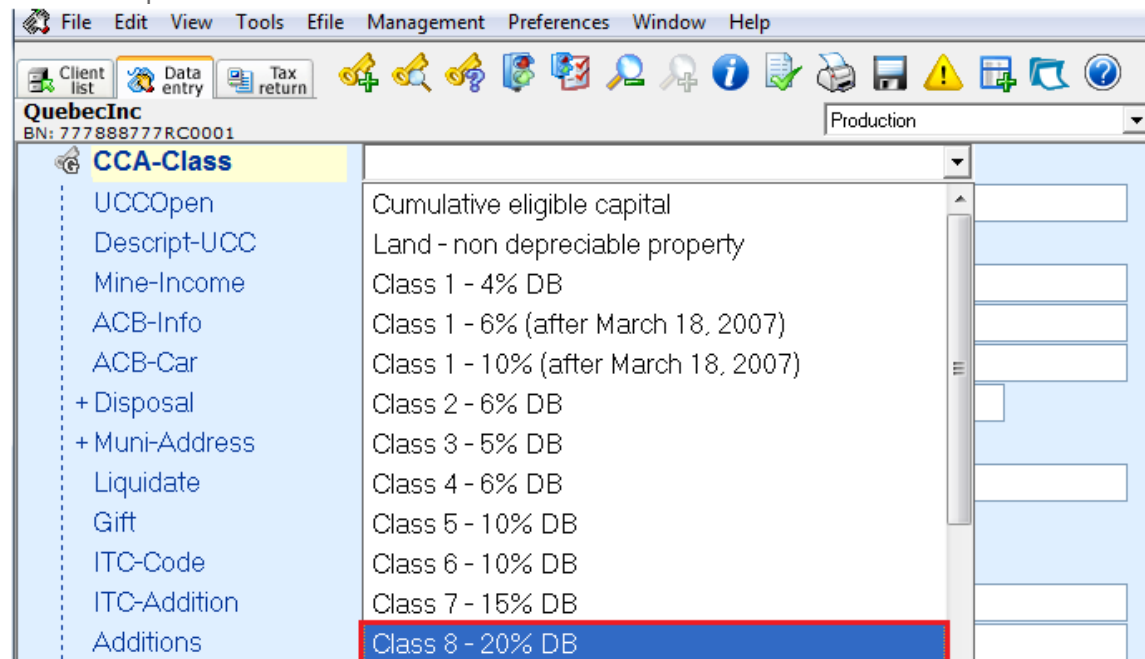

In the **User interface** window, add a check to the sentence “**Show automatically calculated GIFI totals in the editor**”.

Capital cost allowance

Use the keyword **CCA-Class** to enter the amount of depreciation and amortization claimed on the **NETINCOME** keyword on the sub-keyword **Depreciation**.

Use the dropdown menu to select the CCA Class.

Secondary keywords:

Enter the opening undepreciated capital cost or cumulative eligible capital in the **UCCOpen** keyword.

For keyword **Disposal**, enter a description of the assets disposed during the year and then p the "Enter" key of your keyboard to open the sub-keywords of the section.

QuebecInc
BN: 777888777RC0001

CCA-Class: Class 8 - 20% DB

UCCOpen		\$	
Descript-UCC			
ACB-Info		\$	
Disposal	Equipement		
Proceeds		\$	
ACB-Disp		\$	
Expense-Disp		\$	

Specify whether you have liquidated the class with the keyword **Liquidate** and enter the net proceeds.

QuebecInc
BN: 777888777RC0001

CCA-Class: Class 8 - 20% DB

UCCOpen		\$	
Descript-UCC			
ACB-Info		\$	
+ Disposal	Equipement		
+ Disposal			
+ Muni-Address			
Liquidate	Yes	\$	
Gift	Yes		
ITC-Code			

Moreover, all purchases made within the class should be reported in the keyword **Additions**.

QuebecInc
BN: 777888777RC0001

ITC-Addition		\$	
Additions	elevator	\$	25,000
Additions		\$	

Use **CCALimit** to limit the capital cost allowance or cumulative eligible cost amount to be claimed on this class. If there is no amount is reported, DT Max claims the maximum amount.

Two fiscal years ending in the same calendar year

To complete two fiscal years ending in the same calendar year, begin by completing the first fiscal year.

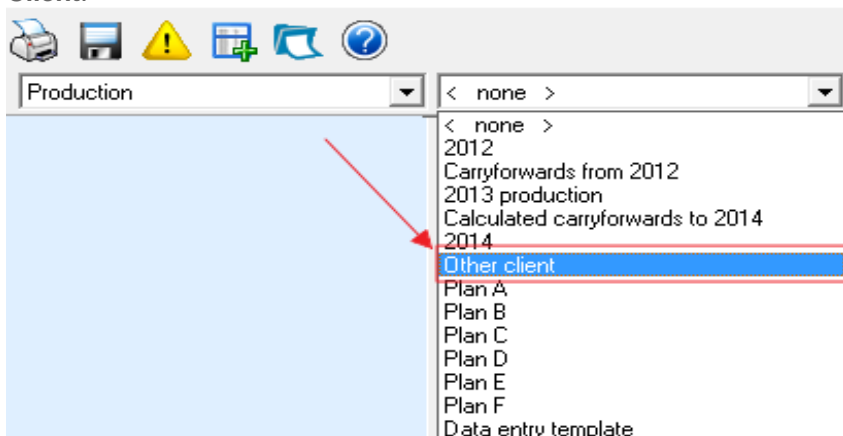

To complete the second fiscal year, add a new customer by clicking on the icon **Add a new client** or by pressing the F3 on your keyboard.

Click **Ok** to create the new corporation

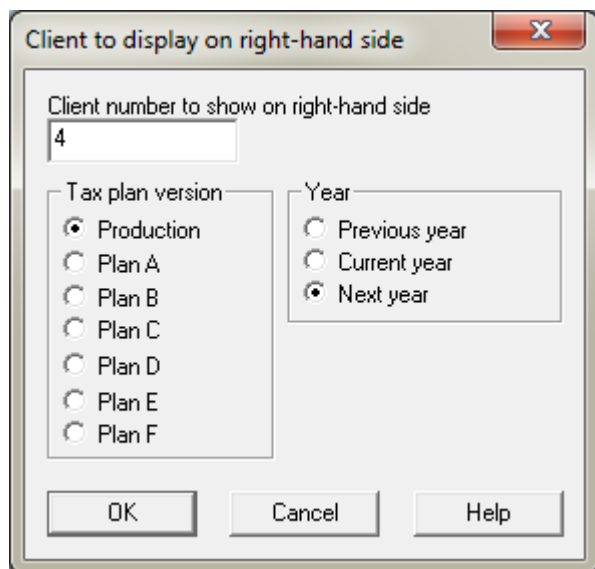

In the data entry of the new file use the drop down menu of the right hand side display and select the option **Other Client**.

In the **Client to display on right-hand side** window, enter the client number of the first fiscal year.

In the section **Tax plan version** select **Production** and choose the **Next Year** in the **Year** section.

Click on **OK** to save the changes.

In the data entry screen, you will see the data of the first year end displayed on the right hand side.

Do **F5** and use your mouse to select the keywords on the right hand side, so that they are highlighted in yellow.

Name		Quebec Inc.
YearEnd		31-10-2013

Complete the tax file of the second fiscal year.

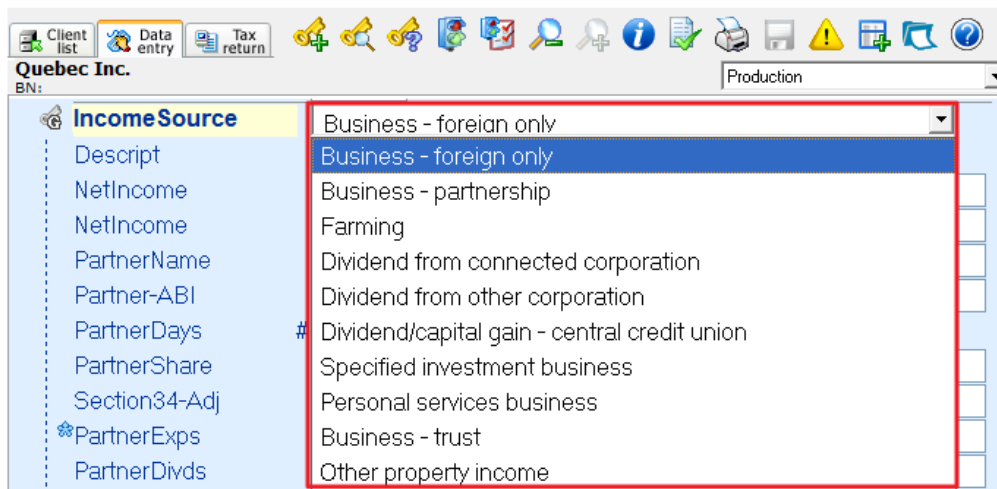

Name	Quebec Inc.
YearEnd	31-12-2013
Corp Type	Cdn controlled private corp.

Income source

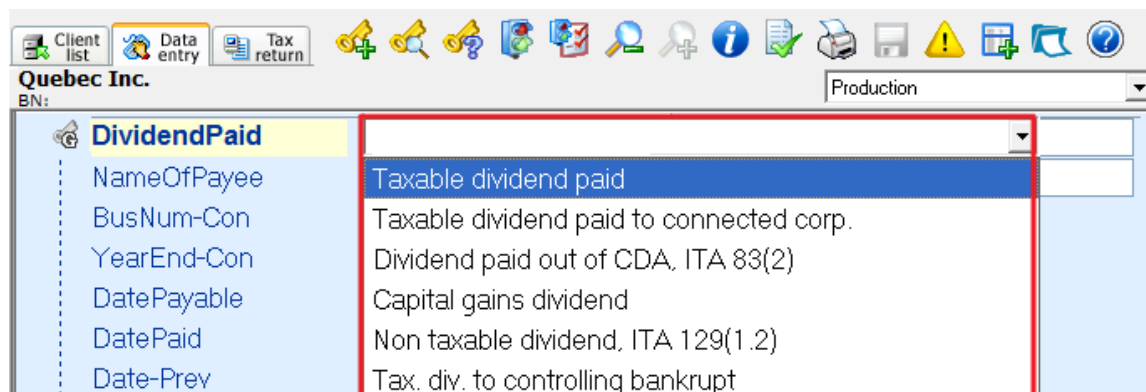

Use the keyword **IncomeSource** to include the deductions not eligible for the small business deduction.

Specify the source of income by clicking on the dropdown menu of the keyword **IncomeSource**.

Dividend Paid

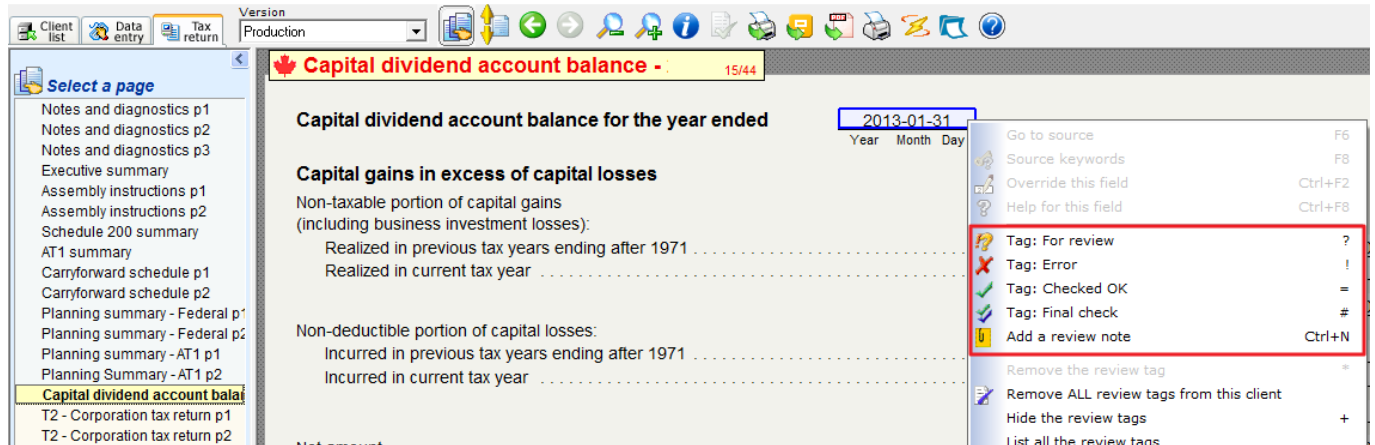

Enter all dividends paid this year in the **DividendPaid** keyword. DT Max will use the amount of taxable dividends paid to calculate the current year dividend refund. Amounts entered will also be reported on schedule 3 (T2S (3)).

TAX RETURN

Review Tags

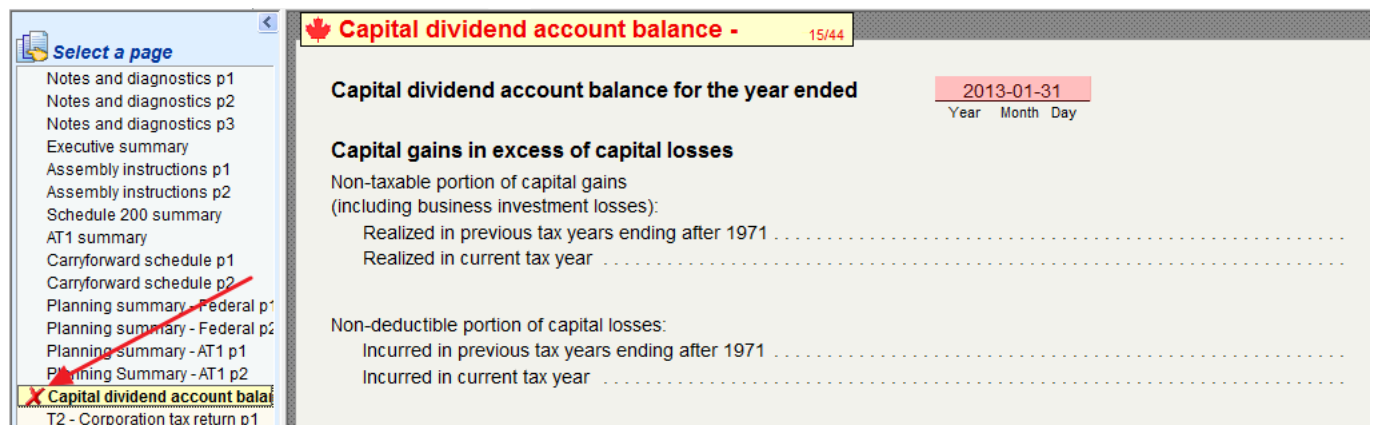

DT Max's review tags feature allows you to directly tag a field on the tax return for further review. To access this feature, simply right-click the field you wish to tag. You will have a selection of four different tags to choose from.

Similarly to the tagging tool available in the Data Entry screen, DT Max allows you to tag a field either “**For review**” or “**Checked OK**”. The utilities of these tags were explained in the previous section.

In the Tax Return screen, two additional review tags are available for use.

When tagging a field as “**Error**”, DT Max will highlight the field in red and input an **X** symbol in the navigator section to the left of the screen to indicate that an error is present and must be verified before the final production of the tax return.

THOMSON REUTERS™

Once the error tag has been verified, you may right-click the field and select **Tag: Final check**.

The screenshot shows the 'Capital dividend account balance' section for the year ended 2013-01-31. A right-click context menu is open over the date field, listing various actions such as 'Go to source', 'Source keywords', and 'Tag: Final check'. The 'Tag: Final check' option is highlighted with a red box.

DT Max will now highlight the field in green and input a double checkmark symbol in the navigator.

The screenshot shows the same 'Capital dividend account balance' section. The date field '2013-01-31' is now highlighted in green, and a double checkmark symbol is visible in the navigator on the left side of the interface.

In addition to the review tags, DT Max also allows you to attach notes to specific fields on the tax return. To add a note, right-click the desired field and select **Add a review note**.

The screenshot shows the 'Capital dividend account balance' section. A right-click context menu is open over the date field '2013-01-31'. The 'Add a review note' option is highlighted with a red box.

A new window will appear allowing you to enter a review note of up to maximum of 400 characters. Once you have entered the note, click **Save**.

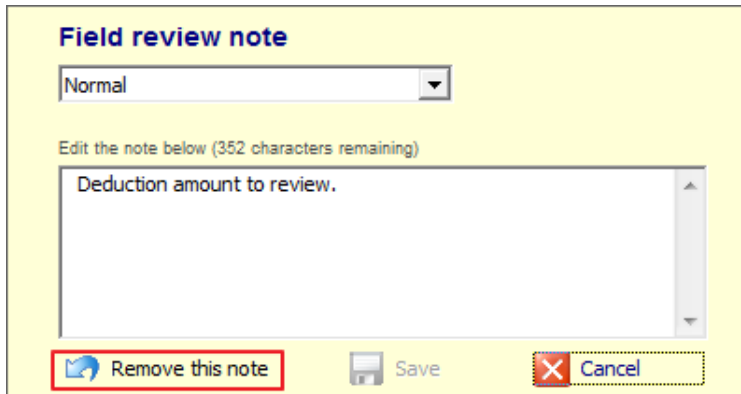

A yellow note page symbol will appear in the navigator indicating that a review note is present.

Once one or more review notes are no longer required, you may choose to remove them individually or all at once. To remove an individual review note, right-click the corresponding field and select **Edit the review note**.

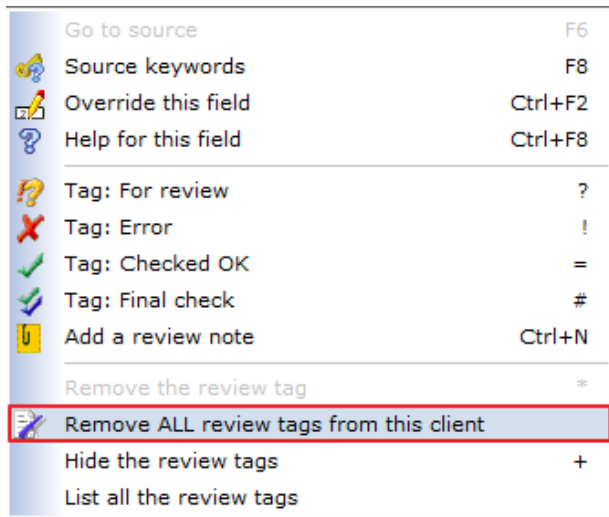

Go to source	F6

From the **Field Review Note** window, select **Remove this note**.

To delete all the review notes and tags at once, right-click any field and select **Remove ALL review tags from this client**.

PDF

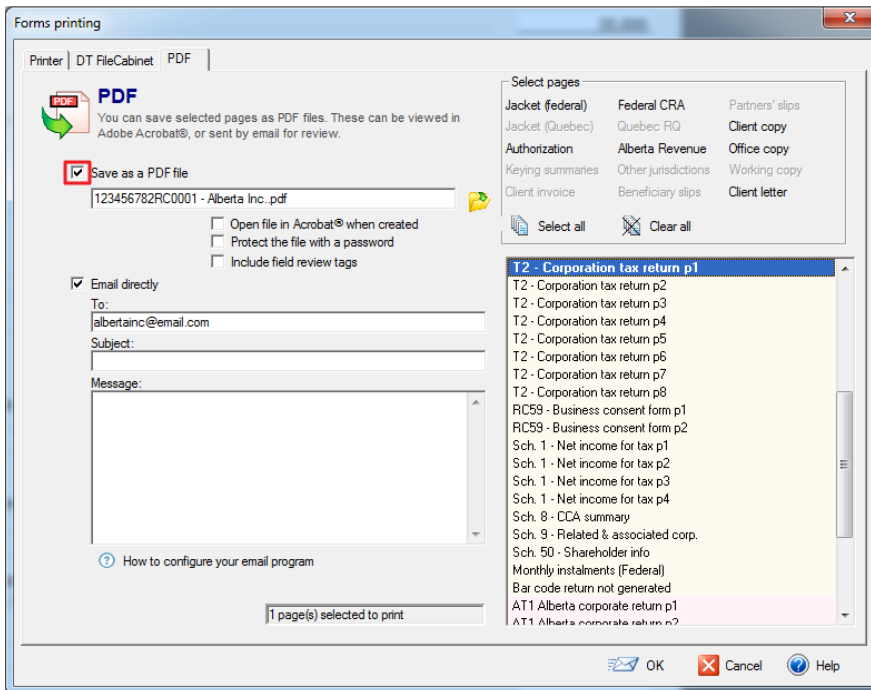

DT Max's PDF function allows you to save selected pages of the tax return as PDF files. These files can be archived or even sent in an e-mail directly through DT Max.

To access this feature, once on the **Tax Return** screen, click the **PDF** icon located on the toolbar.

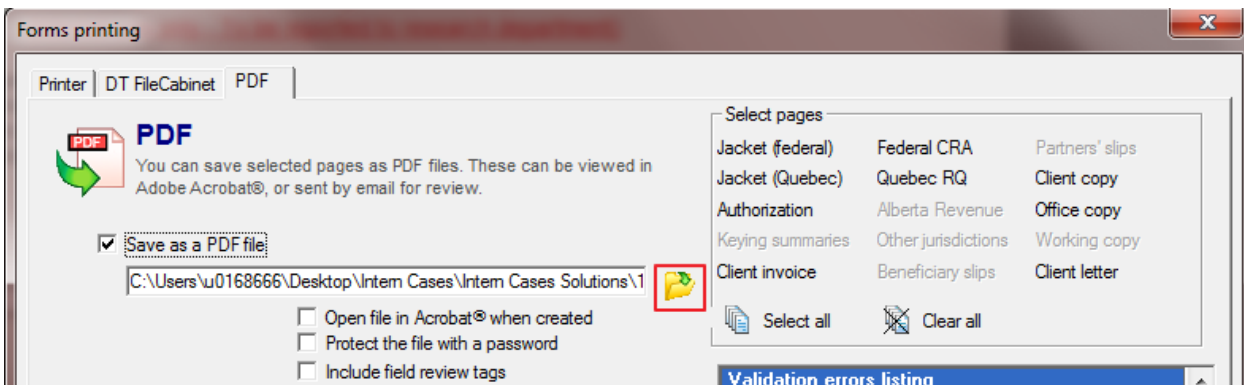

A new window will appear.

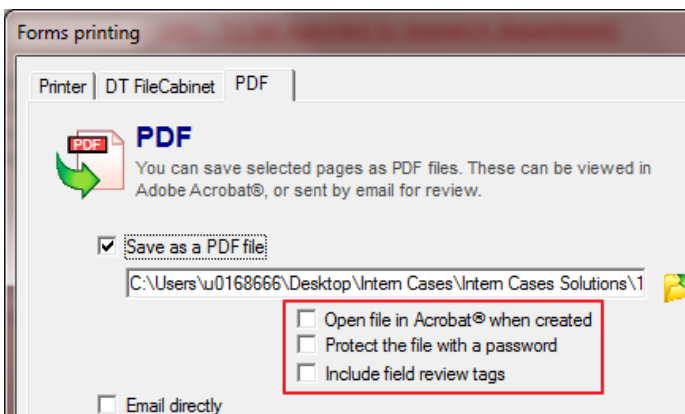

To save selected pages of the tax return as PDF files, tick the box next to **Save as a PDF file**.

Once selected, you will be able to browse a save location by clicking the browse icon.

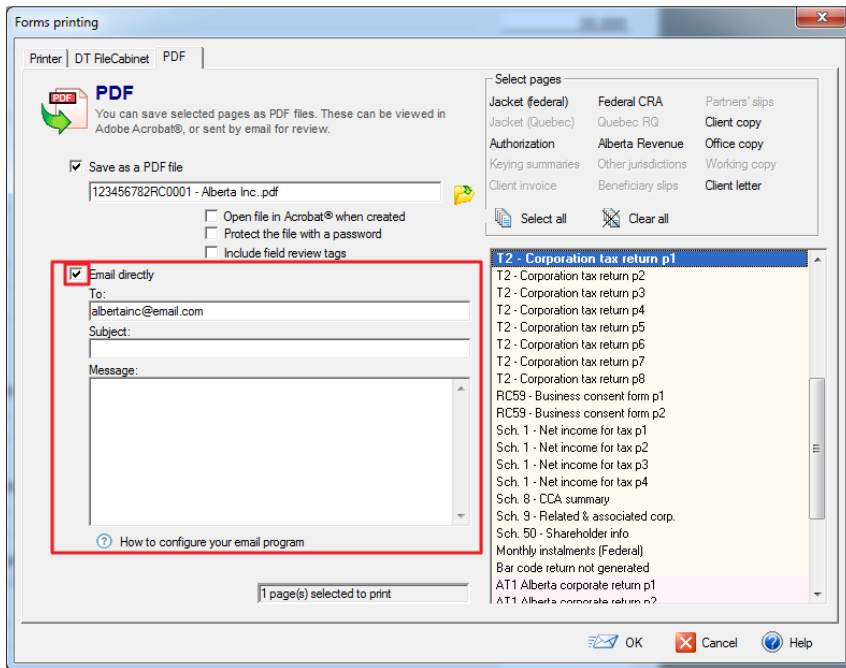

Three additional options are also available. You may chose to **Open the file in Acrobat® when created**, to **Protect the file with a password**, and to **Include field review tags** in the saved PDF file.

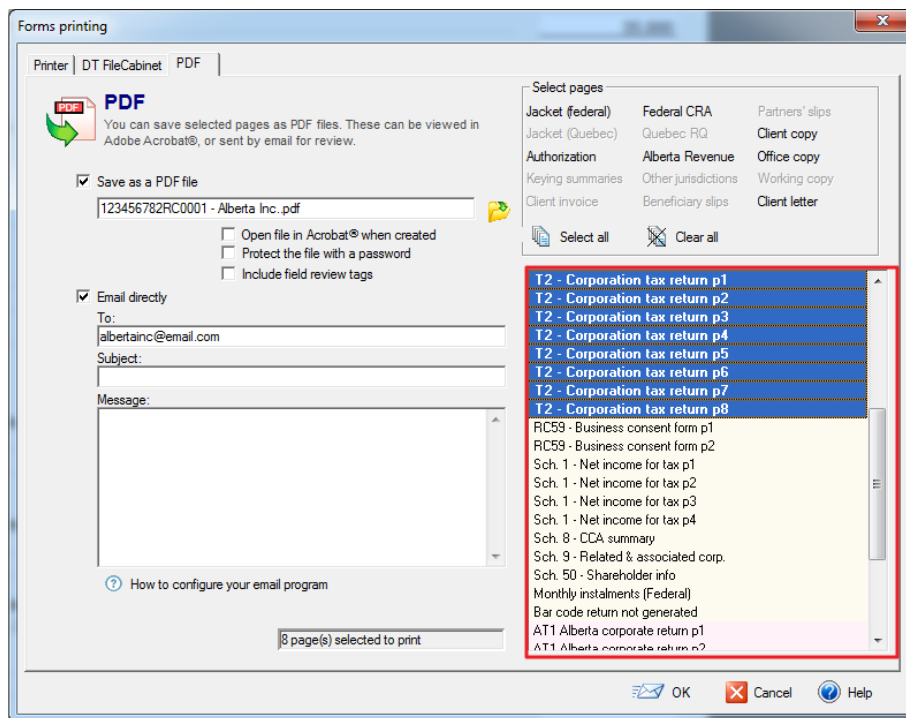

THOMSON REUTERS™

In order to send the PDF files directly as an e-mail, simply tick the box next to **Email directly** and enter the relevant information in the section below.

The **Select pages** section allows you to make a selection of which pages you would like to save to PDF or send directly by e-mail. DT Max will only list the relevant pages with regards to your client.

Tip: You may choose to select the pages one at a time by holding down **CRTL** on your keyboard and clicking the corresponding pages from the list.

PREFERENCES MENU

Security System

DT Max features a security system which enables you to set up the program so that only authorized personnel are allowed to use certain specified attributes.

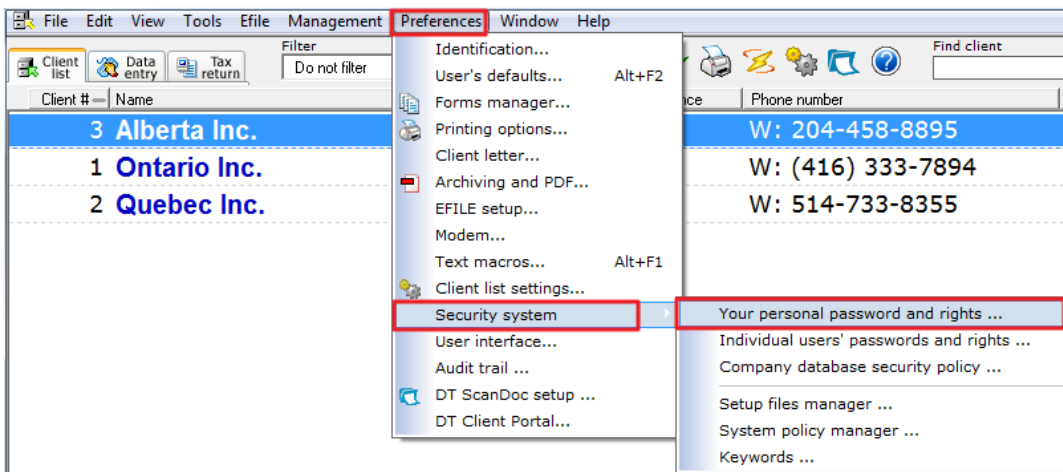

When DT Max is first installed, all users can access any program feature as passwords are not required until the security system is activated.

User IDs and passwords are tied to a specific DT Max database. If you use different databases, each database must have its own security system setup.

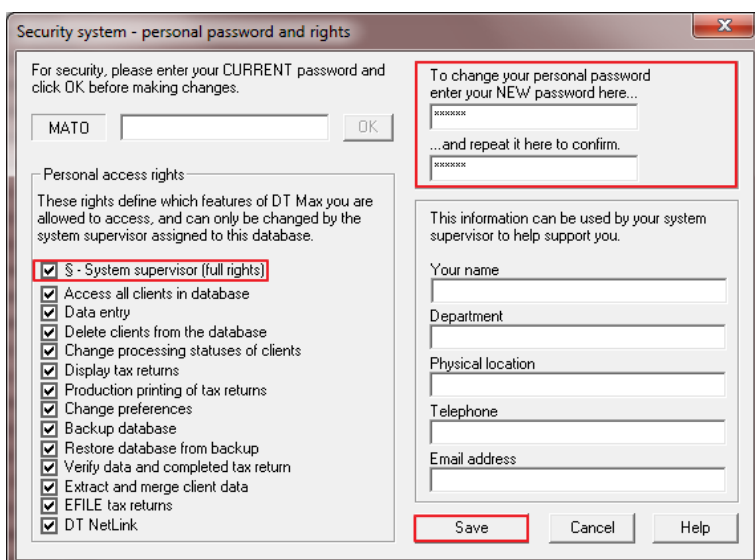

Setting up a supervisor

As a first step, you must set yourself up as a DT Max supervisor. In order to do this, you must create your password.

Go to the **Preferences** menu, select **Security System**, and then select **Your personal passwords and rights**.

A new window appears. Enter your new password at the top right. Make sure that in the **Personal Rights** section, the box next to **System Supervisor** is ticked. Click **SAVE**.

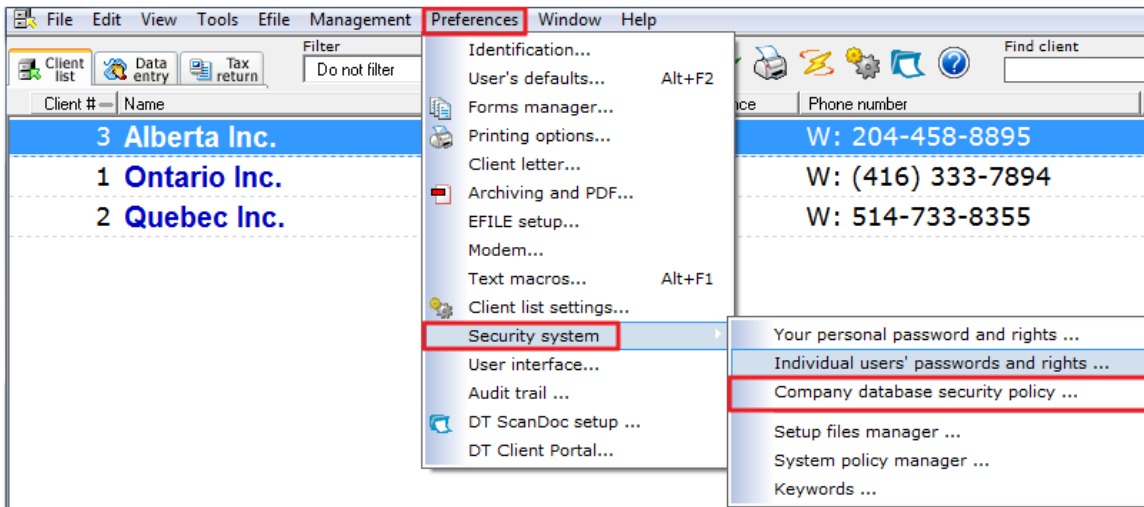

THOMSON REUTERS™

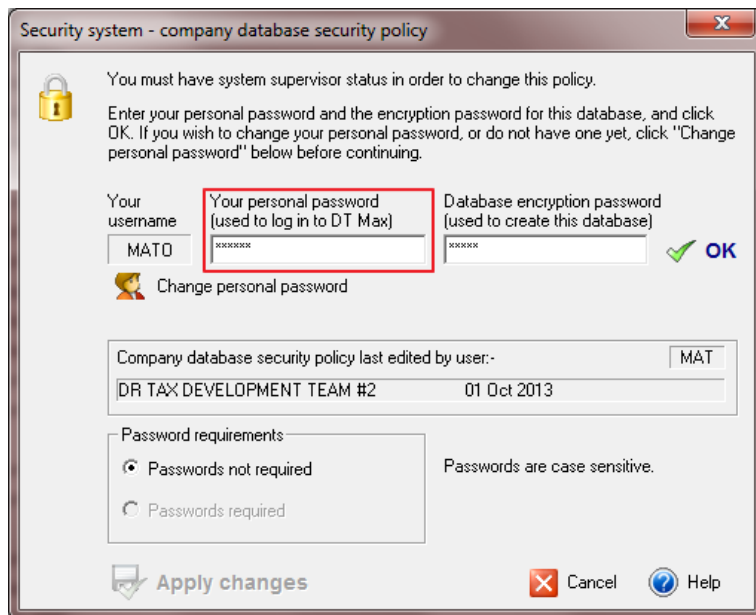

Company Database Security Policy setup

Once you have set up the supervisor, you must now set up the **Company Database Security Policy**.

Go to the **Preferences** menu, select **Security System**, and then select **Company database security policy**.

In **Your personal password**, enter the password you set up in the previous step.

In **Database encryption password**, enter the password you had set up for the database during the installation process. Click **OK**

Security system - company database security policy

You must have system supervisor status in order to change this policy.

Enter your personal password and the encryption password for this database, and click OK. If you wish to change your personal password, or do not have one yet, click "Change personal password" below before continuing.

Your username: MATO
Your personal password (used to log in to DT Max): [REDACTED]
Database encryption password (used to create this database): [REDACTED]

Restart DT Max. You will now be required to enter your password in the Splash Screen.
 Enter your password in the appropriate box and click **Start**.

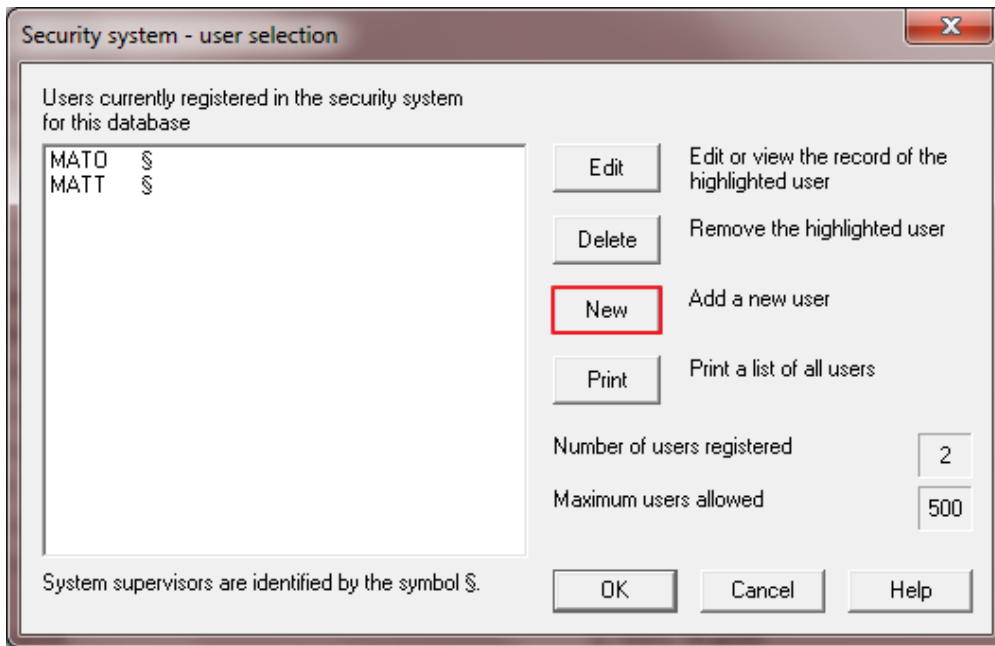

Individual users' passwords and rights

Once you have setup the Company database security policy, you must now assign a username, password, and rights to all other users of DT Max.

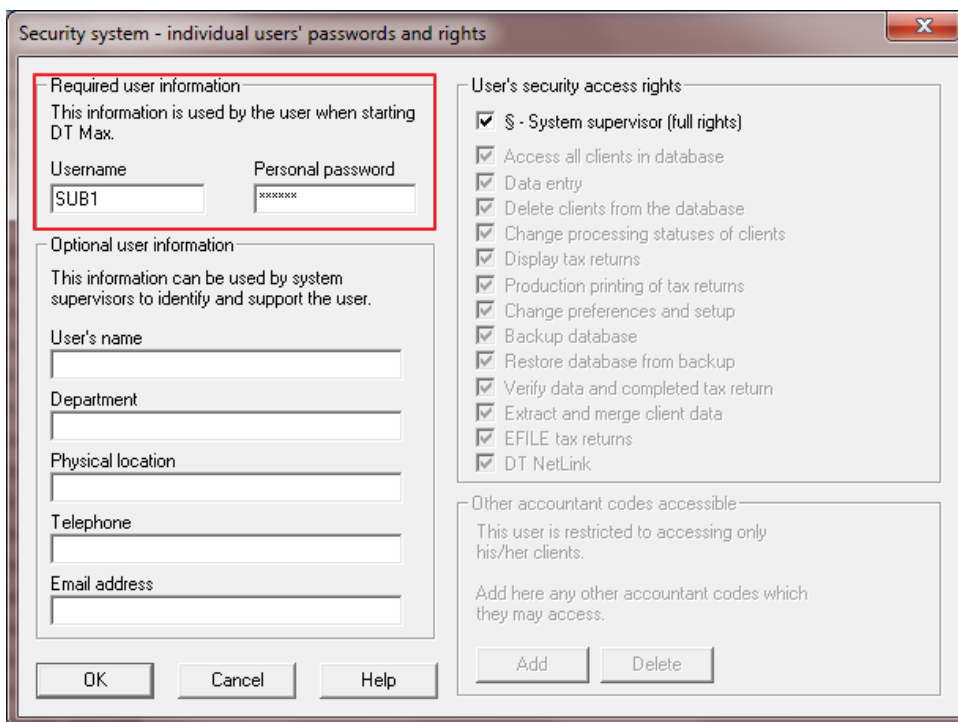

Go to the **Preferences** menu, select **Security System**, and then select **Individual users' passwords and rights**.

A new window appears. Click **New** to add a user to the database.

In the **Required user information** section, enter the user name and password of the new user you are creating.

In the **User's security access and rights** section, untick **System Supervisor** and then untick the rights you want to disable for this particular user.

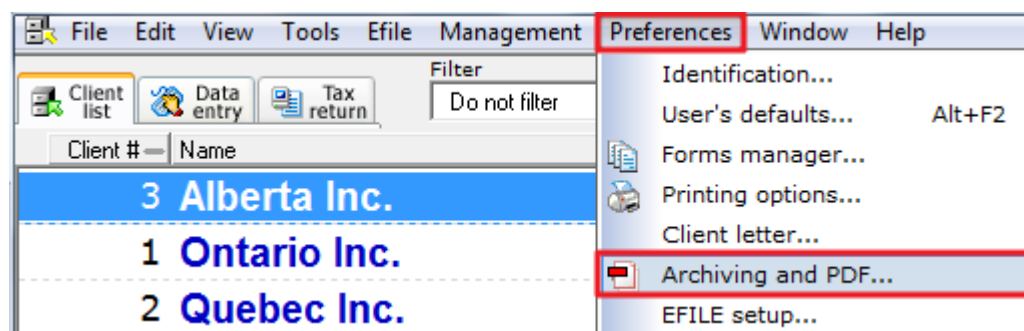

Click **OK** once you are done.

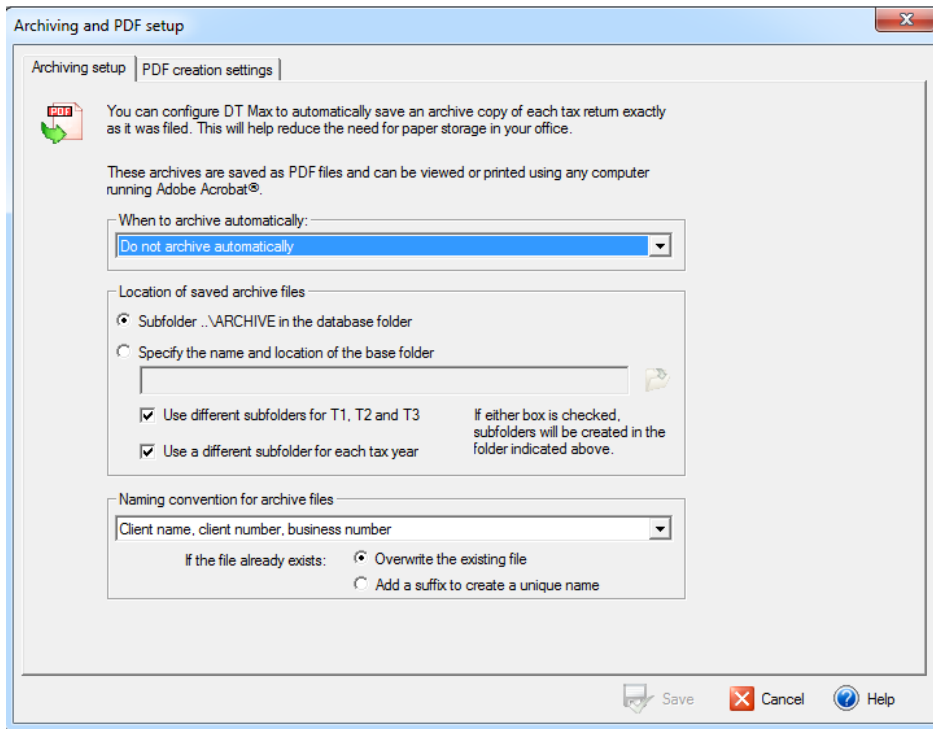

Archiving and PDF

The archiving and PDF tool allows you to greatly reduce the volume of paper used to store your client's documents. Once enabled, DT Max will automatically save an archived copy of the tax returns produced. These archived files are stored in a PDF format easily accessible for future viewing or printing.

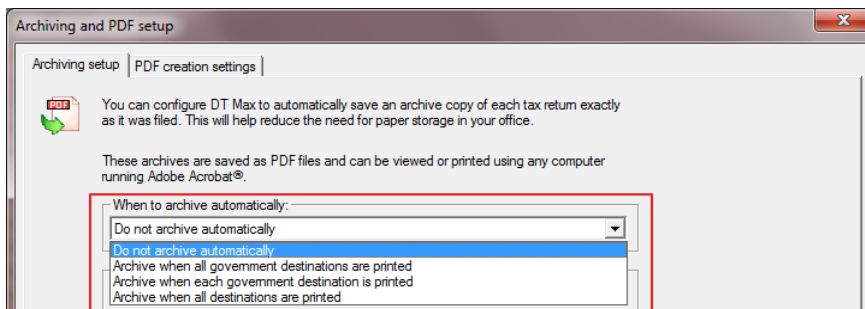

To access this feature, go to the **Preferences** menu and select **Archiving and PDF setup**.

A new window will appear with several options.

In the **When to archive automatically** section, you may choose amongst 4 options. Make the appropriate selection.

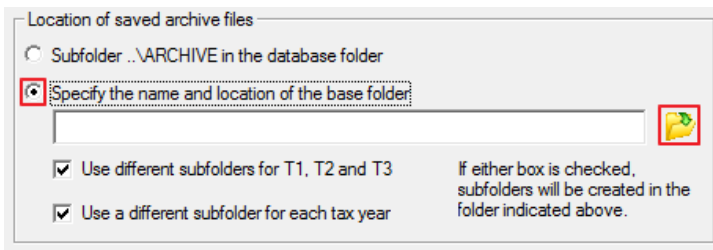

Tip: We strongly recommend to select the “**Archive when all destinations are printed**” option.

In the **Location of saved archive files** section, you may select the location of the base folder where the files will be archived. DT Max will implicitly offer you to save the files in a subfolder located in your database folder.

THOMSON REUTERS™

You may however choose to manually select a base folder location by ticking the box next to **“Specify the name and location of the base folder”** and clicking on the “browse” icon.

The screenshot shows a dialog box titled "Location of saved archive files". It contains two radio buttons: "Subfolder ..\ARCHIVE in the database folder" (unselected) and "Specify the name and location of the base folder:" (selected). Below the selected option is a text input field and a "browse" icon. There are two checked checkboxes: "Use different subfolders for T1, T2 and T3" and "Use a different subfolder for each tax year". To the right, a note states: "If either box is checked, subfolders will be created in the folder indicated above."

Tip: We strongly recommend to keep the **“Use different subfolders for T1, T2, T3”** and **“Use a different subfolder for each tax year”** options selected. This will ensure a proper classification and archiving of your client files.

In the **Naming convention for archive files** section, choose amongst the 4 options. This section will determine how the files will be named in the archive folder. The file name can be composed of the client’s name, client number, and business number.

The screenshot shows a dialog box titled "Naming convention for archive files". It features a dropdown menu with four options: "Client name, client number, business number", "Client number only (8.3 filenames)", "Client name, client number, business number" (highlighted in blue), and "Business number, client name, client number".

Tip: We recommend using the **“Client name, client number, business number”** option.
